MISCELLANEOUS WORKS
OF
JOSEPH ADDISON.

IN FOUR VOLUMES.

VOL. III.

OXFORD,
PUBLISHED BY D. A. TALBOYS.
MDCCLXXX.

THE EVIDENCES

OF THE

CHRISTIAN RELIGION.

SECTION I.

- I General division of the following discourse, with regard to pagan and Jewish authors, who mention particulars relating to our Saviour. II Not probable that any such should be mentioned by pagan writers who lived at the same time, from the nature of such transactions. III. Especially when related by the Jews. IV. And heard at a distance by those who pretended to as great miracles of their own. V. Besides that, no pagan writers of that age lived in Judæa or its confines. VI And because many books of that age are lost. VII An instance of one record proved to be authentic. VIII. A second record of probable, though not undoubted, authority.

THAT I may lay before you a full state of the subject under our consideration, and methodise the several particulars that I touched upon in discourse with you, I shall first take notice of such pagan authors as have given their testimony to the history of our Saviour; reduce these authors under their respective classes, and show what authority their testimonies carry with them. Secondly, I shall take notice of Jewish authors in the same light^a.

^a The author did not live to write this second part.

II. There are many reasons why you should not expect that matters of such a wonderful nature should be taken notice of by those eminent pagan writers who were contemporaries with Jesus Christ, or by those who lived before his disciples had personally appeared among them, and ascertained the report which had gone abroad concerning a life so full of miracles.

Supposing such things had happened at this day in Switzerland, or among the Grisons, who make a greater figure in Europe than Judæa did in the Roman empire, would they be immediately believed by those who live at a great distance from them? or would any certain account of them be transmitted into foreign countries within so short a space of time as that of our Saviour's public ministry? Such kinds of news, though never so true, seldom gain credit till some time after they are transacted and exposed to the examination of the curious, who, by laying together circumstances, attestations, and characters of those who are concerned in them, either receive or reject what at first none but eyewitnesses could absolutely believe or disbelieve. In a case of this sort, it was natural for men of sense and learning to treat the whole account as fabulous, or at farthest to suspend their belief of it, until all things stood together in their full light.

III. Besides, the Jews were branded not only for superstitions different from all the religions of the pagan world, but in a particular manner ridiculed for being a credulous people; so that whatever reports of such a nature came out of that country, were looked upon as false, frivolous, and improbable.

IV. We may farther observe, that the ordinary practice of magic in those times, with the many pre-

tended prodigies, divinations, apparitions, and local miracles among the heathens, made them less attentive to such news from Judæa, till they had time to consider the nature, the occasion, and the end of our Saviour's miracles, and were awakened by many surprising events to allow them any consideration at all.

V. We are indeed told by St. Matthew, that the fame of our Saviour, during his life, went throughout all Syria, and that there followed him great multitudes of people from Galilee, Judæa, Decapolis, Idumæa, from beyond Jordan, and from Tyre and Sidon. Now had there been any historians of those times and places, we might have expected to have seen in them some account of those wonderful transactions in Judæa; but there is not any single author extant, in any kind, of that age, in any of those countries.

VI. How many books have perished in which possibly there might have been mention of our Saviour? Look among the Romans, how few of their writings are come down to our times? In the space of two hundred years from our Saviour's birth, when there was such a multitude of writers in all kinds, how small is the number of authors that have made their way to the present age?

VII. One authentic record, and that the most authentic heathen record, we are pretty sure is lost. I mean the account sent by the governor of Judæa, under whom our Saviour was judged, condemned, and crucified. It was the custom in the Roman empire, as it is to this day in all the governments of the world, for the prefects and viceroys of distant provinces to transmit to their sovereign a summary relation of everything remarkable in their admi-

nistration. That Pontius Pilate, in his account, would have touched on so extraordinary an event in Judæa, is not to be doubted; and that he actually did, we learn from Justin Martyr, who lived about a hundred years after our Saviour's death, resided, made converts, and suffered martyrdom at Rome, where he was engaged with philosophers, and in a particular manner with Crescens the Cynic, who could easily have detected, and would not fail to have exposed him, had he quoted a record not in being, or made any false citation out of it. Would the great apologist have challenged Crescens to dispute the cause of Christianity with him before the Roman senate, had he forged such an evidence? or would Crescens have refused the challenge, could he have triumphed over him in the detection of such a forgery? To which we must add, that the Apology, which appeals to this record, was presented to a learned emperor, and to the whole body of the Roman senate. This father, in his Apology, speaking of the death and suffering of our Saviour, refers the emperor for the truth of what he says to the acts of Pontius Pilate, which I have here mentioned. Tertullian, who wrote his Apology about fifty years after Justin, doubtless referred to the same record, when he tells the governor of Rome, that the emperor Tiberius, having received an account out of Palestine in Syria of the divine person who had appeared in that country, paid him a particular regard, and threatened to punish any who should accuse the Christians; nay, that the emperor would have adopted him among the deities whom they worshipped, had not the senate refused to come into his proposal. Tertullian, who gives us this history, was not only one of the most learned men of his age

but, what adds a greater weight to his authority in this case, was eminently skilful and well read in the laws of the Roman empire. Nor can it be said, that Tertullian grounded his quotation upon the authority of Justin Martyr, because we find he mixes it with matters of fact which are not related by that author. Eusebius mentions the same ancient record; but as it was not extant in his time, I shall not insist upon his authority in this point. If it be objected that this particular is not mentioned in any Roman historian, I shall use the same argument in a parallel case, and see whether it will carry any force with it. Ulpian, the great Roman lawyer, gathered together all the imperial edicts that had been made against the Christians. But did any one ever say that there had been no such edicts, because they were not mentioned in the histories of those emperors? Besides, who knows but this circumstance of Tiberius was mentioned in other historians that have been lost, though not to be found in any still extant? Has not Suetonius many particulars of this emperor omitted by Tacitus, and Herodian many that are not so much as hinted at by either? As for the spurious acts of Pilate, now extant, we know the occasion and time of their writing; and had there not been a true and authentic record of this nature, they would never have been forged.

VIII. The story of Abgarus king of Edessa, relating to the letter which he sent to our Saviour, and to that which he received from him, is a record of great authority; and though I will not insist upon it, I may venture to say, that had we such an evidence for any fact in pagan history, an author would be thought very unreasonable who should reject it. I believe you will be of my opinion, if

you will peruse, with other authors who have appeared in vindication of these letters as genuine, the additional arguments which have been made use of by the late famous and learned Dr. Grabe, in the second volume of his *Spicilegium*.

SECTION II.

- I. What facts in the history of our Saviour might be taken notice of by pagan authors. II. What particular facts are taken notice of, and by what pagan authors. III. How Celsus represented our Saviour's miracles. IV. The same representation made of them by other unbelievers, and proved unreasonable. V. What facts in our Saviour's history not to be expected from pagan writers.

WE now come to consider what undoubted authorities are extant among pagan writers; and here we must premise, that some parts of our Saviour's history may be reasonably expected from pagans. I mean such parts as might be known to those who lived at a distance from Judæa, as well as to those who were the followers and eyewitnesses of Christ.

II. Such particulars are most of these which follow, and which are all attested by some one or other of those heathen authors, who lived in or near the age of our Saviour and his disciples. "That Augustus Cæsar had ordered the whole empire to be censed or taxed," which brought our Saviour's reputed parents to Bethlehem: this is mentioned by several Roman historians, as Tacitus, Suetonius, and Dion. "That a great light, or a new star, appeared in the east, which directed the wise men to our Saviour:" this is recorded by Chalcidius. "That Herod the king of Palæstine, so often mentioned in the Roman history, made a great slaughter of innocent children," being so jealous of his successor, that he put to death his own sons on that account: this

character of him is given by several historians, and this cruel fact mentioned by Macrobius, a heathen author, who tells it as a known thing, without any mark or doubt upon it. "That our Saviour had been in Egypt:" this Celsus, though he raises a monstrous story upon it, is so far from denying, that he tells us our Saviour learned the arts of magic in that country. "That Pontius Pilate was governor of Judæa; that our Saviour was brought in judgment before him, and by him condemned and crucified:" this is recorded by Tacitus. "That many miraculous cures, and works out of the ordinary course of nature, were wrought by him:" this is confessed by Julian the apostate, Porphyry, and Hierocles, all of them not only pagans, but professed enemies and persecutors of Christianity. "That our Saviour foretold several things which came to pass according to his predictions;" this was attested by Phlegon in his annals, as we are assured by the learned Origen against Celsus. "That at the time when our Saviour died, there was a miraculous darkness and a great earthquake:" this is recorded by the same Phlegon the Trallian, who was likewise a pagan, and freeman to Adrian the emperor. We may here observe, that a native of Trallium, which was not situate at so great a distance from Palæstine, might very probably be informed of such remarkable events as had passed among the Jews in the age immediately preceding his own times, since several of his countrymen with whom he had conversed, might have received a confused report of our Saviour before his crucifixion, and probably lived within the shake of the earthquake, and the shadow of the eclipse, which are recorded by this author. "That Christ was worshipped as a God among the Christians; that they would

rather suffer death than blaspheme him ; that they received a sacrament, and by it entered into a vow of abstaining from sin and wickedness," conformable to the advice given by St. Paul ; "that they had private assemblies of worship, and used to join together in hymns:" this is the account which Pliny the younger gives of Christianity in his days, about seventy years after the death of Christ, and which agrees in all its circumstances with the accounts we have in holy writ, of the first state of Christianity after the crucifixion of our blessed Saviour. "That St. Peter, whose miracles are many of them recorded in holy writ, did many wonderful works," is owned by Julian the apostate, who therefore represents him as a great magician, and one who had in his possession a book of magical secrets left him by our Saviour. "That the devils or evil spirits were subject to them," we may learn from Porphyry, who objects to Christianity, that, since Jesus had begun to be worshipped, Æsculapius and the rest of the gods did no more converse with men. Nay, Celsus himself affirms the same thing in effect, when he says, that the power which seemed to reside in Christians, proceeded from the use of certain names, and the invocation of certain demons. Origen remarks on this passage, that the author doubtless hints at those Christians who put to flight evil spirits, and healed those who were possessed with them ; a fact which had been often seen, and which he himself had seen, as he declares in another part of his discourse against Celsus. But at the same time he assures us, that this miraculous power was exerted by the use of no other name but that of Jesus, to which were added several passages in his history, but nothing like any invocation to demons.

III. Celsus was so hard set with the report of our Saviour's miracles, and the confident attestations concerning him, that though he often intimates he did not believe them to be true, yet, knowing he might be silenced in such an answer, provides himself with another retreat, when beaten out of this, namely, that our Saviour was a magician. Thus he compares the feeding of so many thousands at two different times with a few loaves and fishes, to the magical feasts of those Egyptian impostors, who would present their spectators with visionary entertainments, that had in them neither substance nor reality: which, by the way, is to suppose, that a hungry and fainting multitude were filled by an apparition, or strengthened and refreshed with shadows. He knew very well that there were so many witnesses and actors, if I may call them such, in these two miracles, that it was impossible to refute such multitudes, who had doubtless sufficiently spread the fame of them, and was therefore in this place forced to resort to the other solution, that it was done by magic. It was not enough to say, that a miracle which appeared to so many thousand eye-witnesses was a forgery of Christ's disciples, and therefore, supposing them to be eyewitnesses, he endeavours to show how they might be deceived.

IV. The uncontroverted heathens, who were pressed by the many authorities that confirmed our Saviour's miracles, as well as the unbelieving Jews, who had actually seen them, were driven to account for them after the same manner: for, to work by magic, in the heathen way of speaking, was in the language of the Jews to cast out devils by Beelzebub the prince of the devils. Our Saviour, who knew that unbelievers in all ages would put this perverse

interpretation on his miracles, has branded the malignity of those men, who, contrary to the dictates of their own hearts, started such an unreasonable objection, as a blasphemy against the Holy Ghost, and declared not only the guilt, but the punishment of so black a crime. At the same time he condescended to show the vanity and emptiness of this objection against his miracles, by representing that they evidently tended to the destruction of those powers, to whose assistance the enemies of his doctrine then ascribed them. An argument which, if duly weighed, renders the objection so very frivolous and groundless, that we may venture to call it even blasphemy against common sense. Would magic endeavour to draw off the minds of men from the worship which was paid to stocks and stones, to give them an abhorrence of those evil spirits who rejoiced in the most cruel sacrifices, and in offerings of the greatest impurity; and, in short, to call upon mankind to exert their whole strength in the love and adoration of that one being, from whom they derived their existence, and on whom only they were taught to depend every moment for the happiness and continuance of it? Was it the business of magic to humanise our natures with compassion, forgiveness, and all the instances of the most extensive charity? Would evil spirits contribute to make men sober, chaste, and, temperate and, in a word, to produce that reformation, which was wrought in the moral world by those doctrines of our Saviour, that received their sanction from his miracles? Nor is it possible to imagine, that evil spirits would enter into a combination with our Saviour to cut off all their correspondence and intercourse with mankind, and to prevent any for the

future from addicting themselves to those rites and ceremonies, which had done them so much honour. We see the early effect which Christianity had on the minds of men in this particular, by that number of books which were filled with the secrets of magic, and made a sacrifice to Christianity by the converts mentioned in the Acts of the Apostles. We have likewise an eminent instance of the inconsistency of our religion with magic, in the history of the famous Aquila. This person, who was a kinsman of the emperor Trajan, and likewise a man of great learning, notwithstanding he had embraced Christianity, could not be brought off from the studies of magic, by the repeated admonitions of his fellow-Christians: so that at length they expelled him their society, as rather choosing to lose the reputation of so considerable a proselyte, than communicate with one who dealt in such dark and infernal practices. Besides, we may observe, that all the favourers of magic were the most professed and bitter enemies to the Christian religion. Not to mention Simon Magus and many others, I shall only take notice of those two great persecutors of Christianity, the emperors Adrian and Julian the apostate, both of them initiated in the mysteries of divination, and skilled in all the depths of magic. I shall only add, that evil spirits cannot be supposed to have concurred in the establishment of a religion which triumphed over them, drove them out of the places they possessed, and divested them of their influence on mankind: nor would I mention this particular, though it be unanimously reported by all the ancient Christian authors, did it not appear, from the authorities above cited, that this was a fact confessed by heathens themselves.

V. We now see what a multitude of pagan testimonies may be produced for all those remarkable passages which might have been expected from them, and indeed of several that, I believe, do more than answer your expectation, as they were not subjects in their own nature so exposed to public notoriety. It cannot be expected they should mention particulars which were transacted among the disciples only, or among some few even of the disciples themselves; such as the transfiguration, the agony in the garden, the appearance of Christ after his resurrection, and others of the like nature. It was impossible for a heathen author to relate these things, because, if he had believed them, he would no longer have been a heathen, and by that means his testimony would not have been thought of so much validity. Besides, his very report of facts so favourable to Christianity would have prompted men to say that he was probably tainted with their doctrine. We have a parallel case in Hecataeus, a famous Greek historian, who had several passages in his book conformable to the history of the Jewish writers, which, when quoted by Josephus as a confirmation of the Jewish history, when his heathen adversaries could give no other answer to it, they would need suppose that Hecataeus was a Jew in his heart, though they had no other reason for it, but because his history gave greater authority to the Jewish than the Egyptian records.

SECTION III.

- I. Introduction to a second list of pagan authors who give testimony of our Saviour II. A passage concerning our Saviour from a learned Athenian. III. His conversion from paganism to Christianity makes his evidence stronger than if he had continued a pagan. IV. Of another Athenian philosopher converted to Christianity. V. Why then conversion, instead of weakening, strengthens their evidence in defence of Christianity. VI. Their belief in our Saviour's history founded at first upon the principles of historical faith. VII. Their testimonies extended to all the particulars of our Saviour's history. VIII. As related by the four Evangelists.

TO this list of heathen writers, who make mention of our Saviour, or touch upon any particulars of his life, I shall add those authors who were at first heathens, and afterwards converted to Christianity; upon which account, as I shall here show, their testimonies are to be looked upon as the more authentic. And in this list of evidences, I shall confine myself to such learned pagans as came over to Christianity in the first three centuries, because those were the times in which men had the best means of informing themselves of the truth of our Saviour's history, and because among the great number of philosophers who came in afterwards, under the reigns of Christian emperors, there might be several who did it partly out of worldly motives.

II. Let us now suppose, that a learned heathen writer, who lived within sixty years of our Saviour's crucifixion, after having shown that false miracles were generally wrought in obscurity, and before few or no witnesses, speaking of those which were wrought by our Saviour, has the following passage

“ But his works were always seen, because they were true ; they were seen by those who were healed, and by those who were raised from the dead. Nay, these persons who were thus healed, and raised, were seen not only at the time of their being healed, and raised, but long afterwards. Nay, they were seen not only all the while our Saviour was upon earth, but survived after his departure out of this world ; nay, some of them were living in our days.”

III. I dare say you would look upon this as a glorious attestation for the cause of Christianity, had it come from the hand of a famous Athenian philosopher. These forementioned words, however, are actually the words of one who lived about sixty years after our Saviour's crucifixion, and was a famous philosopher in Athens : but it will be said, he was a convert to Christianity. Now consider this matter impartially, and see if his testimony is not much more valid for that reason. Had he continued a pagan philosopher, would not the world have said that he was not sincere in what he wrote, or did not believe it ; for, if so, would not they have told us he would have embraced Christianity ? This was indeed the case of this excellent man : he had so thoroughly examined the truth of our Saviour's history, and the excellency of that religion which he taught, and was so entirely convinced of both, that he became a proselyte, and died a martyr.

IV. Aristides was an Athenian philosopher at the same time, famed for his learning and wisdom, but converted to Christianity. As it cannot be questioned that he perused and approved the *Apology of Quadratus*, in which is the passage just now cited, he joined with him in an *Apology* of his own, to the same emperor, on the same subject. This *Apology*.

though now lost, was extant in the time of Ado Vinnensis, A. D. 870, and highly esteemed by the most learned Athenians, as that author witnesses. It must have contained great arguments for the truth of our Saviour's history, because in it he asserted the divinity of our Saviour, which could not but engage him in the proof of his miracles.

V. I do allow that, generally speaking, a man is not so acceptable and unquestioned an evidence in facts which make for the advancement of his own party. But we must consider that, in the case before us, the persons to whom we appeal were of an opposite party, till they were persuaded of the truth of those very facts which they report. They bear evidence to a history in defence of Christianity, the truth of which history was their motive to embrace Christianity. They attest facts which they had heard while they were yet heathens; and had they not found reason to believe them, they would still have continued heathens, and have made no mention of them in their writings.

VI. When a man is born under Christian parents, and trained up in the profession of that religion from a child, he generally guides himself by the rules of Christian faith, in believing what is delivered by the Evangelists; but the learned pagans of antiquity, before they became Christians, were only guided by the common rules of historical faith: that is, they examined the nature of the evidence which was to be met with in common fame, tradition, and the writings of those persons who related them, together with the number, concurrence, veracity, and private characters of those persons; and being convinced upon all accounts that they had the same reason to believe the history of our Saviour as that of any

other person, to which they themselves were not actually eyewitnesses, they were bound, by all the rules of historical faith and of right reason, to give credit to this history. This they did accordingly, and in consequence of it published the same truths themselves, suffered many afflictions, and very often death itself, in the assertion of them. When I say, that an historical belief of the acts of our Saviour induced these learned pagans to embrace his doctrine, I do not deny that there were many other motives which conduced to it; as the excellency of his precepts, the fulfilling of prophecies, the miracles of his disciples, the irreproachable lives and magnanimous sufferings of their followers, with other considerations of the same nature: but whatever other collateral arguments wrought more or less with philosophers of that age, it is certain that a belief in the history of our Saviour was one motive with every new convert, and that upon which all others turned, as being the very basis and foundation of Christianity.

VII. To this I must farther add, that as we have already seen many particular facts which are recorded in holy writ, attested by particular pagan authors, the testimony of those I am now going to produce extends to the whole history of our Saviour, and to that continued series of actions, which are related of him and his disciples in the books of the New Testament.

VIII. This evidently appears from their quotations out of the Evangelists, for the confirmation of any doctrine or account of our blessed Saviour. Nay, a learned man of our nation, who examined the writings of our most ancient Fathers in another view, refers to several passages in Irenæus, Tertullian,

Clemens of Alexandria, Origen, and Cyprian, by which he plainly shows, that each of these early writers ascribe to the four Evangelists by name their respective histories; so that there is not the least room for doubting of their belief in the history of our Saviour, as recorded in the Gospels. I shall only add, that three of the five Fathers here mentioned, and probably four, were pagans converted to Christianity, as they were all of them very inquisitive and deep in the knowledge of heathen learning and philosophy.

SECTION IV.

- I. Character of the times in which the Christian religion was propagated; II. And of many who embraced it. III. Three eminent and early instances. IV. Multitudes of learned men who came over to it. V. Belief in our Saviour's history, the first motive to their conversion. VI. The names of several pagan philosophers who were Christian converts.

IT happened very providentially to the honour of the Christian religion, that it did not take its rise in the dark and illiterate ages of the world, but at a time when arts and sciences were at their height, and when there were men who made it the business of their lives to search after truth, and sift the several opinions of philosophers and wise men, concerning the duty, the end, and chief happiness of reasonable creatures.

II. Several of these, therefore, when they had informed themselves of our Saviour's history, and examined with unprejudiced minds the doctrines and manners of his disciples and followers, were so struck and convinced, that they professed themselves of that sect; notwithstanding, by this profession in that juncture of time, they bid farewell to all the pleasures of this life, renounced all the views of ambition, engaged in an uninterrupted course of severities, and exposed themselves to public hatred and contempt, to sufferings of all kinds, and to death itself.

III. Of this sort we may reckon those three early converts to Christianity, who each of them was a member of a senate famous for its wisdom and learning. Joseph the Arimathean was of the Jewish

sanhedrim, Dionysius of the Athenian areopagus, and Flavius Clemens of the Roman senate; nay, at the time of his death, consul of Rome. These three were so thoroughly satisfied of the truth of the Christian religion, that the first of them, according to all the reports of antiquity, died a martyr for it; as did the second, unless we disbelieve Aristides, his fellow-citizen and contemporary; and the third, as we are informed both by Roman and Christian authors.

IV. Among those innumerable multitudes, who in most of the known nations of the world came over to Christianity at its first appearance, we may be sure there were great numbers of wise and learned men, beside those whose names are in the Christian records, who without doubt took care to examine the truth of our Saviour's history, before they would leave the religion of their country and of their forefathers, for the sake of one that would not only cut them off from the allurements of this world, but subject them to everything terrible or disagreeable in it. Tertullian tells the Roman governors, that their corporations, councils, armies, tribes, companies, the palace, senate, and courts of judicature were filled with Christians; as Arnobius asserts, that men of the finest parts and learning, orators, grammarians, rhetoricians, lawyers, physicians, philosophers, despising the sentiments they had been once fond of, took up their rest in the Christian religion.

V. Who can imagine that men of this character did not thoroughly inform themselves of the history of that Person whose doctrines they embraced? For, however consonant to reason his precepts appeared, how good soever were the effects which they produced in the world, nothing could have tempted

men to acknowledge him as their God and Saviour, but their being firmly persuaded of the miracles he wrought, and the many attestations of his divine mission, which were to be met with in the history of his life. This was the groundwork of the Christian religion; and if this failed, the whole superstructure sunk with it. This point, therefore, of the truth of our Saviour's history, as recorded by the Evangelists, is everywhere taken for granted in the writings of those, who from pagan philosophers became Christian authors, and who, by reason of their conversion, are to be looked upon as of the strongest collateral testimony for the truth of what is delivered concerning our Saviour.

VI. Besides innumerable authors that are lost, we have the undoubted names, works, or fragments of several pagan philosophers, which show them to have been as learned as any unconverted heathen authors of the age in which they lived. If we look into the greatest nurseries of learning in those ages of the world, we find in Athens, Dionysius, Quadratus, Aristides, Athenagoras; and in Alexandria, Dionysius, Clemens, Ammonius, Arnobius, and Anatolius, to whom we may add Origen; for though his father was a Christian martyr, he became, without all controversy, the most learned and able philosopher of his age, by his education at Alexandria, in that famous seminary of arts and sciences.

SECTION V.

- I. The learned pagans had means and opportunities of informing themselves of the truth of our Saviour's history; II. From the proceedings, III. The characters, sufferings, IV. And miracles of the persons who published it. V. How first these apostles perpetuated their tradition, by ordaining persons to succeed them. VI. How their successors in the first three centuries preserved their tradition. VII. That five generations might derive this tradition from Christ, to the end of the third century. VIII. Four eminent Christians that delivered it down successively to the year of our Lord 254. IX. The faith of the four above-mentioned persons, the same with that of the churches of the east, of the west, and of Egypt. X. Another person added to them, who brings us to the year 343, and that many other lists might be added in as direct and short a succession. XI. Why the tradition of the first three centuries more authentic than that of any other age, proved from the conversation of the primitive Christians; XII. From the manner of initiating men into their religion; XIII. From the correspondence between the churches; XIV. *From the long lives of several of Christ's disciples, of which two instances.*

IT now therefore only remains to consider, whether these learned men had means and opportunities of informing themselves of the truth of our Saviour's history; for unless this point can be made out, their testimonies will appear invalid, and their inquiries ineffectual.

II. As to this point, we must consider, that many thousands had seen the transactions of our Saviour in Judæa, and that many hundred thousands had received an account of them from the mouths of those who were actually eyewitnesses. I shall only mention among these eyewitnesses the twelve apostles,

to whom we must add St. Paul, who had a particular call to this high office, though many other disciples and followers of Christ had also their share in the publishing this wonderful history. We learn from the ancient records of Christianity, that many of the apostles and disciples made it the express business of their lives, travelled into the remotest parts of the world, and in all places gathered multitudes about them, to acquaint them with the history and doctrines of their crucified master. And, indeed, were all Christian records of these proceedings entirely lost, as many have been, the effect plainly evinces the truth of them; for how else during the apostles' lives could Christianity have spread itself with such an amazing progress through the several nations of the Roman empire? How could it fly like lightning, and carry conviction with it, from one end of the earth to the other.

III. Heathens, therefore, of every age, sex, and quality, born in the most different climates, and bred up under the most different institutions, when they saw men of plain sense, without the help of learning, armed with patience and courage, instead of wealth, pomp, or power, expressing in their lives those excellent doctrines of morality, which they taught as delivered to them from our Saviour, averring that they had seen his miracles during his life, and conversed with him after his death; when, I say, they saw no suspicion of falsehood, treachery, or worldly interest in their behaviour and conversation, and that they submitted to the most ignominious and cruel deaths, rather than retract their testimony, or even be silent in matters which they were to publish by their Saviour's especial command, there was

no reason to doubt of the veracity of those facts which they related, or of the divine mission in which they were employed.

IV. But even these motives to faith in our Saviour would not have been sufficient to have brought about in so few years such an incredible number of conversions, had not the apostles been able to exhibit still greater proofs of the truths which they taught. A few persons of an odious and despised country could not have filled the world with believers, had they not shown undoubted credentials from the divine person who sent them on such a message. Accordingly we are assured, that they were invested with the power of working miracles, which was the most short and the most convincing argument that could be produced, and the only one that was adapted to the reason of all mankind, to the capacities of the wise and ignorant, and could overcome every cavil and every prejudice. Who would not believe that our Saviour healed the sick, and raised the dead, when it was published by those who themselves often did the same miracles in their presence, and in his name! Could any reasonable person imagine, that God Almighty would arm men with such powers to authorize a lie, and establish a religion in the world which was displeasing to him, or that evil spirits would lend them such an effectual assistance to beat down vice and idolatry?

V. When the apostles had formed many assemblies in several parts of the pagan world, who gave credit to the glad tidings of the gospel, that, upon their departure, the memory of what they had related might not perish, they appointed, out of these new converts, men of the best sense, and of the most unblemished

lives, to preside over these several assemblies, and to inculcate, without ceasing, what they had heard from the mouths of these eyewitnesses.

VI. Upon the death of any of those substitutes to the apostles and disciples of Christ, his place was filled up with some other person of eminence for his piety and learning, and generally a member of the same church, who, after his decease, was followed by another in the same manner, by which means the succession was continued in an uninterrupted line. Irenæus informs us, that every church preserved a catalogue of its bishops in the order that they succeeded one another, and, for an example, produces a catalogue of those who governed the church of Rome in that character, which contains eight or nine persons, though but a very small remove from the times of the apostles.

Indeed the lists of bishops, which are come down to us in other churches, are generally filled with greater numbers than one would expect. But the succession was quick in the first three centuries, because the bishop very often ended in the martyr: for when a persecution arose in any place, the first fury of it fell upon this order of holy men, who abundantly testified, by their deaths and sufferings, that they did not undertake these offices out of any temporal views, that they were sincere and satisfied in the belief of what they taught, and that they firmly adhered to what they had received from the apostles, as laying down their lives in the same hope, and upon the same principles. None can be supposed so utterly regardless of their own happiness as to expire in torment, and hazard their eternity, to support any fables and inventions of their own, or any forgeries of their predecessors who had

presided in the same church, and which might have been easily detected by the tradition of that particular church, as well as by the concurring testimony of others. To this purpose, I think it is very remarkable, that there was not a single martyr among those many heretics, who disagreed with the apostolical church, and introduced several wild and absurd notions into the doctrines of Christianity. They durst not stake their present and future happiness on their own chimerical operations, and did not only shun persecution, but affirmed, that it was unnecessary for their followers to bear their religion through such fiery trials.

VII. We may fairly reckon, that this first age of apostles and disciples, with that second generation of many who were their immediate converts, extended itself to the middle of the second century, and that several of the third generation from these last mentioned, which was but the fifth from Christ, continued to the end of the third century. Did we know the ages and numbers of the members in every particular church, which was planted by the apostles, I doubt not but in most of them there might be found five persons, who in a continued series would reach through these three centuries of years, that is, till the 265th from the death of our Saviour.

VIII. Among the accounts of those very few out of innumerable multitudes, who had embraced Christianity, I shall single out four persons eminent for their lives, their writings, and their sufferings, that were successively contemporaries, and bring us down as far as to the year of our Lord 254. St. John, who was the beloved disciple, and conversed the most intimately with our Saviour, lived till A. D. 100. Polycarp, who was the disciple of St. John,

and had conversed with others of the apostles and disciples of our Lord, lived till A. D. 167, though his life was shortened by martyrdom. Irenæus, who was the disciple of Polycarp, and had conversed with many of the immediate disciples of the apostles, lived, at the lowest computation of his age, till the year 202, when he was likewise cut off by martyrdom ; in which year the great Origen was appointed regent, of the catechetical school in Alexandria ; and as he was the miracle of that age, for industry, learning, and philosophy, he was looked upon as the champion of Christianity, till the year 254, when, if he did not suffer martyrdom, as some think he did, he was certainly actuated by the spirit of it, as appears in the whole course of his life and writings ; nay, he had often been put to the torture, and had undergone trials worse than death. As he conversed with the most eminent Christians of his time in Egypt and in the east, brought over multitudes both from heresy and heathenism, and left behind him several disciples of great fame and learning, there is no question but there were considerable numbers of those who knew him, and had been his hearers, scholars, or proselytes, that lived to the end of the third century, and to the reign of Constantine the Great.

IX. It is evident to those who read the lives and writings of Polycarp, Irenæus, and Origen, that these three fathers believed the accounts which are given of our Saviour in the four Evangelists, and had undoubted arguments, that not only St. John, but many others of our Saviour's disciples, published the same accounts of him. To which we must subjoin this farther remark, that what was believed by these fathers on this subject, was likewise the belief

of the main body of Christians in those successive ages when they flourished ; since Polycarp cannot but be looked upon, if we consider the respect that was paid him, as the representative of the eastern churches in this particular, Irenæus of the western upon the same account, and Origen of those established in Egypt.

X. To these I might add Paul the famous hermit, who retired from the Decian persecution five or six years before Origen's death, and lived till the year 343. I have only discovered one of those channels by which the history of our Saviour might be conveyed pure and unadulterated through those several ages that produced those pagan philosophers, whose testimonies I make use of for the truth of our Saviour's history. Some or other of these philosophers came into the Christian faith during its infancy, in the several periods of these first three centuries, when they had such means of informing themselves in all the particulars of our Saviour's history. I must farther add, that though I have here only chosen this single link of martyrs, I might find out others among those names which are still extant, that delivered down this account of our Saviour in a successive tradition, till the whole Roman empire became Christian ; as there is no question but numberless series of witnesses might follow one another in the same order, and in as short a chain, and that, perhaps, in every single church, had the names and ages of the most eminent primitive Christians been transmitted to us with the like certainty.

XI. But to give this consideration more force, we must take notice, that the tradition of the first ages of Christianity had several circumstances peculiar to it, which made it more authentic than any other

tradition in any other age of the world. The Christians, who carried their religion through so many general and particular persecutions, were incessantly comforting and supporting one another with the example and history of our Saviour and his apostles. It was the subject not only of their solemn assemblies, but of their private visits and conversations. "Our virgins," says Tatian, who lived in the second century, "discourse over their distaffs on divine subjects." Indeed, when religion was woven into the civil government, and flourished under the protection of the emperors, men's thoughts and discourses were, as they are now, full of secular affairs; but in the first three centuries of Christianity, men, who embraced this religion, had given up all their interests in this world, and lived in a perpetual preparation for the next, as not knowing how soon they might be called to it: so that they had little else to talk of but the life and doctrines of that divine person, which was their hope, their encouragement, and their glory. We cannot therefore imagine, that there was a single person arrived at any degree of age or consideration, who had not heard and repeated above a thousand times in his life, all the particulars of our Saviour's birth, life, death, resurrection, and ascension.

XII. Especially if we consider, that they could not then be received as Christians, till they had undergone several examinations. Persons of riper years, who flocked daily into the church during the first three centuries, were obliged to pass through many repeated instructions, and give a strict account of their proficiency, before they were admitted to baptism. And as for those who were born of Christian parents, and had been baptised in their infancy,

they were, with the like care, prepared and disciplined for confirmation, which they could not arrive at, till they were found upon examination to have made a sufficient progress in the knowledge of Christianity.

XIII. We must farther observe, that there was not only in those times this religious conversation among private Christians, but a constant correspondence between the churches that were established by the apostles or their successors, in the several parts of the world. If any new doctrine was started, or any fact reported of our Saviour, a strict inquiry was made among the churches, especially those planted by the apostles themselves, whether they had received any such doctrine, or account of our Saviour, from the mouths of the apostles, or the tradition of those Christians, who had preceded the present members of the churches which were thus consulted. By this means, when any novelty was published, it was immediately detected and censured.

XIV. St. John, who lived so many years after our Saviour, was appealed to in these emergencies as the living oracle of the church ; and as his oral testimony lasted the first century, many have observed that, by a particular providence of God, several of our Saviour's disciples, and of the early converts of his religion, lived to a very great age, that they might personally convey the truth of the gospel to those times which were very remote from the first publication of it. Of these, besides St. John, we have a remarkable instance in Simeon, who was one of the seventy sent forth by our Saviour to publish the gospel before his crucifixion, and a near kinsman of the Lord. This venerable person, who had pro-

bably heard with his own ears our Saviour's prophecy of the destruction of Jerusalem, presided over the church established in that city, during the time of its memorable siege, and drew his congregation out of those dreadful and unparalleled calamities which befel his countrymen, by following the advice our Saviour had given, when they should see Jerusalem encompassed with armies, and the Roman standards, or abomination of desolation, set up. He lived till the year of our Lord 107, when he was martyred under the emperor Trajan.

SECTION VI.

- I. The tradition of the apostles secured by other excellent institutions, II. But chiefly by the writings of the Evangelists. III. The diligence of the disciples and first Christian converts, to send abroad these writings. IV. That the written account of our Saviour was the same with that delivered by tradition: V. Proved from the reception of the gospel by those churches which were established before it was written. VI. From the uniformity of what was believed in the several churches. VII. From a remarkable passage in Irenæus. VIII. Records which are now lost, of use to the first three centuries, for confirming the history of our Saviour. IX. Instances of such records.

THUS far we see how the learned pagans might apprise themselves from oral information of the particulars of our Saviour's history. They could hear, in every church planted in every distant part of the earth, the account which was there received and preserved among them, of the history of our Saviour. They could learn the names and characters of those first missionaries that brought to them these accounts, and the miracles by which God Almighty attested their reports. But the apostles and disciples of Christ, to preserve the history of his life, and to secure their accounts of him from error and oblivion, did not only set aside certain persons for that purpose, as has been already shown, but appropriated certain days to the commemoration of those facts which they had related concerning him. The first day of the week was, in all its returns, a perpetual memorial of his resurrection, as the devotional exercises adapted to Friday and Saturday, were to denote to all ages that he was crucified on the one of

those days, and that he rested in the grave on the other. You may apply the same remark to several of the annual festivals instituted by the apostles themselves, or, at farthest, by their immediate successors, in memory of the most important particulars in our Saviour's history; to which we must add, the sacraments instituted by our Lord himself, and many of those rites and ceremonies which obtained in the most early times of the church. These are to be regarded as standing marks of such facts as were delivered by those who were eyewitnesses to them, and which were contrived with great wisdom to last till time should be no more. These, without any other means, might have, in some measure, conveyed to posterity the memory of several transactions in the history of our Saviour, as they were related by his disciples. At least, the reason of these institutions, though they might be forgotten, and obscured by a long course of years, could not but be very well known by those who lived in the first three centuries, and a means of informing the inquisitive pagans in the truth of our Saviour's history, that being the view in which I am to consider them.

II. But lest such a tradition, though guarded by so many expedients, should wear out by the length of time, the four Evangelists, within about fifty, or as Theodoret affirms, thirty years after our Saviour's death, while the memory of his actions was fresh among them, consigned to writing that history, which for some years had been published only by the mouths of apostles and disciples. The farther consideration of these holy penmen will fall under another part of this discourse.

III. It will be sufficient to observe here, that in the age which succeeded the apostles, many of their

immediate disciples sent, or carried in person, the books of the four Evangelists, which had been written by apostles, or at least approved by them, to most of the churches which they had planted in the different parts of the world. This was done with so much diligence, that when Pantænus, a man of learning and piety, had travelled into India for the propagation of Christianity, about the year of our Lord 200, he found among that remote people the gospel of St. Matthew, which, upon his return from that country, he brought with him to Alexandria. This gospel is generally supposed to have been left in those parts by St. Bartholomew, the apostle of the Indies, who probably carried it with him before the writings of the three other Evangelists were published.

IV. That the history of our Saviour, as recorded by the Evangelists, was the same with that which had been before delivered by the apostles and disciples, will farther appear in the prosecution of this discourse, and may be gathered from the following considerations.

V. Had these writings differed from the sermons of the first planters of Christianity, either in history or doctrine, there is no question but they would have been rejected by those churches which they had already formed. But so consistent and uniform was the relation of the apostles, that these histories appeared to be nothing else but their tradition and oral attestations made fixt and permanent. Thus was the fame of our Saviour, which in so few years had gone through the whole earth, confirmed and perpetuated by such records as would preserve the traditionary account of him to afterages; and rectify it, if at any time, by passing through several

generations, it might drop any part that was material, or contract anything that was false or fictitious.

VI. Accordingly, we find the same Jesus Christ who was born of a virgin, who had wrought many miracles in Palæstine, who was crucified, rose again, and ascended into heaven; I say, the same Jesus Christ had been preached, and was worshipped, in Germany, France, Spain, and Great Britain, in Parthia, Media, Mesopotamia, Armenia, Phrygia, Asia, and Pamphylia, in Italy, Egypt, Afric, and beyond Cyrene, India, and Persia, and, in short, in all the islands and provinces that are visited by the rising or setting sun: the same account of our Saviour's life and doctrine was delivered by thousands of preachers, and believed in thousands of places, who all, as fast as it could be conveyed to them, received the same account in writing from the four Evangelists.

VII. Irenæus, to this purpose, very aptly remarks, that those barbarous nations, who in his time were not possessed of the written gospels, and had only learned the history of our Saviour from those who had converted them to Christianity, before the gospels were written, had among them the same accounts of our Saviour which are to be met with in the four Evangelists. An incontestable proof of the harmony and concurrence between the holy Scripture and the tradition of the churches in those early times of Christianity.

VIII. Thus we see what opportunities the learned and inquisitive heathens had of informing themselves of the truth of our Saviour's history, during the first three centuries, especially as they lay nearer one than another to the fountain-head: besides which, there were many uncontroverted traditions, records

of Christianity, and particular histories, that then threw light into these matters, but are now entirely lost, by which, at that time, any appearance of contradiction, or seeming difficulties in the history of the Evangelists, were fully cleared up and explained: though we meet with fewer appearances of this nature in the history of our Saviour, as related by the four Evangelists, than in the accounts of any other person, published by such a number of different historians, who lived at so great a distance from the present age.

IX. Among those records which are lost, and were of great use to the primitive Christians, is the letter to Tiberius, which I have already mentioned; that of Marcus Aurelius, which I shall take notice of hereafter; the writings of Hegisippus, who had drawn down the history of Christianity to his own time, which was not beyond the middle of the second century; the genuine Sibylline oracles, which in the first ages of the church were easily distinguished from the spurious; the records preserved in particular churches, with many others of the same nature.

SECTION VII.

- I. The sight of miracles in those ages a farther confirmation of pagan philosophers in the Christian faith. II. The credibility of such miracles. III. A particular instance. IV. Martyrdom, *why considered as a standing miracle.* V. Primitive Christians thought many of the martyrs were supported by a miraculous power. VI. Proved from the nature of their sufferings. VII. How martyrs farther induced the pagans to embrace Christianity.

THERE were other means, which I find had a great influence on the learned of the first three centuries, to create and confirm in them the belief of our blessed Saviour's history, which ought not to be passed over in silence. The first was, the opportunity they enjoyed of examining those miracles, which were on several occasions performed by Christians, and appeared in the church, more or less, during these first ages of Christianity. These had great weight with the men I am now speaking of, who, from learned pagans, became fathers of the church; for they frequently boast of them in their writings, as attestations given by God himself to the truth of their religion.

II. At the same time that these learned men declare how disingenuous, base, and wicked it would be, how much beneath the dignity of philosophy, and contrary to the precepts of Christianity, to utter falsehoods or forgeries in the support of a cause, though never so just in itself, they confidently assert this miraculous power, which then subsisted in the church, nay, tell us that they themselves had been eyewitnesses of it at several times, and in several

instances ; nay, appeal to the heathens themselves for the truth of several facts they relate ; nay, challenge them to be present at their assemblies, and satisfy themselves, if they doubt of it ; nay, we find that pagan authors have in some instances confessed this miraculous power.

III. The letter of Marcus Aurelius, whose army was preserved by a refreshing shower, at the same time that his enemies were discomfited by a storm of lightning, and which the heathen historians themselves allow to have been supernatural, and the effect of magic : I say, this letter, which ascribed this unexpected assistance to the prayers of the Christians, who then served in the army, would have been thought an unquestionable testimony of the miraculous power I am speaking of, had it been still preserved. It is sufficient for me in this place to take notice, that this was one of those miracles which had its influence on the learned converts, because it is related by Tertullian, and the very letter appealed to. When these learned men saw sickness and frenzy cured, the dead raised, the oracles put to silence, the demons and evil spirits forced to confess themselves no gods, by persons who only made use of prayer and adjurations in the name of their crucified Saviour ; how could they doubt of their Saviour's power on the like occasions, as represented to them by the traditions of the church, and the writings of the Evangelists ?

IV. Under this head, I cannot omit that which appears to me a standing miracle in the first three centuries. I mean that amazing and supernatural courage or patience, which was shown by innumerable multitudes of martyrs, in those slow and painful torments that were inflicted on them. I

cannot conceive a man placed in the burning iron chair at Lyons, amid the insults and mockeries of a crowded amphitheatre, and still keeping his seat; or stretched upon a grate of iron, over coals of fire, and breathing out his soul among the exquisite sufferings of such a tedious execution, rather than renounce his religion, or blaspheme his Saviour. Such trials seem to me above the strength of human nature, and able to overbear duty, reason, faith, conviction, nay, and the most absolute certainty of a future state. Humanity, unassisted in an extraordinary manner, must have shaken off the present pressure, and have delivered itself out of such a dreadful distress, by any means that could have been suggested to it. We can easily imagine, that many persons, in so good a cause, might have laid down their lives at the gibbet, the stake, or the block: but to expire leisurely among the most exquisite tortures, when they might come out of them, even by a mental reservation, or an hypocrisy which was not without a possibility of being followed by repentance and forgiveness, has something in it so far beyond the force and natural strength of mortals, that one cannot but think there was some miraculous power to support the sufferer.

V. We find the church of Smyrna, in that admirable letter which gives an account of the death of Polycarp their beloved bishop, mentioning the cruel torments of other early martyrs for Christianity, are of opinion, that our Saviour stood by them in a vision, and personally conversed with them, to give them strength and comfort during the bitterness of their long-continued agonies; and we have the story of a young man, who, having suffered many tortures, escaped with life, and told his fellow

Christians, that the pain of them had been rendered tolerable, by the presence of an angel who stood by him, and wiped off the tears and sweat which ran down his face whilst he lay under his sufferings. We are assured at least that the first martyr for Christianity was encouraged in his last moments, by a vision of that divine person for whom he suffered, and into whose presence he was then hastening.

VI. Let any man calmly lay his hand upon his heart, and after reading these terrible conflicts in which the ancient martyrs and confessors were engaged, when they passed through such new inventions and varieties of pain, as tired their tormentors; and ask himself, however zealous and sincere he is in his religion, whether, under such acute and lingering tortures, he could still have held fast his integrity, and have professed his faith to the last, without a supernatural assistance of some kind or other. For my part, when I consider that it was not an unaccountable obstinacy in a single man, or in any particular set of men, in some extraordinary juncture; but that there were multitudes of each sex, of every age, of different countries and conditions, who for near three hundred years together made this glorious confession of their faith, in the midst of tortures, and in the hour of death; I must conclude, that they were either of another make than men are at present, or that they had such miraculous supports as were peculiar to those times of Christianity, when without them perhaps the very name of it might have been extinguished.

VII. It is certain, that the deaths and sufferings of the primitive Christians had a great share in the conversion of those learned pagans, who lived in the ages of persecution, which, with some intervals and

abatements lasted near three hundred years after our Saviour. Justin Martyr, Tertullian, Lactantius, Arnobius, and others, tell us, that this first of all alarmed their curiosity, roused their attention, and made them seriously inquisitive into the nature of that religion, which could endue the mind with so much strength, and overcome the fear of death, nay, raise an earnest desire of it, though it appeared in all its terrors. This they found had not been effected by all the doctrines of those philosophers, whom they had thoroughly studied, and who had been labouring at this great point. The sight of these dying and tormented martyrs, engaged them to search into the history and doctrines of him for whom they suffered. The more they searched, the more they were convinced ; till their conviction grew so strong, that they themselves embraced the same truths, and either actually laid down their lives, or were always in a readiness to do it, rather than depart from them.

SECTION VIII.

- I. The completion of our Saviour's prophecies confirmed pagans in their belief of the gospel. II. Origen's observation on that of his disciples being brought before kings and governors. III. On their being persecuted for their religion, IV. On their preaching the gospel to all nations, V. On the destruction of Jerusalem, and ruin of the Jewish economy. VI. These arguments strengthened by what has happened since Origen's time.

THE second of those extraordinary means, of great use to the learned and inquisitive pagans of the first three centuries, for evincing the truth of the history of our Saviour, was the completion of such prophecies as are recorded of him in the Evangelists. They could not, indeed, form any arguments from what he foretold, and was fulfilled during his life, because both the prophecy and the completion were over before they were published by the Evangelists; though, as Origen observes, what end could there be in forging some of these predictions, as that of St. Peter's denying his master, and all his disciples forsaking him in the greatest extremity, which reflects so much shame on the great apostle, and on all his companions? Nothing but a strict adherence to truth, and to matters of fact, could have prompted the Evangelists to relate a circumstance so disadvantageous to their own reputation; as that father has well observed.

II. But to pursue his reflections on this subject. There are predictions of our Saviour recorded by the Evangelists, which were not completed till after their deaths, and had no likelihood of being so, when they were pronounced by our blessed Saviour.

Such was that wonderful notice he gave them, that "they should be brought before governors and kings for his sake, for a testimony against them and the Gentiles," Matth. x. 28. with the other like prophecies, by which he foretold that his disciples were to be persecuted. "Is there any other doctrine in the world," says this father, "whose followers are punished? Can the enemies of Christ say, that he knew his opinions were false and impious, and that therefore he might well conjecture and foretel what would be the treatment of those persons who should embrace them? Supposing his doctrines were really such, why should this be the consequence? What likelihood that men should be brought before kings and governors for opinions and tenets of any kind, when this never happened even to the Epicureans, who absolutely denied a Providence; nor to the Peripatetics themselves, who laughed at the prayers and sacrifices which were made to the Divinity? Are there any but the Christians, who, according to this prediction of our Saviour, being brought before kings and governors for his sake, are pressed to their latest gasp of breath, by their respective judges, to renounce Christianity, and to procure their liberty and rest, by offering the same sacrifices, and taking the same oaths that others did?"

III. Consider the time when our Saviour pronounced those words, Matth. x. 32. "Whosoever shall confess me before men, him will I confess also before my Father which is in heaven: but whosoever shall deny me before men, him will I also deny before my Father which is in heaven." Had you heard him speak after this manner, when as yet his disciples were under no such trials, you would certainly have said within yourself, if these speeches of

Jesus are true, and if, according to his prediction, governors and kings undertake to ruin and destroy those who shall profess themselves his disciples, we will believe, not only that he is a prophet, but that he has received power from God sufficient to preserve and propagate his religion; and that he would never talk in such a peremptory and discouraging manner, were he not assured that he was able to subdue the most powerful opposition that could be made against the faith and doctrine which he taught.

IV. Who is not struck with admiration, when he represents to himself our Saviour at that time foretelling, that his gospel should be preached in all the world, for a witness unto all nations, or, as Origen (who rather quotes the sense than the words), to serve for a conviction to kings and people, when at the same time he finds that his gospel has accordingly been preached to Greeks and barbarians, to the learned and to the ignorant, and that there is no quality or condition of life able to exempt men from submitting to the doctrine of Christ. "As for us," says this great author, in another part of his book against Celsus, "when we see every day those events exactly accomplished which our Saviour foretold at so great a distance: that ^{his} his gospel is preached in all the world,' Matth. xxiv. 14. 'That his disciples go and teach all nations,' Matth. xxviii. 19. 'And that those who have received his doctrine are brought for his sake before governors, and before kings,' Matth. x. 18. we are filled with admiration, and our faith in him is confirmed more and more. What clearer and stronger proofs can Celsus ask for the truth of what he spoke?"

V. Origen insists likewise with great strength on

that wonderful prediction of our Saviour, concerning the destruction of Jerusalem, pronounced at a time, as he observes, when there was no likelihood nor appearance of it. This has been taken notice of and inculcated by so many others, that I shall refer you to what this father has said on the subject in the first book against Celsus. And as to the accomplishment of this remarkable prophecy, shall only observe, that whoever reads the account given us by Josephus, without knowing his character, and compares it with what our Saviour foretold, would think the historian had been a Christian, and that he had nothing else in view but to adjust the event to the prediction.

VI. I cannot quit this head without taking notice, that Origen would still have triumphed more in the foregoing arguments, had he lived an age longer, to have seen the Roman emperors, and all their governors and provinces, submitting themselves to the Christian religion, and glorying in its profession, as so many kings and sovereigns still place their relation to Christ at the head of their titles.

How much greater confirmation of his faith would he have received, had he seen our Saviour's prophecy stand good in the destruction of the temple, and the dissolution of the Jewish economy, when Jews and pagans united all their endeavours under Julian the apostate, to baffle and falsify the prediction? The great preparations that were made for rebuilding the temple, with the hurricane, earthquake, and eruptions of fire that destroyed the work, and terrified those employed in the attempt from proceeding in it, are related by many historians of the same age, and the substance of the story testified both by pagan and Jewish writers, as

Ammianus Marcellinus and Zamath David. The learned Chrysostom, in a sermon against the Jews, tells them this fact was then fresh in the memories even of their young men, that it happened but twenty years ago, and that it was attested by all the inhabitants of Jerusalem, where they might still see the marks of it in the rubbish of that work, from which the Jews desisted in so great a fright, and which even Julian had not the courage to carry on. This fact, which is in itself so miraculous, and so indisputable, brought over many of the Jews to Christianity; and shows us, that after our Saviour's prophecy against it, the temple could not be preserved from the plough passing over it, by all the care of Titus, who would fain have prevented its destruction; and that instead of being reedified by Julian, all his endeavours towards it did but still more literally accomplish our Saviour's prediction, that "not one stone should be left upon another."

The ancient Christians were so entirely persuaded of the force of our Saviour's prophecies, and of the punishment which the Jews had drawn upon themselves and upon their children, for the treatment which the Messiah had received at their hands, that they did not doubt but they would always remain an abandoned and dispersed people, a hissing and an astonishment among the nations, as they are to this day. In short, that they had lost their peculiarity of being God's people, which was now transferred to the body of Christians, and which preserved the church of Christ among all the conflicts, difficulties, and persecutions in which it was engaged, as it had preserved the Jewish government and economy for so many ages, whilst it had the same truth and vital principle in it, notwithstanding it was so frequently

in danger of being utterly abolished and destroyed. Origen, in his fourth book against Celsus, mentioning their being cast out of Jerusalem, the place to which their worship was annexed, deprived of their temple and sacrifice, their religious rites and solemnities, and scattered over the face of the earth, ventures to assure them with a face of confidence, that they would never be reestablished, since they had committed that horrid crime against the Saviour of the world. This was a bold assertion in the good man, who knew how this people had been so wonderfully reestablished in former times, when they were almost swallowed up, and in the most desperate state of desolation, as in their deliverance out of the Babylonish captivity, and the oppressions of Antiochus Epiphanes. Nay, he knew that within less than a hundred years before his own time, the Jews had made such a powerful effort for their reestablishment under Barcohab, in the reign of Adrian, as shook the whole Roman empire. But he founded his opinion on a sure word of prophecy, and on the punishment they had so justly incurred; and we find, by a long experience of fifteen hundred years, that he was not mistaken, nay, that his opinion gathers strength daily, since the Jews are now at a greater distance from any probability of such a reestablishment, than they were when Origen wrote.

SECTION IX.

- I. The lives of primitive Christians, another means of bringing learned pagans into their religion. II. The change and reformation of their manners. III. This looked upon as supernatural by the learned pagans; IV. And strengthened the accounts given of our Saviour's life and history. V. The Jewish prophecies of our Saviour, an argument for the heathens' belief: VI. Pursued: VII. Pursued.

THERE was one other means enjoyed by the learned pagans of the first three centuries, for satisfying them in the truth of our Saviour's history, which I might have flung under one of the foregoing heads; but as it is so shining a particular, and does so much honour to our religion, I shall make a distinct article of it, and only consider it with regard to the subject I am upon: I mean the lives and manners of those holy men, who believed in Christ during the first ages of Christianity. I should be thought to advance a paradox, should I affirm that there were more Christians in the world during those times of persecution, than there are at present in these, which we call the flourishing times of Christianity. But this will be found an indisputable truth, if we form our calculation upon the opinions which prevailed in those days, that every one who lives in the habitual practice of any voluntary sin, actually cuts himself off from the benefits and profession of Christianity, and, whatever he may call himself, is in reality no Christian, nor ought to be esteemed as such.

II. In the times we are now surveying, the Christian religion showed its full force and efficacy

on the minds of men, and by many examples demonstrated what great and generous souls it was capable of producing. It exalted and refined its proselytes to a very high degree of perfection, and set them far above the pleasures, and even the pains of this life. It strengthened the infirmity, and broke the fierceness of human nature. It lifted up the minds of the ignorant to the knowledge and worship of him that made them, and inspired the vicious with a rational devotion, a strict purity of heart, and an unbounded love to their fellow-creatures. In proportion as it spread through the world, it seemed to change mankind into another species of beings. No sooner was a convert initiated into it, but by an easy figure he became a new man, and both acted and looked upon himself as one regenerated and born a second time into another state of existence.

III. It is not my business to be more particular in the accounts of primitive Christianity, which have been exhibited so well by others, but rather to observe, that the pagan converts, of whom I am now speaking, mention this great reformation of those who had been the greatest sinners, with that sudden and surprising change which it made in the lives of the most profligate, as having something in it supernatural, miraculous, and more than human. Origen represents this power in the Christian religion as no less wonderful than that of curing the lame and blind, or cleansing the leper. Many others represent it in the same light, and looked upon it as an argument that there was a certain divinity in that religion, which showed itself in such strange and glorious effects.

IV. This therefore was a great means not only of

recommending Christianity to honest and learned heathens, but of confirming them in the belief of our Saviour's history, when they saw multitudes of virtuous men daily forming themselves upon his example, animated by his precepts, and actuated by that Spirit which he had promised to send among his disciples.

V. But I find no argument made a stronger impression on the minds of these eminent pagan converts, for strengthening their faith in the history of our Saviour, than the predictions relating to him in those old prophetic writings, which were deposited among the hands of the greatest enemies to Christianity, and owned by them to have been extant many ages before his appearance. The learned heathen converts were astonished to see the whole history of their Saviour's life published before he was born, and to find that the Evangelists and Prophets, in their accounts of the Messiah, differed only in point of time, the one foretelling what should happen to him, and the other describing those very particulars as what had actually happened. This our Saviour himself was pleased to make use of as the strongest argument of his being the promised Messiah, and without it would hardly have reconciled his disciples to the ignominy of his death, as in that remarkable passage which mentions his conversation with the two disciples, on the day of his resurrection, St. Luke, xxiv. 13. to the end.

VI. The heathen converts, after having travelled through all human learning, and fortified their minds with the knowledge of arts and sciences, were particularly qualified to examine these prophecies with great care and impartiality, and without prejudice or

prepossession. If the Jews on the one side put an unnatural interpretation on these prophecies, to evade the force of them in their controversies with the Christians; or if the Christians on the other side overstrained several passages in their applications of them, as it often happens among men of the best understanding, when their minds are heated with any consideration that bears a more than ordinary weight with it; the learned heathens may be looked upon as neuters in the matter, when all these prophecies were new to them, and their education had left the interpretation of them free and indifferent. Besides, these learned men among the primitive Christians knew how the Jews, who had preceded our Saviour, interpreted these predictions, and the several marks by which they acknowledged the Messiah would be discovered, and how those of the Jewish doctors who succeeded him, had deviated from the interpretations and doctrines of their forefathers, on purpose to stifle their own conviction.

VII. This set of arguments had therefore an invincible force with those pagan philosophers who became Christians, as we find in most of their writings. They could not disbelieve our Saviour's history, which so exactly agreed with everything that had been written of him many ages before his birth, nor doubt of those circumstances being fulfilled in him, which could not be true of any person that lived in the world besides himself. This wrought the greatest confusion in the unbelieving Jews, and the greatest conviction in the Gentiles, who everywhere speak with astonishment of these truths they met with in this new magazine of

learning which was opened to them, and carry the point so far as to think whatever excellent doctrine they had met with among pagan writers, had been stole from their conversation with the Jews, or from the perusal of these writings which they had in their custody.

DIALOGUES
UPON
THE USEFULNESS OF
ANCIENT MEDALS.
ESPECIALLY IN RELATION TO
THE LATIN AND GREEK POETS.

———— quoniam hæc ratio plerumque videtur
Tristior esse, quibus non est tractata, retroque
Vulgus abhorret ab hac, volui tibi suaviloquenti
Carmine Piccio rationem exponere nostram,
Et quasi Musæo dulci contingere melle,
Si tibi forte animum tali ratione tenere.

LUCRETIIUS, lib. iv.

VERSES

OCCASIONED BY

MR. ADDISON'S TREATISE ON MEDALS.

SEE the wild waste of all-devouring years !
How Rome her own sad sepulchre appears :
With nodding arches, broken temples spread !
The very tombs now vanish'd like their dead !
Some felt the silent stroke of mould'ring age ;
Some, hostile fury ; some, religious rage :
Barbarian blindness, Christian zeal conspire,
And papal piety, and Gothic fire.
Perhaps by its own ruins sav'd from flame,
Some buried marble half preserves a name ;
That name, the learn'd with fierce disputes pursue,
And give to Titus old Vespasian's due.

Ambition sigh'd. She found it vain to trust
The faithless column, and the crumbling bust ;
Huge moles whose shadow stretch'd from shore to shore,
Their ruins perish'd, and their place no more !
Convinc'd, she now contracts her vast design ;
And all her triumphs sink into a coin.
A narrow orb each crowded conquest keeps :
Beneath her palm here sad Judæa weeps ;

Now scantier limits the proud arch confine,
And scarce are seen the prostrate Nile and Rhine :
A small Euphrates through the piece is roll'd ;
And little eagles wave their wings in gold.

The medal, faithful to its charge of fame,
Through climes and ages bears each form and name :
In one short view, subjected to our eye,
Gods, emp'rors, heroes, sages, beauties lie.
With sharpen'd sight pale antiquaries pore,
Th' inscription value, but the rust adore :
This, the blue varnish, that, the green endears,
The sacred rust of twice ten hundred years.
To gain Pescennius one employs his schemes ;
One grasps a Cecrops in ecstatic dreams :
Poor Vadius, long with learned spleen devour'd,
Can taste no pleasure since his shield was scour'd ;
And Curio, restless by the fair one's side,
Sighs for an Otho, and neglects his bride.

Theirs is the vanity, the learning thine,
Touch'd by thy hand, again Rome's glories shine :
Her gods, and godlike heroes rise to view,
And all her faded garlands bloom anew.
Nor blush, these studies thy regard engage :
These pleas'd the fathers of poetic rage ;
The verse and sculpture bore an equal part,
And art reflected images to art.

Oh when shall Britain, conscious of her claim,
Stand emulous of Greek and Roman fame ?
In living medals see her wars enroll'd,
And vanquish'd realms supply recording gold ?
Here, rising bold, the patriot's honest face ;
There, warriors frowning in historic brass.

Then future ages with delight shall see,
How Plato's, Bacon's, Newton's looks agree :
Or in fair series laurel'd bards be shown,
A Virgil there, and here an Addison.
Then shall thy Craggs (and let me call him mine)
On the cast ore, another Pollio, shine ;
With aspect open shall erect his head,
And round the orb in lasting notes be read :
" Statesman, yet friend to truth ! in soul sincere,
" In action faithful, and in honour clear ;
" Who broke no promise, serv'd no private end,
" Who gain'd no title, and who lost no friend,
" Ennobled by himself, by all approv'd,
" And prais'd, unenvied, by the muse he lov'd."

A. POPE.

DIALOGUES
UPON
THE USEFULNESS OF
ANCIENT MEDALS.

DIALOGUE I.

CYNTHIO, Eugenius, and Philander had retired together from the town to a country village, that lies upon the Thames. Their design was to pass away the heat of the summer among the fresh breezes that rise from the river, and the agreeable mixture of shades and fountains, in which the whole country naturally abounds. They were all three very well versed in the politer parts of learning, and had travelled into the most refined nations of Europe: so that they were capable of entertaining themselves on a thousand different subjects, without running into the common topics of defaming public parties, or particular persons. As they were intimate friends they took the freedom to dissent from one another in discourse, or upon occasion to speak a Latin sentence without fearing the imputation of pedantry or ill-breeding.

They were one evening taking a walk together in the fields, when their discourse accidentally fell upon several unprofitable parts of learning. It was Cynthia's humour to run down everything that was rather for ostentation than use. He was still preferring good sense to arts and sciences, and often took a pleasure to appear ignorant, that he might the better turn to ridicule those that valued themselves on their books and studies, though at the same time one might very well see that he could not have attacked many parts of learning so successfully, had not he borrowed his assistances from them. After having rallied a set or two of virtuosos, he fell upon the medallists.

These gentlemen, says he, value themselves upon being critics in rust, and will undertake to tell you the different ages of it by its colour. They are possessed with a kind of learned avarice, and are for getting together hoards of such money only as was current among the Greeks and Latins. There are several of them that are better acquainted with the faces of the Antonines than of the Stuarts, and would rather choose to count out a sum in sesterces than in pounds sterling. I have heard of one in Italy that used to swear by the head of Otho. Nothing can be pleasanter than to see a circle of these virtuosos about a cabinet of medals, descanting upon the value, rarity, and authenticalness of the several pieces that lie before them. One takes up a coin of gold, and after having well weighed the figures and inscription, tells you very gravely, if it were brass it would be invaluable. Another falls a ringing a Pescennius Niger, and judiciously distinguishes the sound of it to be modern. A third desires you to observe well the toga on such a re-

verse, and asks you whether you can in conscience believe the sleeve of it to be of the true Roman cut.

I must confess, says Philander, the knowledge of medals has most of those disadvantages that can render a science ridiculous, to such as are not well versed in it. Nothing is more easy than to represent as impertinences any parts of learning that have no immediate relation to the happiness or convenience of mankind. When a man spends his whole life among the stars and planets, or lays out a twelvemonth on the spots in the sun, however noble his speculations may be, they are very apt to fall into burlesque. But it is still more natural to laugh at such studies as are employed on low and vulgar objects. What curious observations have been made on spiders, lobsters, and cockle-shells! yet the very naming of them is almost sufficient to turn them into raillery. It is no wonder, therefore, that the science of medals, which is charged with so many unconcerning parts of knowledge, and built on such mean materials, should appear ridiculous to those that have not taken the pains to examine it.

Eugenius was very attentive to what Philander said on the subject of medals. He was one that endeavoured rather to be agreeable than shining in conversation, for which reason he was more beloved, though not so much admired as Cynthio. I must confess, says he, I find myself very much inclined to speak against a sort of study that I know nothing of. I have, however, one strong prejudice in favour of it, that Philander has thought it worth his while to employ some time upon it. I am glad then, says Cynthio, that I have thrown him on a science of which I have long wished to hear the usefulness. There, says Philander, you must excuse me. At

present you do not know but it may have its usefulness. But should I endeavour to convince you of it, I might fail in my attempt, and so render my science still more contemptible. On the contrary, says Cynthio, we are already so persuaded of the unprofitableness of your science, that you can but leave us where you find us, but if you succeed you increase the number of your party. Well, says Philander, in hopes of making two such considerable proselytes, I am very well content to talk away an evening with you on the subject ; but on this condition, that you will communicate your thoughts to me freely when you dissent from me, or have any difficulties that you think me capable of removing. To make use of the liberty you give us, says Eugenius, I must tell you what I believe surprises all beginners as well as myself. We are apt to think your medallists a little fantastical in the different prices they set upon their coins, without any regard to the ancient value or the metal of which they are composed. A silver medal, for example, shall be more esteemed than a gold one, and a piece of brass than either. To answer you, says Philander, in the language of a medallist, you are not to look upon a cabinet of medals as a treasure of money, but of knowledge, nor must you fancy any charms in gold, but in the figures and inscriptions that adorn it. The intrinsic value of an old coin does not consist in its metal but its erudition. It is the device that has raised the species, so that at present an *as* or an *obolus* may carry a higher price than a *denarius* or a *drachma* ; and a piece of money that was not worth a penny fifteen hundred years ago, may be now rated at fifty crowns, or perhaps a hundred guineas. I find, says Cynthio, that to have a relish

for ancient coins it is necessary to have a contempt of the modern. But I am afraid you will never be able, with all your medallie eloquence, to persuade Eugenius and myself that it is better to have a pocket full of Othos and Gordians than of Jacobuses or Louis-d'ors. This, however, we shall be judges of, when you have let us know the several uses of old coins.

The first and most obvious one, says Philander, is the showing us the faces of all the great persons of antiquity. A cabinet of medals is a collection of pictures in miniature. Juvenal calls them, very humorously,

Concisum argentum in titulos, faciesque minutas.

SAR. 5.

You here see the Alexanders, Cæsars, Pompeys, Trajans, and the whole catalogue of heroes, who have many of them so distinguished themselves from the rest of mankind, that we almost look upon them as another species. It is an agreeable amusement to compare in our own thoughts the face of a great man with the character that authors have given us of him, and to try if we can find out in his looks and features, either the laughty, cruel, or merciful temper that discovers itself in the history of his actions. We find too on medals the representations of ladies that have given occasion to whole volumes on the account only of a face. We have here the pleasure to examine their looks and dresses, and to survey at leisure those beauties that have sometimes been the happiness or misery of whole kingdoms: nor do you only meet the faces of such as are famous in history, but of several whose names are not to be found anywhere except on medals. Some of the emperors, for example, have had wives, and some of

them children, that no authors have mentioned. We are therefore obliged to the study of coins for having made new discoveries to the learned, and given them information of such persons as are to be met with on no other kind of records. You must give me leave, says Cynthio, to reject this last use of medals. I do not think it worth while to trouble myself with a person's name or face that receives all his reputation from the mint, and would never have been known in the world had there not been such things as medals. A man's memory finds sufficient employment on such as have really signalized themselves by their great actions, without charging itself with the names of an insignificant people, whose whole history is written on the edges of an old coin.

If you are only for such persons as have made a noise in the world, says Philander, you have on medals a long list of heathen deities, distinguished from each other by their proper titles and ornaments. You see the copies of several statues that have had *the politest nations of the world fall down before* them. You have here too several persons of a more thin and shadowy nature, as Hope, Constancy, Fidelity, Abundance, Honour, Virtue, Eternity, Justice, Moderation, Happiness, and, in short, a whole creation of the like imaginary substances. To these you may add the genii of nations, provinces, cities, highways, and the like allegorical beings. In devices of this nature one sees a pretty poetical invention, and may often find as much thought on the reverse of a medal as in a canto of Spenser. Not to interrupt you, says Eugenius, I fancy it is this use of medals that has recommended them to several history painters, who perhaps, without this assistance, would have found it very difficult to have invented

such an airy species of beings, when they are obliged to put a moral virtue into colours, or to find out a proper dress for a passion. It is doubtless for this reason, says Philander, that painters have not a little contributed to bring the study of medals in vogue. For not to mention several others, Caraccio is said to have assisted Aretine by designs that he took from the spintriar of Tiberius. Raphael had thoroughly studied the figures on old coins. Patin tells us that Le Brun had done the same. And it is well known that Rubens had a noble collection of medals in his own possession. But I must not quit this head before I tell you, that you see on medals not only the names and persons of emperors, kings, consuls, proconsuls, pretors, and the like characters of importance, but of some of the poets, and of several who had won the prizes at the Olympic games. It was a noble time, says Cynthio, when trips and Cornish hugs could make a man immortal. How many heroes would Moorfields have furnished out in the days of old? A fellow that can now only win a hat or a belt, had he lived among the Greeks, might have had his face stamped upon their coins. But these were the wise ancients, who had more esteem for a Milo than a Homer, and heaped up greater honours on Pindar's jockeys, than on the poet himself. But by this time I suppose you have drawn up all your medallic people, and, indeed, they make a much more formidable body than I could have imagined. You have shown us all conditions, sexes, and ages, emperors and empresses, men and children, gods and wrestlers. Nay, you have conjured up persons that exist nowhere else but on old coins, and have made our passions, and virtues, and vices visible. I could never have thought that a cabinet of

medals had been so well peopled. But in the next place, says Philander, as we see on coins the different faces of persons, we see on them too their different habits and dresses, according to the mode that prevailed in the several ages when the medals were stamped. This is another use, says Cynthio, that in my opinion contributes rather to make a man learned than wise, and is neither capable of pleasing the understanding nor imagination. I know there are several supercilious critics that will treat an author with the greatest contempt imaginable, if he fancies the old Romans wore a girdle, and are amazed at a man's ignorance, who believes the toga had any sleeves to it till the declension of the Roman empire. Now I would fain know the great importance of this kind of learning, and why it should not be as noble a task to write upon a bib and hanging sleeves as on the bulla and prætexta. The reason is, that we are familiar with the names of the one, and meet with the other nowhere but in learned authors. An antiquary will scorn to mention a pinner or a night-rail, a petticoat or a manteau ; but will talk as gravely as a father of the church on the vitta and peplus, the stola and iustita. How would an old Roman laugh, were it possible for him to see the solemn dissertations that have been made on these weighty subjects ! To set them in their natural light, let us fancy, if you please, that about a thousand years hence, some profound author shall write a learned treatise on the habits of the present age, distinguished into the following titles and chapters :

Of the old British Trowser.

Of the Ruff and Collar-band.

The Opinion of Several Learned Men concerning the Use of the Shoulder-knot.

Such-a-one mistaken in his Account of the Sur-tout, etc.

I must confess, says Eugenius, interrupting him, the knowledge of these affairs is in itself very little improving, but as it is impossible without it to understand several parts of your ancient authors, it certainly has its use. It is pity, indeed, there is not a nearer way of coming at it. I have sometimes fancied it would not be an impertinent design to make a kind of an old Roman wardrobe, where you should see togas and tunicas, the chlamys and trabeca, and in short all the different vests and ornaments that are so often mentioned in the Greek and Roman authors. By this means a man would comprehend better and remember much longer the shape of an ancient garment, than he possibly can from the help of tedious quotations and descriptions. The design, says Philander, might be very useful, but after what models would you work? Sigonius, for example, will tell you, that the *vestis trabeata* was of such a particular fashion, Scaliger is for another, and Dacier thinks them both in the wrong. These are, says Cynthio, I suppose, the names of three Roman tailors; for is it possible men of learning can have any disputes of this nature? May we not as well believe, that hereafter the whole learned world will be divided upon the make of a modern pair of breeches? And yet, says Eugenius, the erities have fallen as foul upon each other for matters of the same moment. But as to this point, where the make of the garment is controverted, let them, if they can find cloth enough, work after all the most probable fashions. To enlarge the design, I would have another room for the old Roman instruments of war, where you might see the pilum and

the shield, the eagles, ensigns, helmets, battering-rams, and trophies; in a word, all the ancient military furniture in the same manner as it might have been in an arsenal of old Rome. A third apartment should be a kind of sacristy for altars, idols, sacrificing instruments, and other religious utensils. Not to be tedious, one might make a magazine for all sorts of antiquities, that would show a man in an afternoon more than he could learn out of books in a twelvemonth. This would cut short the whole study of antiquities, and perhaps be much more useful to universities than those collections of whalebone and crocodile-skins in which they commonly abound. You will find it very difficult, says Cynthio, to persuade those societies of learned men to fall in with your project. They will tell you that things of this importance must not be taken on trust; you ought to learn them among the classic authors and at the fountain-head. Pray consider what a figure a man would make in the republic of letters, should he appeal to your university wardrobe, when they expect a sentence out of the *Re Vestiaria*? or how do you think a man that has read Vegetius will relish your Roman arsenal? In the mean time, says Philander, you find on medals everything that you could meet with in your magazine of antiquities, and when you have built your arsenals, wardrobes, and sacristies, it is from medals that you must fetch their furniture. It is here too that you see the figures of several instruments of music, mathematics, and mechanics. One might make an entire galley out of the plans that are to be met with on the reverses of several old coins. Nor are they only charged with things, but with many ancient customs, as sacrifices, triumphs, congiaries, allocutions, decursions, lecti-

sterniums, and a thousand other antiquated names and ceremonies that we should not have had so just a notion of, were they not still preserved on coins. I might add under this head of antiquities, that we find on medals the manner of spelling in the old Roman inscriptions. That is, says Cynthio, we find that Felix is never written with an *œ* diphthong, and that in Augustus's days *civis* stood for *cives*, with other secrets in orthography of the same importance.

To come then to a more weighty use, says Philander, it is certain that medals give a very great light to history, in confirming such passages as are true in old authors, in settling such as are told after different manners, and in recording such as have been omitted. In this case a cabinet of medals is a body of history. It was indeed the best way in the world to perpetuate the memory of great actions, thus to coin out the life of an emperor, and to put every great exploit into the mint. It was a kind of printing, before the art was invented. It is by this means that monsieur Vaillant has disembroiled a history that was lost to the world before his time, and out of a short collection of medals has given us a chronicle of the kings of Syria. For this too is an advantage medals have over books, that they tell their story much quicker, and sum up a whole volume in twenty or thirty reverses. They are indeed the best epitomes in the world, and let you see with one cast of an eye the substance of above a hundred pages. Another use of medals is, that they not only show you the actions of an emperor, but at the same time mark out the year in which they were performed. Every exploit has its date set to it. A series of an emperor's coins is his life digested into annals. Historians seldom break their relation with a mixture

of chronology, nor distribute the particulars of an emperor's story into the several years of his reign : or, where they do it, they often differ in their several periods. Here, therefore, it is much safer to quote a medal than an author, for in this case you do not appeal to a Suetonius or a Lampridius, but to the emperor himself, or to the whole body of a Roman senate. Besides that, a coin is in no danger of having its characters altered by copiers and transcribers. This I must confess, says Cynthio, may in some cases be of great moment ; but, considering the subjects on which your chronologers are generally employed, I see but little use that rises from it. For example, what signifies it to the world whether such an elephant appeared in the amphitheatre in the second or the third year of Domitian ? Or what am I the wiser for knowing that Trajan was in the fifth year of his tribuneship when he entertained the people with such a horserace or bull-baiting ? Yet it is the fixing of these great periods that gives a man the first rank in the republic of letters, and recommends him to the world for a person of various reading and profound erudition.

You must always give your men of great reading leave to show their talents on the meanest subjects, says Eugenius ; it is a kind of shooting at rovers : where a man lets fly his arrow without taking any aim, to show his strength. But there is one advantage, says he, turning to Philander, that seems to me very considerable, although your medallists seldom throw it into the account, which is the great help to memory one finds in medals : for my own part I am very much embarrassed in the names and ranks of the several Roman emperors, and find it difficult to recollect upon occasion the different parts of their

history: but your medallists, upon the first naming of an emperor, will immediately tell you his age, family, and life. To remember where he enters in the succession, they only consider in what part of the cabinet he lies; and by running over in their thoughts such a particular drawer, will give you an account of all the remarkable parts of his reign.

I thank you, says Philander, for helping me to a use that, perhaps, I should not have thought on. But there is another of which I am sure you could not but be sensible when you were at Rome. I must own to you it surprised me to see my ciceroni so well acquainted with the busts and statues of all the great people of antiquity. There was not an emperor or empress but he knew by sight; and, as he was seldom without medals in his pocket, he would often show us the same face on an old coin that we saw in the statue. He would discover a Commodus through the disguise of the club and lion's skin, and find out such a one to be Livia that was dressed up like a Ceres. Let a bust be never so disfigured, they have a thousand marks by which to decipher it. They will know a Zenobia by the sitting of her diadem, and will distinguish the Faustinas by their different way of tying up their hair. Oh! sir, says Cynthio, they will go a great deal farther, they will give you the name and titles of a statue that has lost his nose and ears; or, if there is but half a beard remaining, will tell you at first sight who was the owner of it. Now I must confess to you, I used to fancy they imposed upon me an emperor or empress at pleasure, rather than appear ignorant.

All this, however, is easily learnt from medals, says Philander, where you may see likewise the plans of many of the most considerable buildings of old

Rome. There is an ingenious gentleman of our own nation extremely well versed in this study, who has a design of publishing the whole history of architecture, with its several improvements and decays, as it is to be met with on ancient coins. He has assured me that he has observed all the nicety of proportion in the figures of the different orders that compose the buildings on the best preserved medals. You here see the copies of such ports and triumphal arches as there are not the least traces of in the places where they once stood. You have here the models of several ancient temples, though the temples themselves, and the gods that were worshipped in them, are perished many hundred years ago. Or if there are still any foundations or ruins of former edifices, you may learn from coins what was their architecture when they stood whole and entire. These are buildings which the Goths and Vandals could not demolish, that are infinitely more durable than stone or marble, and will perhaps last as long as the earth itself. They are in short so many real monuments of brass.

*Quod non imber edax non aquilo impotens
Possit diruere, aut innumerabilis
Annorum series, et fuga temporum.*

Which eating show'rs, nor north wind's feeble blast,
Nor whirl of time, nor flight of years can waste.

CALPURN.

This is a noble panegyric on an old copper coin, says Cynthio. But I am afraid a little malicious rust would demolish one of your brazen edifices as effectually as a Goth or Vandal. You would laugh at me, says Philander, should I make you a learned dissertation on the nature of rusts: I shall only tell

you there are two or three sorts of them which are extremely beautiful in the eye of an antiquary, and preserve a coin better than the best artificial varnish. As for other kinds, a skilful medallist knows very well how to deal with them. He will recover you a temple or a triumphal arch out of its rubbish, if I may so call it, and, with a few reparations of the graving tool, restore it to its first splendour and magnificence. I have known an emperor quite hid under a crust of dross, who, after two or three days' cleansing, has appeared with all his titles about him, as fresh and beautiful as at his first coming out of the mint. I am sorry, says Eugenius, I did not know this last use of medals when I was at Rome. It might perhaps have given me a greater taste of its antiquities, and have fixed in my memory several of the ruins that I have now forgotten. For my part, says Cynthio, I think there are at Rome enough modern works of architecture to employ any reasonable man. I never could have a taste for old bricks and rubbish, nor would trouble myself about the ruins of Augustus's palace so long as I could see the Vatican, the Borghese, and the Farnese, as they now stand: I must own to you at the same time this is talking like an ignorant man. Were I in other company I would perhaps change my style, and tell them that I would rather see the fragments of Apollo's temple than St. Peter's. I remember when our antiquary at Rome had led us a whole day together from one ruin to another, he at last brought us to the Rotunda; and this, says he, is the most valuable antiquity in Italy, notwithstanding it is so entire.

The same kind of fancy, says Philander, has formerly gained upon several of your medallists, who were for hoarding up such pieces of money only as

had been half consumed by time or rust. There were no coins pleased them more than those which had passed through the hands of an old Roman clipper. I have read an author of this taste that compares a ragged coin to a tattered colour. But to come again to our subject. As we find on medals the plans of several buildings that are now demolished, we see on them too the models of many ancient statues that are now lost. There are several reverses which are owned to be the representations of antique figures; and I question not but there are many others that were formed on the like models, though at present they lie under no suspicion of it. The Hercules Farnese, the Venus of Medicis, the Apollo in the Belvidera, and the famous Marcus Aurelius on horseback, which are, perhaps, the four most beautiful statues extant, make their appearance all of them on ancient medals, though the figures that represent them were never thought to be the copies of statues till the statues themselves were discovered. There is no question, I think, but the same reflection may extend itself to antique pictures: for I doubt not but in the designs of several Greek medals in particular, one might often see the head of an Apelles or Protogenes, were we as well acquainted with their works as we are with Titian's or Vandyck's. I might here make a much greater show of the usefulness of medals, if I would take the method of others, and prove to you that all arts and sciences receive a considerable illustration from this study. I must, however, tell you, that medals and the civil law, as we are assured by those who are well read in both, give a considerable light to each other, and that several old coins are like so many maps for explaining of the ancient geography. But besides the

more solid parts of learning, there are several little intimations to be met with on medals that are very pleasant to such as are conversant in this kind of study. Should I tell you gravely, that without the help of coins we should never have known which was the first of the emperors that wore a beard, or rode in stirrups, I might turn my science into ridicule. Yet it is certain there are a thousand little impertinencies of this nature that are very gratifying to curiosity, though perhaps not very improving to the understanding. To see the dress that such an empress delighted to be drawn in, the titles that were most agreeable to such an emperor, the flatteries that he lay most open to, the honours that he paid to his children, wives, predecessors, friends, or colleagues, with the like particularities only to be met with on medals, are certainly not a little pleasing to that inquisitive temper which is so natural to the mind of man.

I declare to you, says Cynthio, you have astonished me with the several parts of knowledge that you have discovered on medals. I could never fancy before this evening, that a coin could have any nobler use in it than to pay a reckoning.

You have not heard all yet, says Philander, there is still an advantage to be drawn from medals, which I am sure will heighten your esteem for them. It is, indeed, a use that nobody has hitherto dwelt upon. If any of the antiquaries have touched upon it, they have immediately quitted it, without considering it in its full latitude, light, and extent. Not to keep you in suspense, I think there is a great affinity between coins and poetry, and that your medallist and critic are much nearer related than the world generally imagines. A reverse often

clears up the passage of an old poet, as the poet often serves to unriddle a reverse. I could be longer on this head, but I fear I have already tired you. Nay, says Eugenius, since you have gone so far with us, we must beg you to finish your lecture, especially since you are on a subject that I dare promise you will be very agreeable to Cynthio, who is so professed an admirer of the ancient poets. I must only warn you, that you do not charge your coins with more uses than they can bear. It is generally the method of such as are in love with any particular science, to discover all others in it. Who would imagine, for example, that architecture should comprehend the knowledge of history, ethics, music, astronomy, natural philosophy, physic, and the civil law? Yet Vitruvius will give you his reasons, such as they are, why a good architect is master of these several arts and sciences. Sure, says Cynthio, Martial had never read Vitruvius when he threw the crier and the architect into the same class :

*Duri si puer ingeni videtur
Præconem facias vel architectum.*

If of dull parts the stripling you suspect,
A herald make him, or an architect.

But to give you an instance out of a very celebrated discourse on poetry, because we are on that subject, of an author's finding out imaginary beauties in his own art^a. I have observed, says he (speaking of the natural propension that all men have to numbers and harmony), that my barber has often combed my head in dactyls and spondees, that is, with two short strokes and a long one, or with two long ones

^a Vossius de Viibus Rythmi.

successively. Nay, says he, I have known him sometimes run even into pyrrhics and anapæsts. This you will think, perhaps, a very extravagant fancy; but I must own I should as soon expect to find the prosodia in a comb as poetry in a medal. Before I endeavour to convince you of it, says Philander, I must confess to you that this science has its visionaries as well as all others. There are several, for example, that will find a mystery in every tooth of Neptune's trident, and are amazed at the wisdom of the ancients, that represented a thunderbolt with three forks, since, they will tell you, nothing could have better explained its triple quality of piercing, burning, and melting. I have seen a long discourse on the figure and nature of born, to show it was impossible to have found out a fitter emblem for Plenty than the cornucopia. These are a sort of authors who scorn to take up with appearances, and fancy an interpretation vulgar when it is natural. What could have been more proper to show the beauty and friendship of the three Graces, than to represent them naked, and knit together in a kind of dance? It is thus they always appear in ancient sculpture, whether on medals or in marble, as I doubt not but Horace alludes to designs of this nature, when he describes them after the same manner:

—————*Gratia,*
Junctis nuda sonantibus :
 ————*Segnesque nodum solvere Gratæ.*

The sister Graces hand in hand
 Conjoin'd by love's eternal band.

Several of your medallists will be here again astonished at the wisdom of the ancients, that knew how

to couch such excellent precepts of morality under visible objects. The nature of gratitude, they will tell you, is better illustrated by this single device, than by Seneca's whole book *De Beneficiis*. The three Graces teach us three things. 1. To remark the doing of a courtesy. 2. The return of it from the receiver. 3. The obligation of the receiver to acknowledge it. The three Graces are always hand in hand, to show us that these three duties should be never separated. They are naked, to admonish us that gratitude should be returned with a free and open heart; and dancing, to show us that no virtue is more active than gratitude. May not we here say with Lueretius?

*Quæ bene et eximie quanquam disposita ferantur,
Sunt longè tamen a verâ ratione repulsa.*

It is an easy thing, says Eugenius, to find out designs that never entered into the thoughts of the sculptor or the coiner. I dare say, the same gentlemen who have fixed this piece of morality on the three naked sisters dancing hand in hand, would have found out as good a one for them, had there been four of them sitting at a distance from each other, and covered from head to foot. It is here therefore, says Philander, that the old poets step in to the assistance of the medallist, when they give us the same thought in words as the masters of the Roman mint have done in figures. A man may see a metaphor or an allegory in picture, as well as read them in a description. When, therefore, I confront a medal with a verse, I only show you the same design executed by different hands, and appeal from one master to another of the same age and taste. This is certainly a much surer way than to build on

the interpretations of an author who does not consider how the ancients used to think, but will be still inventing mysteries and applications out of his own fancy. To make myself more intelligible, I find a shield on the reverse of an emperor's coin, designed as a compliment to him from the senate of Rome. I meet with the same metaphor in ancient poets, to express protection or defence. I conclude, therefore, that this medal compliments the emperor in the same sense as the old Romans did their dictator Fabius, when they called him the buckler of Rome. Put this reverse now, if you please, into the hands of a mystical antiquary: he shall tell you that the use of the shield being to defend the body from the weapons of an enemy, it very aptly shadows out to us the resolution or continence of the emperor, which made him proof to all the attacks of fortune or of pleasure. In the next place, the figure of the shield being round, it is an emblem of perfection, for Aristotle has said the round figure is the most perfect. It may likewise signify the immortal reputation that the emperor has acquired by his great actions, rotundity being an emblem of eternity, that has neither beginning nor end. After this I dare not answer for the shield's convexity that it does not cover a mystery, nay, there shall not be the least wrinkle or flourish upon it which will not turn to some account. In this case, therefore, poetry^b being in some respects an art of designing, as well as painting or sculpture, they may serve as comments on each other. I am very well satisfied, says Eugenius, by what you have said on this subject, that the poets may contribute to the explication of such

^b *Poëma est pictura loquat.*

reverses as are purely emblematical, or when the persons are of that shadowy allegorical nature you have before mentioned; but I suppose there are many other reverses that represent things and persons of a more real existence. In this case too, says Philander, a poet lets you into the knowledge of a device better than a prose writer, as his descriptions are often more diffuse, his story more naturally circumstanced, and his language enriched with a greater variety of epithets: so that you often meet with little hints and suggestions in a poet, that give a great illustration to the eustoms, actions, ornaments, and all kinds of antiquities that are to be met with on ancient coins. I fancy, says Cynthia, there is nothing more ridiculous than an antiquary's reading the Greek or Latin poets. He never thinks of the beauty of the thought or language, but is for searching into what he calls the erudition of the author. He will turn you over all Virgil to find out the figure of an old rostrum, and has the greatest esteem imaginable for Homer, because he has given us the fashion of a Greek sceptre. It is, indeed, odd enough to consider how all kinds of readers find their account in the old poets. Not only your men of the more refined or solid parts of learning, but even your alchymist and fortuneteller will discover the secrets of their art in Homer and Virgil. This, says Eugenius, is a prejudice of a very ancient standing. Read but Plutarch's Discourse on Homer, and you will see that the Iliad contains the whole circle of arts, and that Thales and Pythagoras stole all their philosophy out of this poet's works. One would be amazed to see what pains he takes to prove that Homer understood all the figures in rhetoric, before they were invented.

I do not question, says Philander, were it possible for Homer to read his phrases in this author, but he would be as much surprised as ever monsieur Jourdain was, when he found he had talked prose all his lifetime without ever knowing what it was. But to finish the task you have set me, we may observe that not only the virtues, and the like imaginary persons, but all the heathen divinities appear generally in the same dress among the poets that they wear in medals. I must confess, I believe both the one and the other took the mode from the ancient Greek statuaries. It will not, perhaps, be an improper transition to pass from the heathen gods to the several monsters of antiquity, as chimæras, gorgons, sphinxes, and many others that make the same figure in verse as on coins. It often happens, too, that the poet and the senate of Rome have both chosen the same topic to flatter their emperor upon, and have sometimes fallen upon the same thought. It is certain, they both of them lay upon the catch for a great action: it is no wonder, therefore, that they were often engaged on one subject, the medal and the poem being nothing else but occasional compliments to the emperor. Nay, I question not but you may sometimes find certain passages among the poets that relate to the particular device of a medal.

I wonder, says Eugenius, that your medallists have not been as diligent in searching the poets as the historians, since I find they are so capable of enlightening their art. I would have somebody put the muses under a kind of contribution to furnish out whatever they have in them that bears any relation to coins. Though they taught us but the same things that might be learnt in other writings, they would at least teach us more agreeably, and draw

several over to the study of medals that would rather be instructed in verse than in prose. I am glad, says Philander, to hear you of this opinion; for to tell you truly, when I was at Rome I took occasion to buy up many imperial medals that have any affinity with passages of the ancient poets. So that I have by me a sort of poetical cash, which I fancy I could count over to you in Latin and Greek verse. If you will drink a dish of tea with me to-morrow morning, I will lay my whole collection before you. I cannot tell, says Cynthio, how the poets will succeed in the explication of coins, to which they are generally very great strangers. We are, however, obliged to you for preventing us with the offer of a kindness that you might well imagine we should have asked you.

Our three friends had been so intent on their discourse, that they had rambled very far into the fields without taking notice of it. Philander first put them in mind, that unless they turned back quickly they would endanger being benighted. Their conversation ran insensibly into other subjects; but as I design only to report such parts of it as have any relation to medals, I shall leave them to return home as fast as they please, without troubling myself with their talk on the way thither, or with their ceremonies at parting.

DIALOGUE II.

SOME of the finest treatises of the most polite Latin and Greek writers are in dialogue, as many very valued pieces of French, Italian, and English appear in the same dress. I have sometimes, however, been very much distasted at this way of writing, by reason of the long prefaces and exordiums into which it often betrays an author. There is so much time taken up in ceremony, that before they enter on their subject the dialogue is half ended. To avoid the fault I have found in others, I shall not trouble myself nor my reader with the first salutes of our three friends, nor with any part of their discourse over the tea-table. We will suppose the China dishes taken off, and a drawer of medals supplying their room. Philander, who is to be the hero in my dialogue, takes it in his hand, and addressing himself to Cynthio and Eugenius, I will first of all, says he, show you an assembly of the most virtuous ladies that you have ever, perhaps, conversed with. I do not know, says Cynthio, regarding them, what their virtue may be, but methinks they are a little fantastical in their dress. You will find, says Philander, there is good sense in it. They have not a single ornament that they cannot give a reason for. I was going to ask you, says Eugenius, in what country you find these ladies. But I see they are some of those imaginary persons you told us of last night, that inhabit old coins, and appear nowhere else but on the reverse of a medal.

Their proper country, says Philander, is the breast of a good man: for I think they are most of them the figures of virtues. It is a great compliment methinks to the sex, says Cynthio, that your virtues are generally shown in petticoats. I can give no other reason for it, says Philander, but because they chanced to be of the feminine gender in the learned languages. You will find, however, something bold and masculine in the air and posture of the first figure^a, which is that of Virtue herself, and agrees very well with the description we find of her in Silius Italicus:

*Virtutis dispar habitus, frons linta, nec unquam
Composita mutata comâ; stans vultus, et ore
Incessuque viro propior, latique pudoris,
Celsa humeros, niveæ fulgebat stamine pallæ.*

Lib. 15.

-A different form did Virtue wear,
Rude from her forehead fell th' unplaited hair,
With dauntless mien aloft she rear'd her head,
And next to manly was the virgin's tread,
Her height, her sprightly blush, the goddess show,
And robes unsullied as the falling snow.

Virtue and Honour had their temples bordering on each other, and are sometimes both on the same coin, as in the following one of Galba^b. Silius Italicus makes them companions in the glorious equipage that he gives his virtue:

[Virtus loquitur.]
*Mecum Honor, et Laudes, et læto Gloria vultu,
Et Decus, et niveis Victoria concolor alis.*

Ibid.

^a See first series, figure 1.

^b Ibid. figure 2.

[*Virtue speaks.*]

With me the foremost place let Honour gain,
Fame and the Praises mingling in her train,
Gay Glory next, and Victory on high,
White like myself, on snowy wings shall fly.

Tu cujus placido posuere in pectore sedem

Blandus Honos, hilarisque (tamen cum pondere) Virtus.

STAT. SILV. lib. 2.

The head of Honour is crowned with a laurel, as Martial has adorned his Glory after the same manner, which indeed is but another name for the same person :

Mille coronatas Gloria mæsta comas.

I find, says Cynthio, the Latins mean courage by the figure of Virtue, as well as by the word itself. Courage was esteemed the greatest perfection among them, and therefore went under the name of Virtue in general, as the modern Italians give the same name, on the same account, to the knowledge of curiosities. Should a Roman painter at present draw the picture of Virtue^c, instead of the spear and paratonium that she bears on old coins, he would give her a bust in one hand and a fiddle in the other.

The next, says Philander, is a lady of a more peaceful character, and had her temple at Rome^c:

———*Salutata crepitat Concordia nido.*

She is often placed on the reverse of an imperial coin, to show the good understanding between the emperor and empress. She has always a cornucopia in her hand, to denote that plenty is the fruit of concord. After this short account of the goddess,

^c See first series, figure 3.

I desire you will give me your opinion of the deity that is described in the following verses of Seneca, who would have her propitious to the marriage of Jason and Creusa. He mentions her by her qualities, and not by her name:

—*Asperi*

*Martis sanguineas quæ cohibet manus,
Quæ dat belligeris fœdera gentibus,
Et cornu retinet divite copiam.*

SEN. Med. act. 1.

Who soothes great Mars the warior god,
And checks his arm distain'd with blood,
Who joins in leagues the jarring lands,
The horn of plenty fills her hands.

The description, says Eugenius, is a copy of the figure we have before us: and for the future, instead of any farther note on this passage, I would have the reverse you have shown us stamped on the side of it. The interpreters of Seneca, says Philander, will understand the precedent verses as a description of Venus, though in my opinion there is only the first of them that can aptly relate to her, which at the same time agrees as well with Concord: and that this was a goddess who used to interest herself in marriages, we may see in the following description:

—*Jamdudum poste reclinis*

*Quærit Hymen thalamis intactum dicere carmen,
Quo vatem mulcere queat; dat Juno verenda
Vincula, et insigni geminat Concordia tædâ.*

STATII Epithalamion Silv. lib. 1.

Already leaning at the door, too long
Sweet Hymen waits to raise the nuptial song,
Her sacred bands majestic Juno lends,
And Concord with her flaming torch attends.

Peace^d differs as little in her dress as in her character from Concord. You may observe in both these figures, that the vest is gathered up before them like an apron, which you must suppose filled with fruits as well as the cornucopia. It is to this part of the dress that Tibullus alludes :

*At nobis, Pax alma, veni, spicamque teneto,
Perfluat et pomis candidus ante sinus.*

Kind Peace appear,
And in thy right hand hold the wheaten ear,
From thy white lap th' o'erflowing fruits shall fall.

Prudentius has given us the same circumstance in his description of Avarice :

— *Avaritia gremio præcineta capaci.*

Psychomachia.

How proper the emblems of Plenty are to Peace, may be seen in the same poet :

*Interea Pax arva colat, Pax candida primum
Duxit araturas sub iuga curva boves ;
Pax aluit vites, et succos condidit uvæ,
Funderet ut nato testu paterna merum :
Pace hidens vomerque vigent.*—————

TIBUL. EL. 10. lb. i.

She first, white Peace, the earth with ploughshares broke,
And bent the oxen to the crooked yoke,
First rear'd the vine, and hoarded first with care
The father's vintage for his drunken heir.

The olive branch in her hand is frequently touched upon in the old poets as a token of peace :

Pace orare manu.————— VIRG. ÆN. 10.

^d See first series, figure 4.

Ingreditur, ramumque tenens popularis olivæ.

OVID. Met. lib. 7.

In his right hand an olive branch he holds.

—*furorem*

Indomitum duramque viri deflectere mentem

Pacifico sermone purant, hostemque propinquum

Orant Cecropiæ prælatâ fronde Minervæ. LUC. lib. 3.

—To move his haughty soul they try

Entreaties, and persuasion soft apply ;

Their brows Minerva's peaceful branches wear,

And thus in gentlest terms they greet his ear. ROWE.

Which, by the way, one would think had been spoken rather of an Attila, or a Maximin, than Julius Cæsar.

You see Abundance, or Plenty*, makes the same figure in medals as in Horace :

—————*tibi copia*

Manabit ad plenum benigno

Ruris honorum opulenta cornu.

HOR. Od. 17. lib. i.

————Here to thee shall Plenty flow

And all her riches show,

To raise the honour of the quiet plain.

CREECH.

The compliment on this reverse to Gordianus Pius is expressed in the same manner as that of Horace to Augustus :

—*Aurea fruges*

Italiam pleno diffudit copia cornu.

HOR. Epist. 12. lib. i.

——Golden Plenty with a bounteous hand

Rich harvests freely scatters o'er our land.

CREECH.

* See first series, figure 5.

But to return again to our virtues. You have here the picture of Fidelity^f, who was worshipped as a goddess among the Romans :

Si tu oblitus es ut Dii meminérunt, meminit Fides.

CATUL. ad Alphen.

I should fancy, from the following verses of Virgil and Silius Italicus, that she was represented under the figure of an old woman :

Cana Fides, et Vesta, Remo cum fratre Quirinus

Jura dabant.——— VIRG. *Æn.* lib. 1.

Then banish'd Faith shall once again return,
And vestal fires in hallow'd temples burn,
And Remus with Quirinus shall sustain
The righteous laws, and fraud and force restrain.

DRYDEN.

——— *Ad limina sanctæ*

Contendit Fidei, secretaque pectora tentat.

Arcanis dea læta polo tum forte remoto

Callicolam magnas volvebat conscia curas.

Ante Jovem generata, decus divûmque hominumque,

Quâ sine non tellus pacem, non æquora nôrunt,

Justitiæ consors.——— SIL. ITAL. lib. 2.

He to the shrines of Faith his steps addrest.
She, pleas'd with secrets rolling in her breast,
Far from the world remote, revolv'd on high
The cases of gods, and counsels of the sky,
Ere Jove was born she grac'd the bright abodes,
Consort of Justice, boast of men and gods ;
Without whose heavenly aid no peace below
The stedfast earth, and rolling ocean knew.

There is a medal of Heliogabalus^g, inscribed FIDES EXERCITUS, that receives a great light from the preceding verses. She is posted between two

^f See first series, figure 6.

^g Ibid. figure 7.

military ensigns, for the good quality that the poet ascribes to her, of preserving the public peace by keeping the army true to its allegiance.

I fancy, says Eugenius, as you have discovered the age of this imaginary lady, from the description that the poets have made of her, you may find, too, the colour of the drapery that she wore in the old Roman paintings, from that verse in Horace :

*Te Spes et albo rara Fides colit
Velata panno.*—————

HOR. OD. 35. lib. i.

Sure Hope and Friendship, cloth'd in white,
Attend on thee.————— CREECH.

One would think, says Philander, by this verse, that Hope and Fidelity had both the same kind of dress. It is certain Hope might have a fair pretence to white, in allusion to those that were candidates for an employ :

————— *Quem ducit hiantem
Cretata ambitio.*—————

PERS. SAT. 5.

And how properly the epithet of *rara* agrees with her, you may see in the transparency of the next figure^h. She is here dressed in such a kind of vest as the Latins call a *multicium* from the fineness of its tissue. Your Roman beaux had their summer *toga* of such a light airy make :

Quem tenues decuere togæ nitidique capilli

HOR. EP. 14. lib. i.

I that lov'd —————
Cul'd powder'd locks, a fine and gaudy gown.

CREECH.

^h See first series, figure 8.

I remember, says Cynthio, Juvenal rallies Creticus, that was otherwise a brave, rough fellow, very handsomely on this kind of garment :

—————Sed quid
*Non facient alii cum tu multitia sumas,
 Cretice ? et hanc vestem populo mutante peiores
 In Proculas et Pollineas.*————— Juv. Sat. 2.

*Acer et indomitus libertatisque magister,
 Cretice, pellures.*————— Ibid.

—————Nor, vain Metellus, shall
 From Rome's tribunal thy harangues prevail
 'Gainst harlotry, whilst thou art clad so thin,
 That through thy cobweb robe we see thy skin.
 As thou declaim'st.————— TATE.

Can'st thou restore old manners, or retrench
 Rome's pride, who com'st transparent to the bench ?
 Idem.

But pray what is the meaning that this transparent lady holds up her train in her left hand ? for I find your women on medals do nothing without a meaning. Besides, I suppose there is a moral precept at least couched under the figure she holds in her other hand. She draws back her garment, says Philander, that it may not encumber her in her march. For she is always drawn in a posture of walking, it being as natural for Hope to press forward to her proper objects, as for Fear to fly from them :

*Ut canis in vacuo leporem cum Gallicus arvo
 Vidit, et hic prædam pedibus petit, ille salutem :
 Alter inhæsuro similis, jam jamque tenere
 Sperat, et extento stringit vestigia rostro ;
 Alter in ambiguo est an sit comprehensus, et ipsi*

*Morsibus eripitur, tangentiaque ora relinquit :
Sic deus et virgo est : hæc Spe celer, illa Timore.*

OVID. Met. de Apol. et Daph. lib. i.

As when th' impatient greyhound slipp'd from far,
Bounds o'er the glebe to catch the fearful hare,
She in her speed does all her safety lay :
And he with double speed pursues the prey ;
O'erruns her at the sitting turn, and licks
His chaps in vain, and blows upon the flax :
She 'scapes, and for the neighb'ring covert strives,
And gaining shelter, doubts if yet she lives :—
Such was the god, and such the flying fair,
She, urg'd by Fear, her feet did swiftly move.
But he more swiftly who was urg'd by Love. DRYDEN.

This beautiful similitude is, I think, the prettiest emblem in the world of Hope and Fear in extremity. A flower, or blossom, that you see in the right hand is a proper ornament for Hope, since they are these that we term, in poetical language, the hopes of the year :

*Vere novo, tunc herba nitens, et roboris expers
Turget et insolida est, et Spe delectat agrestes.
Omnia tum florent, florumque coloribus almus
Ridet ager.*————— OVID. Met. lib. 15.

The green stem grows in stature and in size,
But only feeds with Hope the farmer's eyes ;
Then laughs the childish year with flow'rets crown'd,
And lavishly perfumes the fields around. DRYDEN.

The same poet in his *De Fastis*, speaking of the vine in flower, expresses it,

In spe vitis erat.————— OVID. de Fast. lib. 5.

The next on the list is a lady of a contrary cha-

racter, and therefore in a quite different posture¹. As Security is free from all pursuits, she is represented leaning carelessly on a pillar. Horace has drawn a pretty metaphor from this posture :

Nullum me à labore reclinat otium.

No ease doth lay me down from pain.

CREECH.

She rests herself on a pillar, for the same reason as the poets often compare an obstinate resolution or a great firmness of mind, to a rock that is not to be moved by all the assaults of winds or waves :

*Non civium ardor prava jubentium,
Non vultus instantis tyranni,
Mente quatit solidâ, neque Auster
Dux inquietæ turbidus Adriæ, etc.*

HOR.

'The man resolv'd, and steady to his trust,
Inflexible to ill, and obstinately just,
May the rude rabble's insolence despise,
Their senseless clamours and tumultuous cries ;
The tyrant's fierceness he beguiles,
And the stern brow and the harsh voice defies,
And with superior greatness smiles.
Not the rough whirlwind that deforms
Adria's black gulf, etc.

CREECH.

I am apt to think it was on devices of this nature that Horace had his eye in his Ode to Fortune. It is certain he alludes to a pillar that figured out security, or something very like it ; and, till any body finds out another that will stand better in its place, I think we may content ourselves with this before us.

¹ See first series, figure 9.

*Te Dacus asper, te profugi Scythæ
 Urbesque gentesque et Latium feror,
 Regumque matres barbarorum, et
 Purpurei metuunt tyranni
 Injuncto ne pede prius
 Stantem columnam, neu populus frequens
 Ad arma cessantes, ad arma
 Concitet, imperiumque fiat.*

Hor. ad Fortunam, Od. 35. lib. 1.

To thee their vows rough Germans pay,
 To thee the wand'ring Scythians bend,
 Thee mighty Rome proclaims a friend
 And for their tyrant sons
 The barb'rous mothers pry
 To thee, the greatest guardian of their thrones.

They bend, they vow, and still they fear,
 Lest you should kick their column down,
 And cloud the glory of their crown,
 They fear that you would raise
 The lazy crowd to war,
 And break their empire, or confine their praise.

CREECH.

I must, however, be so fair as to let you know that Peace and Felicity have their pillars in several medals as well as Security, so that if you do not like one of them, you may take the other.

The next figure is that of Chastity^k, who was worshipped as a goddess, and had her temple:

—————*Deinde ad superos Astra recessit
 Hac comite, atque duæ puiter fugere sorores.*
 Juv. de Pudicitia, Sat. 6.

At length uneasy Justice upwards flew,
 And both the sisters to the stars withdrew. DRYDEN.

^k See first series, figure 10.

*Templa pudicitiae quid opus statuisse puellis,
Si cuius nuptiae quidlibet esse licet?* TIB. hb. 2

Since wives whate'er they please unblam'd can be,
Why rear we useless fanes to Chastity?

How her posture and dress become her, you may see
in the following verses.

*Ergo sedens velat iultus, obnubit ocellos,
Ista verecundi signa Pudoris erant.* ALCIAR.

She sits, her visage veil'd, her eyes conceal'd,
By marks like these was Chastity reveal'd.

*Ite procul vitia tenues, insigne pudoris,
Quaque tegit medius instita longa pedes.*
OVID de Art. Aman.

——Frontem limbo veluta pudicam.
CLAUD de Theod. Cons

Hence! ye smooth fillets on the forehead bound,
Whose bands the brows of Chastity surround,
And her coy robe that lengthens to the ground.

She is represented in the habit of a Roman matron:

*Matrone praeter faciem nil cernere possis,
Cetera, ne Catia est, demissa veste tegentis.*
HOR Sat. 2. lib. 1.

Besides, a matron's face is seen alone,
But Kate's, that female bully of the town,
For all the rest is cover'd with a gown. CREECH.

That *ne Catia est*, says Cynthio, is a beauty unknown to most of our English satirists. Horace knew how to stab with address, and to give a thrust where he was least expected. Boileau has nicely imitated him in this, as well as his other beauties. But our English libellers are for hewing a man

downright, and for letting him see at a distance that he is to look for no mercy. I own to you, says Eugenius, I have often admired this piece of art in the two satirists you mention, and have been surprised to meet with a man in a satire that I never in the least expected to find there. They have a particular way of hiding their ill-nature, and introduce a criminal rather to illustrate a precept or passage, than out of any seeming design to abuse him. Our English poets on the contrary show a kind of malice prepense in their satires, and instead of bringing in the person to give light to any part of the poem, let you see they wrote the whole poem on purpose to abuse the person. But we must not leave the ladies thus. Pray what kind of head-dress is that of Piety?

As Chastity, says Philander, appears in the habit of a Roman matron, in whom that Virtue was supposed to reign in its perfection, Piety¹ wears the dress of the vestal virgins, who were the greatest and most shining examples of it. *Vittata sacerdos* is, you know, an expression among the Latin poets. I do not question but you have seen in the duke of Florence's gallery a beautiful antique figure of a woman standing before an altar, which some of the antiquaries call a Piety, and others a vestal virgin. The woman, altar, and fire burning on it, are seen in marble exactly as in this coin, and bring to my mind a part of a speech that Religion makes in Phædrus's fables:

*Sed ne ignis noster facinori præluceat,
Per quem reverendos excolit Pietas deos.* Fab. 10. lib. iv.

¹ See first series, figure 11.

It is to this goddess that Statius addresses himself in the following lines :

*Summa deum Pietas ! cujus gratissima caelo
Rara profanatas inspicant numina terras,
Huc vittata comam, niveoque insignis amictu,
Qualis adhuc praesens, nullaque expulsa nocentum
Fraude rudes populos atque aurea regna colebas,
Mitibus exequis ades, et lugentis Hetrasci
Cerne pios fletus, laudataque lumina terge.*

STATIUS, *Sily.* lib. 3.

Chief of the skies, celestial Piety !
Whose godhead, priz'd by those of heavenly birth,
Revisits rare these tainted realms of earth,
Mild in thy milkwhite vest, to soothe my friend,
With holy fillets on thy brows descend,
Such as of old (ere chas'd by Guilt and Rage)
A race unpolish'd, and a golden age,
Beheld thee frequent. Once more come below,
Mix in the soft solemnities of woe,
See, see, thy own Ictruscus wastes the day
In pious grief ; and wipe his tears away.

The little trunk she holds in her left hand is the *acerra* that you so often find among the poets, in which the frankincense was preserved that Piety is here supposed to strew on the fire :

Dantque sacerdoti custodem thuris acerrum.

OVID. *Met.* lib. 13.

*Hæc tibi pro nato plena dat latus acerrâ
Phæbe.*—————

MART. *Ep.* lib. iv. 45.

The figure of Equity^m differs but little from that our painters make of her at present. The scales she carries in her hand are so natural an emblem of

^m See first series, figure 12.

justice, that Persius has turned them into an allegory to express the decisions of right or wrong :

—*Quirites*
Hoc puto non justum est, illud malè, rectius istud ;
Scis etenim justum geminè suspendere lance
Ancipitis libræ.—

SOCRAT. ad Alcibiad. Sat. 4.

Romans, know,
 Against right reason all your counsels go ;
 This is not fair ; nor profitable that :
 Nor t'other question proper for debate.
 But thou, no doubt, canst set the business right,
 And give each argument its proper weight :
 Know'st with an equal hand to hold the scale, etc.

DRYDEN.

The next figure I present you with is Eternity^a. She holds in her hand a globe with a phoenix on it. How proper a type of Eternity is each of these you may see in the following quotations. I am sure you will pardon the length of the latter, as it is not improper to the occasion, and shows at the same time the great fruitfulness of the poet's fancy, that could turn the same thought to so many different ways :

Hæc æterna manet, divisque simillima forma est,
Cui neque principium est usquam, nec finis: in ipso
Sed similis toto remanet, perque omnia par est.

MANIL. de Rotunditate Corporum, lib. 1.

This form's eternal, and may justly elaim
 A godlike nature, all its parts the same ;
 Alike, and equal to its self 'tis found,
 No end and no beginning in a round :
 Nought can molest its being, nought control,
 And this ennobles, and confines the whole. CREECH.

Par volucer superis, stellæ qui vividus æquat
Durando, membrisque terit redeuntibus ævum.—

^a See first series, figure 13.

*Nam pater est prolesque sui, nulloque creante
Emeritas artus, facunda morte reformar,
Et petit alternam totidem der funera vitam.——
O senium positura rogo, fulsisque sepulchris
Natales habitura vices, qui sæpe renasci
Exitio, proprioque sales pubescere letho.——
O felix, hæresque tui ! quo solvimur omnes,
Hoc tibi suppeditat vires : præbetur ongo
Per cinerem : moritur te non pereunte senectus,
Vidisti quodcumque fuit : te secula teste
Cuncta revolvuntur. Nosti quo tempore pontus
Fudit elatas scopulis stagnantibus undas :
Quis Phaetonteis erroribus a serit annus.
Et clades te nulla rapit, solusque superstes
Edomitâ tellure manes : non stamina Parcæ
In te dura legunt, non jus habuere nocendi.*

CLAUD. de Phœnice.

A godlike bird ! whose endless round of years
Outlasts the stars, and fires the circling spheres ;—
Begot by none himself, begetting none,
Sire of himself he is, and of himself the son ;
His life in fruitful death renews its date,
And kind destruction but prolongs his fate.——
O thou, says he, whom harmless fires shall burn,
Thy age the flame to second youth shall turn,
An infant's cradle is thy fun'ral urn.——
Thrice happy phoenix ! heav'n's peculiar care
Has made thyself thyself's surviving heir.
By death thy deathless vigour is supplied,
Which sinks to ruin all the world beside.
Thy age, not thee, assisting Phœbus burns,
And vital flames light up thy fun'ral urns.
Whate'er events have been thy eyes survey,
And thou art fix'd while ages roll away.
Thou saw'st when raging ocean burst his bed,
O'ertopp'd the mountains, and the earth o'erspread ;
When the rash youth inflam'd the high abodes,
Scorch'd up the skies, and scar'd the deathless gods.
When nature ceases, thou shalt still remain,
Nor second chaos bound thy endless reign ;
Fate's tyrant laws thy happier lot shall brave,
Baffle destruction, and elude the grave.

The circle of rays that you see round the head of the phoenix, distinguish him to be the bird and offspring of the sun :

Solis avis specimen : —————
Una est, quæ reparet, seque ipsa reseminet, ales ;
Assyrii phœnica vocant. Non fruge, neque herbis,
Sed thuris lachrymis, et succo vivit amomi.
Hæc ubi quinque suæ complevit sæcula vitæ,
Illicis in ramis, tramulæve cacumine palme,
Unguibus et duro sibi nidum construit ore :
Quo simul ac casias, ac nardi lenis aristas,
Quassaque cum fulvâ substravit cinnama myrrhâ ;
Se super imponit, finitque in odoribus ævum.
Inde ferunt totidem qui vivere debeat annos,
Corpore de patrio parvum phœnica renasci.
Cum dedit huic ætas vires, onerique ferendo est,
Ponderibus nidi ramos levat arboris altæ,
Fertque plus cunasque suas, patrumque sepulchrum,
Perque leves auras Hyperionis urbe potitus,
Ante fores sacras Hyperionis æde reponit.

OVID. Met. lib. 15.

————— *Titanus ales. Cæsup. de Phœnice.*

————— From himself the phoenix only springs :
 Self-born, begotten by the parent flame,
 In which he burn'd, another and the same,
 Who not by corn or herbs his life sustains,
 But the sweet essence of amomum drains :
 And watches the rich gums Arabia hears,
 While yet in tender dew they drop their tears.
 He (his five centuries of life fulfill'd)
 His nest on oaken boughs begins to build,
 Or trembling tops of palm, and first he draws
 The plan with his broad bill and crooked claws,
 Nature's artificers ; on this the pile
 Is form'd, and rises round ; then with the spoil
 Of cassia, cinnamon, and stems of nard,
 (For softness strew'd beneath) his fun'ral bed is rear'd :
 Fun'ral and bridal both ; and all around
 The borders with corruptless myrrh are crown'd,

On this incumbent ; till etherial flame
First catches, then consumes, the costly frame ;
Consumes him too, as on the pile he lies ;
He liv'd on odours, and in odours dies.

An infant phoenix from the former springs,
His father's heir, and from his tender wings
Shakes off his parent dust, his method he pursues,
And the same lease of life on the same terms renews.
When grown to manhood he begins his reign,
And with stiff pinions can his flight sustain,
He lightens of its load the tree that bore
His father's royal sepulchre before,
And his own cradle: this (with pious care,
Plac'd on his back) he cuts the buxom air,
Seeks the sun's city, and his sacred church,
And decently lays down his burden in the porch.

DRYDEN.

*Sic ubi fecunda reparavit morte juventum,
Et patrias idem cineres, collectaque portat
Unguibus ossa piis, Nilique ad littora tendens
Unicus extremo phoenix procedit ab Euro,
Conveniunt aquilæ, cunctaque ex orbe volucres,
Ut solis mirentur avem.*

CLAUD. de Laud. Stil. lib. 2.

So when his parent's pile hath ceas'd to burn,
Tow'rs the young phoenix from the teeming urn :
And from the purple east, with pious toil,
Bears the dear relics to the distant Nile ;
Himself a species ! then the bird of Jove
And all his plumy nation quit the grove ;
The gay harmonious train delighted gaze,
Crowd the procession, and resound his praise.

The radiated head of the phoenix gives us the meaning of a passage in Ausonius, which I was formerly surprised to meet with in the description of a bird. But at present I am very well satisfied the poet must have had his eye on the figure of this bird in

ancient sculpture and painting, as indeed it was impossible to take it from the life :

*Ter nova Nestoreos implevit purpura fusos :
Et toties terno cornix vivacior ævo :
Quam novies terni glomerantem sæcula tractus
Vincunt æripedes ter terno Nestore cervi :
Tres quorum ætates superat Phæbeus oscen :
Quem novies senior Gangeticus antequam ales,
Ales cinnamæo radiatus tempora nido :*

AUSON. Idyll. 11.

*Alcanum radiant oculi jubar : igneus ora
Cingit honos, rutilo cognatum vertice sidus
Attollit citatus apex, tenebræque senem
Luce secat.*

CLAUD. de Phœn.

His fiery eyes shoot forth a glitt'ring ray,
And round his head ten thousand glories play ·
High on his crest, a star celestial bright
Divides the darkness with its piercing light.

—Procul ignea lucet

Ales, odorati redolent cui cinnamæ busti.

CLAUD. de Laud. Stil. lib. 2.

If you have a mind to compare this scale of beings with that of Hesiod, I shall give it you in a translation of that poet :

*Ter binos deciesque novem super exit in annos
Justa senescentum quos implet vita virorum.
Hos novies superat vivendo garrula cornix :
Et quater egreditur cornicis sæcula cervus.
Alipidem ceruum ter vincit corvus : et illum
Multiplicat novies phœnix, reparabilis alos :
Quam ros perpetuo decies prævertitis ævo,
Nymphæ Hamadryades, quarum longissima vita est.
Hi cohibent fines viracis fata animantium.*

AUSON. Idyll. 18.

The utmost age to man the gods assign
 Are winters three times two, and ten times nine .
 Poor man nine times the prating daws exceed :
 Three times the daw's the deer's more lasting breed :
 The deer's full thrice the raven's race outrun :
 Nine times the raven Titan's feather'd son :
 Beyond his age, with youth and beauty crown'd,
 The Hamadryads shine ten ages round :
 Their breath the longest is the fates bestow .
 And such the bounds to mortal lives below.

A man had need be a good arithmetician, says Cynthio, to understand this author's works. His description runs on like a multiplication table. But methinks the poets ought to have agreed a little better in the calculations of a bird's life that was probably of their own creation.

We generally find a great confusion in the traditions of the ancients, says Philander. It seems to me, from the next medal^o, it was an opinion among them, that the phoenix renewed herself at the beginning of the great year, and the return of the golden age. This opinion I find touched upon in a couple of lines in Claudian :

*Quicquid ab æternis ales longæva colonis
 Colligit, optati referens exordia sæcli.*

CLAUD. de Rap. Proserp. lib. 2.

The person in the midst of the circle is supposed to be Jupiter, by the author that has published this medal ; but I should rather take it for the figure of Time. I remember I have seen at Rome an antique statue of Time, with a wheel or hoop of marble in his hand, as Seneca describes him, and not with a serpent, as he is generally represented :

^o See first series, figure 14.

Properat cursu

Vita citato, volucique die

Rota præcipitis volutur anni. HENC. FUR. ACT. 1.

Life posts away,

And day from day drives on with swift career

The wheel that hurries on the headlong year.

As the circle of marble in his hand represents the common year, so this that encompasses him is a proper representation of the great year, which is the whole round and comprehension of time. For when this is finished, the heavenly bodies are supposed to begin their courses anew, and to measure over again the several periods and divisions of years, months, days, etc. into which the great year is distinguished:

Consumto, magnus qui dicitur, anno

Rursus in antiquum veniant vaga sidera cursum,

Qualia dispositi steterant ab origine mundi.

AUSON. IDYLL. 18.

When round the great Platonic year has turn'd,

In their old ranks the wand'ring stars shall stand

As when first marshall'd by the Almighty's hand.

To sum up, therefore, the thoughts of this medal. The inscription teaches us that the whole design must refer to the golden age, which it lively represents, if we suppose the circle that encompasses Time, or, if you please, Jupiter, signifies the finishing of the great year, and that the phoenix figures out the beginning of a new series of time. So that the compliment on this medal to the emperor Adrian, is in all respects the same that Virgil makes to Pollio's son, at whose birth he supposes the *annus magnus*, or Platonical year, run out, and renewed again with the opening of the golden age:

*Magnus ab integro sæclorum nascitur ordo.
Jam redit et Vingo, redeunt Saturnia regna.
Et nova progenies cælo demittitur alto.* VING. Ecl. 4.

The time is come the Sibyls long foretold,
And the blest maid restores the age of gold,
In the great wheel of Time before enroll'd.
Now a new progeny from heaven descends.

LORD LAUDERDALE.

—————*Nunc adest mundo dies
Supremus ille, qui premit genus impium
Cæli ruind; rursus ut stirpem novam
Generat renascens melior: ut quondam tulit
Juvenis tenente regna Saturno poh.* SEN. Oct. Act. 2.

—————The last great day is come,
When earth and all her impious sons shall lie
Crush'd in the ruins of the falling sky,
Whence fresh shall rise, her new-born realms to grace,
A pious offspring and a purer race,
Such as erewhile in golden ages sprung,
When Saturn govern'd, and the world was young.

You may compare the design of this reverse, if you please, with one of Constantine, so far as the phoenix is concerned in both. As for the other figure, we may have occasion to speak of it in another place. Vid. figure 15. King of France's medallions.

The next figure^p shadows out Eternity to us, by the sun in one hand and the moon in the other, which in the language of sacred poetry is, "as long as the sun and moon endureth." The heathens made choice of these lights as apt symbols of Eternity, because, contrary to all sublunary beings, though they seem to perish every night, they renew themselves every morning.

^p See first series, figura 16.

*Soles occidere et redire possunt
Nobis, cum semel occidit brevis lux,
Nex est perpetua una dormienda.* CATUL. carm. 5.

The suns shall often fall and rise.
But when the short-lived mortal dies
A night eternal seals his eyes.

Horace, whether in imitation of Catullus or not, has applied the same thought to the moon; and that too in the plural number.

*Damna lumen celeres reparant coelestia luna
Nos, ubi decidimus
Quò pius Æneas, quò Tullus dives, et Ancus,
Pulvis et umbra sumus.* HOR. Od. 7. lib. iv.

Each loss the hast'ning moon repairs again.

But we, when once our race is done,
With Tullus and Anchises' son,
(Though rich like one, like t'other good)
To dust and shades, without a sun,
Descend, and sink in dark oblivion's flood.

SIR W. TEMPLE.

In the next figure[†], Eternity sits on a globe of the heavens adorned with stars. We have already seen how proper an emblem of Eternity the globe is, and may find the duration of the stars made use of by the poets, as an expression of what is never like to end:

—————*Stellas qui vivendus æquas*
Durando.————— CLAUD.

—————*Polus dum sidera pascet*
Semper honos, nomenque tuum, laudesque manebunt.
VIRG. Æn. lib. 1.

[†] See first series, figure 17.

Lucida dum current annosi sidera mundi, etc.

SEN. Med.

I might here tell you that Eternity has a covering on her head^r, because we can never find out her beginning; that her legs are bare, because we see only those parts of her that are actually running on, that she sits on a globe and bears a sceptre in her hand, to shew that she is sovereign mistress of all things: but for any of those assertions I have no variant from the poets.

You must excuse me, if I have been longer than ordinary on such a subject as Eternity. The next you see is Victory^s, to whom the medallists, as well as poets, never fail to give a pair of wings

Adfuit ipsa suis ales Victoria.

CLAUD. de Sext Cons. Hon.

—————*Dubus volitat Victoria pennis.*

OVID

—————*Niveis Victoria concolor alis.*

SIL. ITAL.

The palm branch and laurel were both the rewards of conquerors, and therefore no improper ornaments for Victory:

—————*Lentæ Victoris præmia palmæ.*

OVID. Met

Et palmæ pretium Victoribus.

VIRG. ÆN 5.

Tu ducibus lætis aderis cum læta triumphum

Vox canet, et longas visent capitolia pompas.

OVID. Met. Apollo ad Laurum.

Thou shalt the Roman festivals adorn,

Thou shalt returning Cæsar's triumphs grace,

When pomps shall in a long procession pass. DRYDEN.

^r See first series, figure 13

^s Ibid figure 18

By the way, you may observe the lower plaits of the drapery that seem to have gathered the wind into them. I have seen abundance of antique figures in sculpture and painting, with just the same turn in the lower foldings of the vest, when the person that wears it is in a posture of tipping forward :

Oblique adversâs vibrabant flamina Vestes.

OVID. Met. lib. 1.

—As she fled, the wind
Increasing, spread her flowing hair behind ,
And left her legs and thighs exposed to view. DRYDEN.

—————*Tenuis sinuantur flamina Vestes.* Id lib 2.

It is worth while to compare this figure of Victory with her statue as it is described in a very beautiful passage of Prudentius.

*Non aris, non farre molæ, Victoria felix
Eamata venit labor impiger, aspera virtus,
Vis animi, excellens ardor, violentia, cura,
Hanc tribuunt, durum tractandis robur in armis.*

*Quæ si defuerint bellantibus, aurea quamvis
Marmoreo in templo rutilas Victoria pinnas
Explicet, et multis surgat formata talentis,
Non adeit, versisque offensa videbitur hastis.
Quid miles, proprius diffusus viribus, optas
Irrita jamineæ tibimet solatia formæ ?
Numquam pinnigeram legio ferata puellam
Vidit, anhelantum egeret quæ tela virorum.
Vincendi quæris dominam ? sua dextra curque est,
Et deus omnipotens. Non pecto crine virago,
Nec nudo suspensa pede, strophæque revincta,
Nec tumidas fluitante sinu investita pupillas.*

Contra Symm. lib. 2.

Shall Victory entreated lend her aid
For cakes of flour on smoking altars laid ?

Her help from toils and watchings hope to find,
 From the strong body, and undaunted mind
 If these be wanting on th' embattled plain,
 Ye sue the unpropitious maid in vain.
 Though in her marble temples taught to blaze
 Her dazzling wings the golden dame displays,
 And many a talent in due weight was told
 To shape her godhead in the curious mould.
 Shall the rough soldier of himself despair,
 And hope for female visions in the air?
 What legion sheath'd in non e'er survey'd
 Their darts directed by this winged maid?
 Dost thou the power that gives success demand?
 'Tis he th' Almighty, and thy own right hand,
 Not the smooth nymph, whose locks in knots are twin'd,
 Who bending shows her naked foot behind,
 Who girds the virgin zone beneath her breast,
 And from her bosom heaves the swelling vest

You have here another Victory^u that I fancy Claudian had in view, when he mentions her wings, palm, and trophy in the following description. It appears on a coin of Constantine, who lived about an age before Claudian, and I believe we shall find that it is not the only piece of antique sculpture that this poet has copied out in his descriptions.

— *Cum totis cisus gens ardua pennis
 Ipsa duci sacras lictoria punderet ades,
 Et palma viridi gaudens, et amicta trophæis.*

CLAUD. de Cons Stil lib 3

On all her plumage rising, when she threw
 Her sacred shrines wide open to thy view,
 How pleas'd for thee her emblems to display,
 With palms distinguish'd, and with trophies gay.

The last of our imaginary beings is Liberty^x. In her left hand she carries the wand that the Latins

^u See first series, figure 19.

^x Ibid. figure 20.

call the *rudis*, or *vindicta*, and in her right the cap of liberty. The poets use the same kinds of metaphors to express liberty. I shall quote Horace for the first, whom Ovid has imitated on the same occasion, and for the latter Martial:

—*Donatum jam rude, quæris,*
Mecænas, iterum antiquo me includere ludo.
 HOR. lib. i. Epist. 1.

—*Tardæ vires minuente senectâ*
Me quoque donari jam rude, tempus erat.
 OVID. de Trist. lib. iv. el. 8.

Since bent beneath the load of years I stand,
 I too might claim the freedom-giving wand.

Quid te nomine jam tuo saluto,
Quem regem et dominum prius vocabam ;
Ne me dixeris esse contumacem
Totis pilea sarcinis redemi. MART. lib. ii. Ep. 68.

By thy plain name though now address'd,
 Though once my king and lord confess'd,
 Frown not : with all my goods I buy
 The precious cap of liberty.

I cannot forbear repeating a passage out of Persius, says Cynthio, that, in my opinion, turns the ceremony of making a freeman very handsomely into ridicule. It seems the clapping a cap on his head and giving him a turn on the heel were necessary circumstances. A slave thus qualified became a citizen of Rome, and was honoured with a name more than belonged to any of his forefathers, which Persius has repeated with a great deal of humour :

—*Heu steriles veri, quibus una quiritem*
Vertigo facit ! hic Dama est non tressis agaso,

*Vappa et lippus, et in tenui farragine mendax :
 Verterit hunc dominus, momento turbinis exit
 Marcus Dama. Papæ! Marco spondente, recusus
 Credere tu nummos? Marco sub iudice palles?
 Marcus dixit: ita est. Assigna, Marce, tabellas.
 Hæc mera libertas: hanc nobis pilea donant.*

PERS. Sat. 5.

That false enfranchisement with ease is found :
 Slaves are made citizens by turning round.
 How! replies one, can any be more free!
 Here's Dama, once a groom of low degree,
 Not worth a farthing, and a sot beside ;
 So true a rogue, for lying's sake he lied :
 But, with a turn, a freeman he became ;
 Now Marcus Dama is his worship's name.
 Good gods! who would refuse to lend a sum,
 If wealthy Marcus surety would become !
 Marcus is made a judge, and for a proof
 Of certain truth, 'he said it,' is enough.
 A will is to be prov'd ; put in your claim ;
 'Tis clear, if Marcus has subscrib'd his name.
 This is true liberty, as I believe ;
 What farther can we from our caps receive,
 Than as we please without control to live? DRYDEN.

Since you have given us the ceremony of the cap,
 says Eugenius, I will give you that of the wand, out
 of Claudian :

*Te fastos ineunte quater : solennia ludit
 Omnia libertas: deductum vindice morem
 Lex celebrat, famulusque jugo laxatus herili
 Ducitur, et grato remeat securior ictu.
 Tristis conditio pulsata fronte recedit.
 In civem rubuere genæ, tergoque removit
 Verbera permissi felix injuria voti.*

CLAUD. de Quarto Cons. Hon.

The *grato ictu* and the *felix injuria*, says Cynthio,
 would have told us the name of the author, though
 you had said nothing of him. There is none of all

the poets that delights so much in these pretty kinds of contradiction as Claudian. He loves to set his epithet at variance with its substantive, and to surprise his reader with a seeming absurdity. If this poet were well examined, one would find that some of his greatest beauties as well as faults arise from the frequent use of this particular figure.

I question not, says Philander, but you are tired by this time with the company of so mysterious a sort of ladies as those we have had before us. We will now, for our diversion, entertain ourselves with a set of riddles, and see if we can find a key to them among the ancient poets^a. The first of them, says Cynthio, is a ship under sail, I suppose it has at least a metaphor or moral precept for its cargo. This, says Philander, is an emblem of happiness, as you may see by the inscription it carries in its sails. We find the same device to express the same thought in several of the poets: as in Horace, when he speaks of the moderation to be used in a flowing fortune, and in Ovid, when he reflects on his past happiness:

*Rebus angustis unmosus atque
Fortis appare: sapienter idem
Contraheis vento nimium secundo
Turgida vela.*

HOR. Od. 10. lib. ii.

When Fortune sends a stormy wind,
Then show a brave and present mind;
And when with too indulgent gales
She swells too much, then furl thy sails.

CRILLCH.

*Nominis et fame quondam fulgore trahebat,
Dum tulit antennas aura secunda meas.*

OVID. de Trist. lib. v. el. 12.

^a See second series, figure 1.

*En ego, non paucis quondam munitus amicis,
Dum flavit velis aura secunda meis.*

Id. Epist. ex Ponto 3, lib. ii.

I liv'd the darling theme of ev'ry tongue,
The golden idol of th' adoring throng;
Guarded with friends, while Fortune's balmy gales
Wanton'd auspicious in my swelling sails.

You see the metaphor is the same in the verses as in the medal, with this distinction only, that the one is in words and the other in figures. The idea is alike in both, though the manner of representing it is different. If you would see the whole ship made use of in the same sense by an old poet, as it is here on the medal, you may find it in a pretty allegory of Seneca:

*Fata si liceat mihi
Fingere arbitrio meo,
Temperem zephyro levi
Vela, nè pressæ gravi
Spiritu antennæ tremant.
Lenis et modicè fluens
Aura, nec vergens latus,
Ducat intrepidam ratem.*

Œdip. Chor. Act. 4.

My fortune might I form at will,
My canvas zephyrs soft should fill
With gentle breath, lest ruder gales
Crack the main-yard, or burst the sails.
By winds that temperately blow
The bark should pass secure and slow,
Nor scare me leaning on her side:
But smoothly cleave th' unruffled tide.

After having considered the ship as a metaphor, we may now look on it as a reality, and observe in it the make of the old Roman vessels, as they are de-

scribed among the poets. It is carried on by oars and sails at the same time :

Sive opus est velis ; minimam bene currit ad auram

Sive opus est remo ; remige carpit iter.

OVID. de Trist. lib. i. el. 10.

The poop of it has the bend that Ovid and Virgil mention :

—————*Puppique recurvæ.*

Ibid. lib. i. el. 4.

—————*Littora curvæ*
Præterunt puppes.—————

VIRG.

You see the description of the pilot, and the place he sits on, in the following quotations :

Ipse gubernator puppi Palinurus ab altâ.

VIRG. ÆN. lib. 5.

Ipsius ante oculos ingens a vertice pontus

In puppiæ ferit : excutitur, pronusque magister

Volvitur in caput.—————

ÆN. lib. 1.

Orontes' bark, that bore the Lycian crew,

(A horrid sight) ev'n in the hero's view,

From stem to stern, by waves was overborne ;

The trembling pilot, from his rudder torn,

Was headlong hurl'd. —————

DRYDEN.

—————*Segnemque Menœtem,*

Oblitus decorisque sui sociumque salutis,

In mare præcipitem puppi deturbat ab altâ :

Ipse gubernaculo rector subit.—————

ÆN. lib. 5.

Mindless of others' lives (so high was grown

His rising rage), and careless of his own,

The trembling dotard to the deck he diew,

And hoisted up, and overboard he threw :

This done, he seiz'd the helm. —————

DRYDEN.

I have mentioned these last two passages of Virgil, because I think we cannot have so right an idea of the pilot's misfortune in each of them, without observing the situation of his post, as appears in ancient coins. The figure you see on the other end of the ship is a Triton, a man in his upper parts, and a fish below, with a trumpet in his mouth. Virgil describes him in the same manner on one of Æneas's ships. It was probably a common figure on their ancient vessels, for we meet with it too in Silius Italicus :

*Hunc vehit immanis Triton, et cœrula conchâ
Exterrens freta: cui laterum tenuis hispida nanti
Frons hominem præfert, in pristin desinit alius;
Spumea semifero sub pectore murmurat unda.*

VIRG. ÆN. lib. 10.

The Triton bears him, he, whose trumpet's sound
Old ocean's waves from shore to shore rebound.
A hairy man above the waist he shows,
A porpoise tail down from his belly grows,
The billows murmur, which his breast oppose.

LORD LAUDENDALE.

*Ducitur et Libyæ puppis signata figuræ
Et Triton captivus.*

SIL. ITAL. lib. 14.

I am apt to think, says Eugenius, from certain passages of the poets, that several ships made choice of some god or other for their guardians, as among the Roman catholics every vessel is recommended to the patronage of some particular saint. To give you an instance of two or three:

*Est mihi, sitque precor, flavæ tutela Minervæ
Navis.*

OVID. de Trist. lib. i. ep. 10.

Numen erat celsæ puppis vicina Dione.

SIL. ITAL. lib. 14.

*Hammon numen erat Libyæ gentile carinæ,
Cornigerâque sedens spectabat cœrula fronte.*

Ibid.

The poop great Ammon Libya's god display'd,
Whose horned front the nether flood survey'd.

The figure of the deity was very large, as I have seen it on other medals as well as this you have shown us, and stood on one end of the vessel that it patronised. This may give us an image of a very beautiful circumstance that we meet with in a couple of wrecks described by Silius Italicus and Perseus:

*-Subito cum pondere victus,
Insiliente mari, submergitur alveus undis.
Scuta virum, cristæque, et inertî spicula ferro,
Tutelæque deum fluitant.*—————

SIL. ITAL. lib. 14.

Sunk by a weight so dreadful, down she goes,
And o'er her head the broken billows close,
Bright shields and crests float round the whirling floods,
And useless spears confus'd with tutelary gods.

*-Tribe ruptâ Bruttia saxa
Prendit amicus inops, remque omnem surdaque vota
Condidit Ionio: jacet ipse in littore, et una
Ingentes de puppe dei, jamque obvia mergis
Costa ratis laceræ.*————— PENS. Sat. 6.

My friend is shipwreck'd on the Bruttian strand,
His riches in th' Ionian main are lost;
And he himself stands shiv'ring on the coast:
Where, destitute of help, forlorn and bare,
He wearies the deaf gods with fruitless pray'r.
Their images, the relics of the wreck,
Torn from their naked poop, are tided back
By the wild waves; and rudely thrown ashore,
Lie impotent, nor can themselves restore.

The vessel sticks, and shows her open'd side,
And on her shatter'd mast the mews in triumph ride.

DRY DEN.

You will think, perhaps, I carry my conjectures too far, if I tell you that I fancy they are these kind of gods that Horace mentions in his allegorical vessel, which was so broken and shattered to pieces; for I am apt to think that *integra* relates to the gods as well as the *lintea*:

———*Non tibi sunt integra lintea,
Non di, quos iterum pressa roces malo.*

Od. 14. lib. 1.

Thy stern is gone, thy gods are lost,
And thou hast none to hear thy cry,
When thou on dangerous shelves art tost,
When billows rage, and winds are high.

CÆCILI.

Since we are engaged so far in the Roman ship-ping^b, says Philander, I will here show you a medal that has on its reverse a rostrum with three teeth to it; whence Silius's *trifidum rostrum* and Virgil's *rostrisque tridentibus*, which, in some editions, is *stridentibus*, the editor choosing rather to make a false quantity than to insert a word that he did not know the meaning of. Valerius Flaccus gives us a rostrum of the same make:

*Volat immixtis cara pinus habemus
Infunditque salum, et spumas vomit aë tridenti.*

Argon. lib. 1.

A ship-carpenter of old Rome, says Cynthio, could not have talked more judiciously. I am afraid, if we let you alone, you will find out every plank and

^b See second series, figure 2.

rope about the vessel among the Latin poets. Let us now, if you please, go to the next medal.

The next, says Philander, is a pair of Scales^c, which we meet with on several old coins. They are commonly interpreted as an emblem of the emperor's justice. But why may not we suppose that they allude sometimes to the Balance in the heavens, which was the reigning constellation of Rome and Italy? Whether it be so or not, they are capable, methinks, of receiving a nobler interpretation than what is commonly put on them, if we suppose the thought of the reverse to be the same with that in Manilius:

*Hesperiam sua Libra tenet, quæ condita Roma
Et propriis frænat pendentem nutibus orbem,
Orbis et Imperium retinet, discrimini rerum
Lancibus, et positas gentes tollitque premitque :
Quæ genitus cum fratre Remus hanc condidit urbem.*

MANIL. lib. 4.

The Scales rule Italy, where Rome commands,
And spreads its empire wide to foreign lands :
They hang upon her nod, their fates are weigh'd
By her, and laws are sent to be obey'd :
And as her pow'rful favour turns the poise,
How low some nations sink and others rise,
Thus guide the Scales, and then to fix our doom,
They gave us Cæsar^d, founder of our Rome. CREECH.

The thunderbolt is a reverse of Augustus^e. We see it used by the greatest poet of the same age to express a terrible and irresistible force in battle, which is probably the meaning of it on this medal, for in another place the same poet applies the same metaphor to Augustus's person :

^c See second series, figure 3.

^d So Vossius reads it.

^e See second series, figure 4.

—————*Duo fulmina belli,*
Scipiadas.—————

VIRG. ÆN. lib. 6.

—————Who can declare
 The Scipios' worth, those thunderbolts of war?

DRYDEN.

—————*Cæsar dum magnus ad altum*
Fulminat Euphratem bello.—————

Georg. lib. 4.

While mighty Cæsar thund'ring from afar,
 Seeks on Euphrates' banks the spoils of war. DRYDEN.

I have sometimes wondered, says Eugenius, why the Latin poets so frequently give the epithets of *trifidum* and *trisulcum* to the thunderbolt. I am now persuaded they took it from the sculptors and painters that lived before them, and had generally given it three forks as in the present figure. Virgil insists on the number three in its description, and seems to hint at the wings we see on it. He has worked up such a noise and terror in the composition of his thunderbolt, as cannot be expressed by a pencil or graving-tool:

Tres tibiis torti radios, tres nubis aquosæ
Addiderant, rutili tres ignis, et alitis Austri.
Fulgores nunc terrificos, sonitumque, metumque
Miscebant operi, flammisque sequacibus iras.

VIRG. ÆN. lib. 8.

Three rays of writhen rain, of fire three more,
 Of winged southern winds, and cloudy store .
 As many parts, the dreadful mixture frame,
 And fears are added, and avenging flame. DRYDEN.

Our next reverse is an oaken garland^f, which we find on abundance of imperial coins. I shall not

^f See second series, figure 5.

here multiply quotations to show that the garland of oak was the reward of such as had saved the life of a citizen, but will give you a passage out of Claudian, where the compliment to Stilico is the same that we have here on the medal. I question not but the old coins gave the thought to the poet :

*Mos erat in veterum castris, ut tempora quercu
Velaret, validis qui fuso viribus hoste
Casurum morti potuit subducere civem.
At tibi quæ poterit pro tantis civica reddi
Membris? aut quantæ pensabunt facta coronæ?*

CLAUD. de Cons. Stil. lib. 3.

Of old, when in the war's tumultuous strife
A Roman sav'd a brother Roman's life,
And foil'd the threat'ning foe, our shes decreed
An oaken garland for the victor's meed.
Thou who hast sav'd whole crowds, whole towns set free,
What groves, what woods, shall furnish crowns for thee?

It is not to be supposed that the emperor had actually covered a Roman in battle. It is enough that he had driven out a tyrant, gained a victory, or restored justice. For in any of these, or the like cases, he may very well be said to have saved the life of a citizen, and by consequence entitled to the reward of it. Accordingly, we find Virgil distributing his oaken garlands to those that had enlarged or strengthened the dominions of Rome; as we may learn from Statius, that the statue of Curtius, who had sacrificed himself for the good of the people, had the head surrounded with the same kind of ornament :

*At qui umbrata gerunt civili tempora quercu,
Hi tibi Nomentum, et Gabios, urbemque Fidenam,
Hi Collatinas imponent montibus arces.*

VIRG. Æn. lib. 6.

But they, who crown'd with oaken wreaths appear,
 Shall Gabian walls and strong Videna rear:
 Nomentum, Bola, with Pometia, found;
 And raise Collatian tow'rs on rocky ground. DRYDEN.

*Ipsæ loci custos, cujus sacra torago,
 Famosusque lacus nomen memorabile servat,
 Innumeros æris sonitus, et verberare cithro
 Ut sensit mugire forum, movet horrida sancto
 Ora situ, mentisque caput venerabile quæcun.*

STATIUS, Sylv. lib. 1.

The guardian of that lake, which boasts to claim
 A sure memorial from the Curtian name;
 Rous'd by th' artificers, whose mingled sound
 From the loud forum pierc'd the shades profound,
 The hoary vision rose confess'd in view,
 And shook the civic wreath that bound his brow.

The two horns that you see on the next medal are
 emblems of Plenty^s:

Copia cornu. *-Apparetque beata pleno*

HOR. Carm. Sæc.

Your medallists tell us that two horns on a coin signify an extraordinary plenty. But I see no foundation for this conjecture. Why should they not as well have stamped two thunderbolts, two caduceuses, or two ships, to represent an extraordinary force, a lasting peace, or an unbounded happiness. I rather think that the double cornucopia relates to the double tradition of its original: some representing it as the horn of Achelous broken off by Hercules; and others as the horn of the goat that gave suck to Jupiter:

^s See second series, figure 6.

*—Rigidum sera dextera cornu
 Dum tenet, infregit, truncâque à fronte revellit.
 Naiades hoc, pomis et odore flore repletum,
 Saciârunt, divesque mio bona copiu cornu est.
 Dixerat et nymphe, ritu succinata Diana
 Una ministrarum, fuis utrinque capillis,
 Incessit, totumque tulit prædivite cornu
 Autumnum, et mensos felicia poma secundas.*

OVID. Met. de Acheloi Cornu, lib. 9.

Nor yet his fury cool'd, 'twixt rage and scorn,
 From my maim'd front he bore the stubborn horn
 This, heap'd with flowers and fruits, the Naiads bear,
 Sacred to Plenty and the bounteous year.

He spoke, when lo! a beauteous nymph appears,
 Girt like Diana's train, with flowing hairs,
 The horn she brings, in which all autumn's stor'd
 And ruddy apples for the second board. GAI.

*Luc dabat illa deo sed fregit in arbore cornu
 Truncâque dimidâ parte decoris erat.
 Sustulit hoc nympha, cinctumque recentibus herbis,
 Et plenum pomis ad Jovis ora tulit.
 Ille, ubi res tali tenuit, soloque paterno
 Sedit, et invicto nil Jove majus ei ot,
 Sidera nutricem, nutrius fertilis cornu
 Fecit, quod dominæ nunc quoque nomen habet.*

OVID. Fast. de Cornu Amalthææ, lib. 5.

The god she suckled of old Rhea born;
 And in the pious office broke her horn,
 As playful in a rifted oak she tost
 Her heedless head, and half its honours lost.
 Fair Amalthæa took it off the ground,
 With apples fill'd it, and with garlands bound,
 Which to the smiling infant she convey'd.
 He, when the sceptre of the gods he sway'd,
 When bold he seiz'd his father's vacant throne,
 And reign'd the tyrant of the skies alone,
 Bid his rough nurse the starry heavens adorn,
 And grateful in the zodiac fix'd her horn.

Betwixt the double cornucopia, you see Mercury's rod :

*Cyllenes cælique decus, sacunde minister,
Aurea cui torto vinga dracone viret.*

MART. Ep. 74. lib. vii.

Descend, Cyllene's tutelary god,
With serpents twining round thy golden rod.

It stands on old coins as an emblem of Peace, by reason of its stupifying quality that has gained it the title of *virga somnifera*. It has wings, for another quality that Virgil mentions in his description of it :

—*Hac fiatus ventos et nubila tranat.*

Thus arm'd, the god begins his airy race,
And dives the racking clouds along the liquid space.
DRYDEN.

The two heads over the two *cornucopiæ* are of the emperor's children who are sometimes called among the poets, the pledges of Peace, as they took away the occasions of war, in cutting off all disputes to the succession :

*-Tu mihi primum
Tot natorum memoranda parens
Utero toties entra gravi
Pignora pacis.*

SEN, Octav. Act. 5.

The first kind author of my joys,
Thou source of many smiling boys,
Nobly contented to bestow
A pledge of peace in every throe.

This medal, therefore, compliments the emperor on his two children, whom it represents as public

blessings, that promise peace and plenty to the empire.

The two hands that join one another are emblems of Fidelity^b:

Inde Fides dextraque data.— OVID, Met. lib. 14.

*Sociemus animos, pignus hoc fidei cui
Continge dextram.*—

SEN. Herc. Fur. Act. 2.

*—En dextra fidesque
Quem secum patius aiant portare penates¹*
VIRG. AEn. lib. 4.

See now the promis'd faith, the vaunted name,
The pious man, who, rushing through the flame,
Preserv'd his gods. —————

DRYDEN.

By the inscription we may see that they represent, in this place, the fidelity or loyalty of the public towards their emperor. The caduceus rising between the hands signifies the peace that arises from such a union with their prince, as the spike of corn on each side shadows out the plenty that is the fruit of such a peace:

Pax Ceresem nutrit, pacis alumna Ceres.

OVID, de Fast. lib. 1.

The giving of a handⁱ, in the reverse of Claudius, is a token of good will. For when, after the death of his nephew Caligula, Claudius was in no small apprehension for his own life, he was, contrary to his expectation, well received among the pretorian

^b See second series, figure 7.

¹ Ibid figure 8.

guards, and afterwards declared their emperor. His reception is here recorded on a medal, in which one of the ensigns presents him his hand, in the same sense as Anchises gives it in the following verses :

*Ipsæ pater dextram Anchises hæc multa moratus
Dat juveni, atque animum præsentî munere firmat.*

VIRG. ÆN. lib. 3.

The old weatherbeaten soldier that carries in his hand the Roman eagle, is the same kind of officer that you meet with in Juvenal's fourteenth satire :

*Diræ Maurorum atque castella Brigantum,
Ut locupletem aquilam tibi sexagesimus annus
Afferat.*

JUV. SAT. 14.

I remember in one of the poets the *signifer* is described with a lion's skin over his head and shoulders, like this we see in the medal, but at present I cannot recollect the passage. Virgil has given us a noble description of a warrior making his appearance under a lion's skin :

*————— Tegumen torquens immane leonis
Terribili imperum sædâ, cum dentibus albis
Indutus capiti, sic regia tecta subibat
Horridus, Herculeoque humeros indutus amictu.*

VIRG. ÆN. lib. 7.

Like Hercules himself his son appears,
In savage pomp ; a lion's hide he wears,
About his shoulders hangs the shaggy skin,
The teeth and gaping jaws severely grin.
Thus like the god his father, homely drest,
He strides into the hall, a horrid guest !

DRYDEN.

Since you have mentioned the dress of your standard-bearer, says Cynthio, I cannot forbear remarking

that of Claudius, which was the usual Roman habit. One may see in this medal, as well as in any antique statues, that the old Romans had their necks and arms bare, and as much exposed to view as our hands and faces are at present. Before I had made this remark, I have sometimes wondered to see the Roman poets, in their descriptions of a beautiful man, so often mentioning the turn of his neck and arms, that in our modern dresses lie out of sight, and are covered under part of the clothing. Not to trouble you with many quotations, Horace speaks of both these parts of the body in the beginning of an ode, that in my opinion may be reckoned among the finest of his books, for the naturalness of the thought, and the beauty of the expression :

*Dum tu, Lydia, Telephi
Cervicem roseam, et cereu Telephi
Laudas brachia, vae meum
Fervens difficili bile tumet jecur.*

When Telephus his youthful charms,
His rosy neck, and winding arms,
With endless rapture you recite,
And in that pleasing name delight :
My heart, inflam'd by jealous heats,
With numberless resentments beats ;
From my pale cheek the colour flies,
And all the man within me dies.

It was probably this particular in the Roman habit that gave Virgil the thought in the following verse, where Remulus, among other reproaches that he makes the Trojans for their softness and effeminacy, upbraids them with the make of their tunicas, that had sleeves to them, and did not leave the arms naked and exposed to the weather like that of the Romans :

Et tunicae manicas, et habent ridimicula mitræ.

Virgil lets us know in another place, that the Italians preserved their old language and habits, notwithstanding the Trojans became their masters, and that the Trojans themselves quitted the dress of their own country for that of Italy. This, he tells us, was the effect of a prayer that Juno made to Jupiter :

*Illud te nullâ fati quod lege tenetur,
Pro Latio obtestor, pro maiestate tuorum :
Cum jam connubius pacem felicibus, esto,
Component, cum jam leges et fœdera jungent :
Ne vetus indigenas nomen mutare Latinos,
Neu Troas fieri jubeas, Teucrosque vocant ;
Aut vocem mutare viros, aut veteres vestes.
Sit Latium, sint Albani per sæcula reges :
Sit Romana potens Italâ virtute propago :
Occidit, occideritque sinas cum nomine Troja.*

Æn. hb. 12.

This let me beg (and this no fates withstand)
Both for myself and for your father's land,
That when the nuptial bed shall bind the peace,
(Which I, since you ordain, consent to bless)
The laws of either nation be the same ;
But let the Latins still retain their name :
Speak the same language which they spoke before,
Wear the same habits which their grandsires wore.
Call them not Trojans : perish the renown
And name of Troy with that detested town.
Latium be Latium still : let Alba reign,
And Rome's immortal majesty remain.

Dryden.

By the way, I have often admired at Virgil for representing his Juno with such an impotent kind of revenge as what is the subject of this speech. You may be sure, says Eugenius, that Virgil knew very well this was a trifling kind of request for the queen

of the gods to make, as we may find by Jupiter's way of accepting it :

*Olli subidens hominum rerumque repertor ;
Et germana Jovis, Saturnique altera proles :
Iraium tantos volvis sub pectore fluctus ?
Verum age, et inceptum frustra submitte furorem,
Do, quod vis ; et me victusque volensque remitto.
Sermonem Ausonii patrium moresque tenebunt.
Utque est, nomen erit : commixti corpore tantum
Subsident Teuceri : morem ritusque sacrorum
Adjiciam, faciamque omnes uno ore Latinos, etc.*

Æn. lib. 12.

Then thus the founder of mankind replies,
(Unruffled was his front, serene his eyes,)
Can Saturn's issue, and heav'n's other heir,
Such endless anger in her bosom bear ?
Be mistress, and your full desires obtain ;
But quench this choler you foment in vain.
From ancient blood th' Ausonian people sprung,
Shall keep their name, their habit, and their tongue.
The Trojans to their customs shall be tied,
I will myself their common rites provide ;
The natives shall command, the foreigners subside :
All shall be Latium ; Troy without a name :
And her lost sons forget from whence they came.

DRYDEN.

I am apt to think Virgil had a farther view in this request of Juno than what his commentators have discovered in it. He knew very well that his *Æneid* was founded on a very doubtful story, and that *Æneas's* coming into Italy was not universally received among the Romans themselves. He knew, too, that a main objection to this story was the great difference of customs, language, and habits among the Romans and Trojans. To obviate, therefore, so strong an objection, he makes this difference to arise from the forecast and predetermination of the gods

themselves. But pray what is the name of the lady in the next medal? Methinks she is very particular in her coiffure.

It is the emblem of Fruitfulness¹, says Philander, and was designed as a compliment to Julia the wife of Septimius Severus, who had the same number of children as you see on this coin. Her head is crowned with towers in allusion to Cybele the mother of the gods, and for the same reason that Virgil compares the city of Rome to her :

*Felix prole viram, qualis Berecynthia mater
Invehitur curru Phrygiæ turrita per urbes,
Lactu deum parvæ.*

VIRG. ÆN. lib. 6.

High as the mother of the gods in place,
And proud, like her, of an immortal race.
Then when in pomp she makes a Phrygian round,
With golden turrets on her temples crown'd. DRYDEN.

The vine issuing out of the urn speaks the same sense as that in the Psalmist: "Thy wife shall be as the fruitful vine on the walls of thy house." The four stars overhead, and the same number on the globe, represent the four children. There is a medallion of Romulus and Remus sucking the wolf, with a star over each of their heads, as we find the Latin poets speaking of the children of princes under the same metaphor :

*Utque tui faciunt sidus juvenile nepotes,
Per tua perque sui facta parentis eant.*

OVID. de Trist. el. 1. lib. ii.

¹ See second series, figure 9.

—*Tu quoque extinctus jaces.*
Deflende nobis semper, infelix puer,
Modo sidus orbis, columen angustæ domûs,
Britannicæ.—

SLN. Octav. Act. 1.

Thou too, dear youth, to ashes turn'd,
 Britannicus, for ever mourn'd !
 Thou star that want this orb to grace !
 Thou pillar of the Julian race !

—*Muneas hominum contentus habens,*
Undarum tenuæque potens, et sidera dones.

SIAT. Theb. hb. 1.

—Stay, great Cæsar, and vouchsafe to reign
 O'er the wide earth, and o'er the watery main,
 Resign to Jove his empire of the skies,
 And people heav'n with Roman deities. PORR.

I need not mention Homer's comparing Astyanax to the morning star, nor Virgil's imitation of him in his description of Ascanius.

The next medal was stamped on the marriage of Nero and Octavia¹, you see the sun over the head of Nero, and the moon over that of Octavia. They face one another according to the situation of these two planets in the heavens :

—*Phæbeis obvia flammis*
Demet nocti luna timores,

SEN. Thyest. Act. 4.

And to show that Octavia derived her whole lustre from the friendly aspect of her husband :

Sicut luna suo tunc tantum deficit orbe,
Quam Phæbum adversis currentem non vidit astris

MANIL. hb. 4.

¹ See second series, figure 10.

Because the moon then only feels decay,
When opposite unto her brother's ray.

CREECH.

But if we consider the history of this medal, we shall find more fancy in it than the medallists have yet discovered. Nero and Octavia were not only husband and wife, but brother and sister, Claudius being the father of both. We have this relation between them marked out in the tragedy of Octavia, where it speaks of her marriage with Nero :

*Fratris thalamos sortita tenet
Maxima Juno, soror Augusti
Sociata toris, cui à patriâ
Pelletur Aulæ?*————

SEN. Oct. Act. 1.

To Jove his sister consort wed,
Uncensur'd shares her brother's bed
Shall Cæsar's wife and sister wait
An exile at her husband's gate?

*Implebit aulam stirpe cœlesti tuam
Generata divo, Claudiæ gentis decus,
Sortita fratris, mox e Junonis, toros.*

Ibid. Act. 2.

Thy sister, bright with ev'ry blooming grace,
Will mount thy bed t' enlarge the Claudian race
And proudly teeming with fraternal love,
Shall reign a Juno with the Roman Jove

They are therefore very prettily represented by the sun and moon, who, as they are the most glorious parts of the universe, are in a poetical genealogy brother and sister. Virgil gives us a sight of them in the same position that they regard each other on this medal:

Nec fratris radus obnoxius surgere luna.

VIRG. Georg. 1.

The flattery on the next medal is the same thought as that of Lucretius^m :

*Ipse Epicurus obit decurso lumine vite ;
Qui genus humanum ingenio superavit, et omne
Præstravit, stellas exortus uti ætherius sol.*

LUCRETIVS, lib. 3.

Nay, Epicurus' race of life is run ;
That man of wit, who other men outshone,
As far as meaner stars the mid-day sun.

CHELCH.

The emperor appears as the rising sun, and holds a globe in his hand to figure out the earth that is enlightened and actuated by his beauty :

Sol qui terrarum flammis opera omnia lustras.

VIRG.

- Ubi primos præstinus ortus

Extulit it Titan, radiusque retexerit orbem.

IDEM.

When next the sun his rising light displays,
And gilds the world below with purple rays.

DRYDEN.

On his head you see the rays that seem to grow out of it. Claudian, in the description of his infant Titan, descants on this glory about his head, but has run his description into most wretched fustian :

*Invalidum dextro portat Titana lucerto,
Nondum luce gravem, nec pubescentibus altè
Cristatum radiis ; primo clementior ævo
Fingitur, et tenerum vagitu despuat ignem.*

CLAUD. de Rapt. Pros. lib. 2.

An infant Titan held she in her arms ;
Yet sufferably bright, the eye might bear
The ungrown glories of his beamy hair.

^m See second series, figure 11.

Mild was the babe, and from his cries there came
A gentle breathing and a harmless flame.

The Sun rises on a medal of Commodusⁿ, as Ovid describes him in the story of Phaeton :

*Ardua prima via est, et quæ vix manè recentes
Enituntur equi.*—————

OVID. Met. lib. 2.

You have here, too, the four horses breaking through the clouds in their morning passage :

*—Pyroeis, et Eous, et Æthon,
Solis equi, quartusque Phlegon.*—————

Ibid.

*Corripuere viam, pedibusque per aera motis
Obstantes scindunt nebulas.*—————

Ibid.

The woman underneath represents the Earth, as Ovid has drawn her sitting in the same figure :

*Sustulit omniferos collo tenuis arida vultus ;
Opposuitque manum fronti : magnæque tremore
Omnia concutiens paululum subsedit.*

Ibid.

The Earth at length—————
Uplifted to the heav'ns her blasted head
And clapp'd her hand upon her brows, and said,
(But first, impatient of the sultry heat,
Sunk deeper down, and sought a cooler seat).

The cornucopia in her hand is a type of her fruitfulness, as in the speech she makes to Jupiter :

*Hosne mihi fructus, hunc fertilitatis honorem
Officii que refers ? quod adunci vulnera aratri
Rustrorumque fero, totaque exerceor anno ?
Quod pecori frondes, alimenta que milia fruges
Humano generi, vobis quoque thura ministra ?*

Ibid.

ⁿ See second series, figure 12.

And does the plough for this my body tear?
 This the reward for all the fruits I bear,
 Tortur'd with rakes, and harass'd all the year?
 That herbs for cattle daily I renew,
 And food for man, and frankincense for you?

So much for the designing part of the medal; as for the thought of it, the antiquaries are divided upon it. For my part I cannot doubt but it was made as a compliment to Commodus on his skill in the chariot race. It is supposed that the same occasion furnished Lucan with the same thought in his address to Nero:

*Seu te flammigeros Phæbi conscendere currus,
 Telluremque, nihil mutato sole timentem,
 Igne vago lustrare juvet.*————

LUC. ad Neronem, lib. 1.

O! if thou choose the empire of the day,
 And make the sun's unwilling steeds obey,
 Auspicious if thou drive the flaming team,
 While earth rejoices in thy gentler beam.— ROWE.

This is so natural an allusion, that we find the course of the sun described in the poets by metaphors borrowed from the circus:

*Quum suspensus eat Phæbus, currumque reflectat
 Huc illuc, agiles et seriet in æthere metas.*

MANIL. lib. 1.

—————*Hesperio positus in litore metas.*

OVID. Met. lib. 2.

Et sol ex æquo metâ distabat utrâque.

Idem.

However it be, we are sure in general it is a comparing of Commodus to the sun, which is a simile of as long standing as poetry—I had almost said, as the sun itself.

I believe, says Cynthio, there is scarce a great man he ever shone upon that has not been compared to him. I look on similes as a part of his productions. I do not know whether he raises fruits or flowers in greater number. Horace has turned this comparison into ridicule seventeen hundred years ago :

*-Laudat Brutum, laudatque cohortem,
Solem Asia Brutum appellat.-*

HOR. SAT. 7. lib. 1.

He praiseth Brutus much and all his train,
He calls him Asia's sun.—————

CREECH.

You have now shown us persons under the disguise of stars, moons, and suns. I suppose we have at last done with the celestial bodies.

The next figure you see, says Philander^o, had once a place in the heavens, if you will believe ecclesiastical story. It is the sign that is said to have appeared to Coustantine before the battle with Maxentius. We are told by a Christian poet, that he caused it to be wrought on the military ensign that the Romans call their *labarum*. And it is on this ensign that we find it in the present medal :

*Christus purpureum gemmantis textus in auro
Signabat labarum.*—————

PRUDENT. CONTRA SYMM. lib. 1.

A Christ was on the imperial standard borne,
That gold embroiders, and that gems adorn.

By the word *Christus* he means without doubt the

♦ See second series, figure 13.

present figure, which is composed out of the two initial letters of the name.

He bore the same sign in his standards, as you may see in the following medal and verses ^P:

*Agnoscas, regina, libens mea signa necesse est:
In quibus effigies crucis aut gemmata refulget,
Aut longis solido ex auro præfertur in hastis.*

PRUDENT. Constantinus Romam alloquitur.

My ensign let the queen of nations praise,
That rich in gems the Christian cross displays:
There rich in gems; but on my quiv'ring spears
In solid gold the sacred mark appears.

Vexillumque crucis summus dominator adorat.

Idem, in Apotheosi.

See there the cross he wov'd on hostile shores,
The emperor of all the world adores.

But to return to our *labarum*^q; if you have mind to see it in a state of paganism you have it on a coin of Tiberius. It stands between two other ensigns, and is the mark of a Roman colony where the medal was stamped. By the way you must observe, that wherever the Romans fixed their standards they looked on that place as their country, and thought themselves obliged to defend it with their lives. For this reason their standards were always carried before them when they went to settle themselves in a colony. This gives the meaning of a couple of verses in Silius Italicus, that make a very far-fetched compliment to Fabius:

*Ocyus huc Aquillas servataque signa referte,
Hic patria est, murique urbis stant pectore in uno.*

SIL. ITAL. lib. 7.

^P See second series, figure 14.

^q Ibid. figure 15.

The following medal was stamped on Trajan's victory over the Daci^r, you see on it the figure of Trajan presenting a little Victory to Rome. Between them lies the conquered province of Dacia. It may be worth while to observe the particularities in each figure. We see abundance of persons on old coins that hold a little Victory in one hand, like this of Trajan, which is always the sign of a conquest. I have sometimes fancied Virgil alludes to this custom in a verse that Turnus speaks :

Non adeo has exosa manus Victoria fugit.

VIRG. *Æn.* lib. 11.

If you consent, he shall not be refus'd,
Nor find a hand to Victory unus'd.

DRYDEN.

The emperor's standing in a gown, and making a present of his Dacian Victory to the city of Rome, agrees very well with Claudian's character of him :

-Victura feretur

*Gloria Trajani ; non tam quod, Tigride victo,
Nostra triumphati fuerint provincia Parthi,
Alta quod innectus stratis capitolia Dacis :
Quam patriæ quod nutis erat.*—————

CLAUD. de Quarto Cons. Hon.

Thy glory, Trajan, shall for ever live,
Not that thy arms the Tigris mourn'd, o'ercome,
And tributary Parthia bow'd to Rome,
Not that the capitol receiv'd thy train
With shouts of triumph for the Daci slain ;
But for thy mildness to thy country shown.

The city of Rome carries the wand in her hand that is the symbol of her divinity :

^r See second series, figure 16.

*Delubrum Romæ (colitur nam sanguine et ipsa
More Deæ.)*—

PRUDENT. contra Symm. lib. 1.

For Rome, a goddess too, can boast her shrine,
With victims stain'd, and sought with rites divine.

As the globe under her feet betokens her dominion
over all the nation of the earth :

*Terrarum dea, gentiumque Roma ;
Cui par est nihil, et nihil secundum.*

MAUR. lib. xii. Ep. 8.

O Rome, thou goddess of the earth !
To whom no rival e'er had birth ;
Nor second e'er shall rise.

The heap of arms she sits on signifies the peace that the emperor had procured her. On old coins we often see an emperor, a Victory, the city of Rome, or a slave, sitting on a heap of arms, which always marks out the peace that arose from such an action as gave occasion to the medal. I think we cannot doubt but Virgil copied out this circumstance from the ancient sculptors, in that inimitable description he has given us of Military Fury shut up in the temple of Janus, and laden with chains :

*Claudentur belli portæ : Furor impius intus
Sæva sedens super arma, et centum vinctus ahenis
Post tergum nodis, fremet horridus ore cruento.*

VIRG. ÆN. lib. 1..

Janus himself before his fane shall wait,
And keep the dreadful issues of his gate,
With bolts and iron bars : within remains
Imprison'd Fury, bound in brazen chains :
High on a trophy rais'd of useless arms
He sits, and threatens the world with due alarms.

DRYDEN.

We are told by the old scholiast, says Eugenius, that there was actually such a statue in the temple of Janus as that Virgil has here described, which I am almost apt to believe, since you assure us that this part of the design is so often met with on ancient medals. But have you nothing to remark on the figure of the province? Her posture, says Philander, is what we often meet with in the slaves and captives of old coins: among the poets, too, sitting on the ground is a mark of misery or captivity:

*Multos illa dies incomitis mæsta capillis
Sederat.*

PROPERT. lib. i. el. 16.

O utinam ante tuos sedeam captiva penules.

Idem. lib. iv. el. 4.

O might I sit a captive at thy gate!

You have the same posture in an old coin that celebrates a victory of Lucius Verus over the Parthians*. The captive's hands are here bound behind him, as a farther instance of his slavery:

*Ecce, manus juvenem interea post terga revinctum,
Pastores magno ad regem clamore ferebant.*

VIRG. Æn. lib. 2.

Meanwhile, with shouts, the Trojan shepherds bring
A captive Greek in bands before the king. DRYDEN.

Cui dedit invicta victa noverca manus. OVID. de Fast.

Cùm rudis urgenti brachia victa dedi?

PROPERT. lib. iv. el. 3.

We may learn from Ovid that it was sometimes the

* See second series, figure 17.

custom to place a slave with his arms bound at the foot of the trophy, as in the figure before us :

Stentque super vinclos trunca trophæa viros.

OVIO. Ep. ex Ponto, lib. 4.

You see on his head the cap which the Parthians, and indeed most of the eastern nations, wear on medals. They had not probably the ceremony of veiling the bonnet in their salutations, for in medals they still have it on their heads, whether they are before emperors or generals, kneeling, sitting, or standing. Martial has distinguished them by this cap as their chief characteristic :

*Frustra, blanditiæ, venitis ad me
Attritis miserabiles labellis.
Dicturus dominum, deumque non sum :
Jam non est locus hæc in urbe vobis.
Ad Parthos procul ite pileatos,
Et turpes, humilesque supplicesque
Pictorum sola basiate regum.*

MART. lib. x. Ep. 72.

In vain, mean flatteries, ye try
To gnaw the lip, and fall the eye ;
No man a god or lord I name :
From Romans far be such a shame !
Go teach the supple Parthian how
To veil the bonnet on his brow :
Or on the ground all prostrate fling
Some Pict, before his barbarous king.

I cannot bear, says Cynthio, without a kind of indignation, the satirical reflections that Martial has made on the memory of Domitian. It is certain so ill an emperor deserved all the reproaches that could be heaped upon him, but he could not deserve them of Martial. I must confess I am less scandalised at the flatteries the epigrammatist paid him living,

than the ingratitude he showed him dead. A man may be betrayed into the one by an overstrained complaisance, or by a temper extremely sensible of favours and obligations: whereas the other can arise from nothing but a natural baseness and villany of soul. It does not always happen, says Philander, that the poet and the honest man meet together in the same person. I think we need enlarge no farther on this medal, unless you have a mind to compare the trophy on it with that of Mezentius in Virgil:

*Ingentem quercum decisis undique ramis
Constituit tumulo, fulgentiaque induit arma,
Mezenti ducis exuvias, tibi, magne, tropæum,
Bellipotens: aptat rorantes sanguine cristas,
Telaque trunca viri, et bis sex thoraca petiitum
Perfossumque locis; clypeumque ex ære sinistra
Subligat, atque ense collo suspendit eburnum.*

VIRG. ÆN. lib. 11.

He bared an ancient oak of all her boughs,
Then on a rising ground the trunk he plac'd,
Which with the spoils of his dead foe he grac'd.
The coat of arms by proud Mezentius worn,
Now on a naked snag in triumph borne,
Was hung on high; and glitter'd from afar:
A trophy sacred to the god of war.
Above his arms, fix'd on the leafless wood,
Appear'd his plumed crest, besmear'd with blood;
His brazen buckler on the left was seen;
Truncheons of shiver'd lances hung between:
And on the right was plac'd his corslet, bor'd,
And to the neck was tied his unavailing sword.

DRYDEN.

On the next medal you see the Peace^t that Vespasian procured the empire, after having happily

* ^t See second series, figure 18.

finished all its wars both at home and abroad. The woman with the olive branch in her hand is the figure of Peace:

—*Pignore Pacis*

Prædens dextrâ ramum canentis olivæ.

SIL. ITAL. lib. 3.

With the other hand she thrusts a lighted torch under a heap of armour that lies by an altar. This alludes to a custom among the ancient Romans of gathering up the armour that lay scattered on the field of battle, and burning it as an offering to one of their deities. It is to this custom that Virgil refers, and Silius Italicus has described at large:

*Qualis eram, cùm primam aciem Præneste sub ipsâ
Stravi, scutorumque incendi victor acervos.*

VIRG. ÆN. lib. 8.

Such as I was beneath Præneste's walls;
Then when I made the foremost foes retire,
And set whole heaps of conquer'd shields on fire.

DRYDEN.

*Ast, libi, bellipotens, sacrum, constructus acervo
Ingenti mons armorum consurgit ad astra :
Ipse, manu celsam pinum flumindque comantem
Attollens, ductor Gradivum in vota ciebat :
Primitias pugnae, et læti libamina belli,
Hannibal Ausonio cremat hæc de nomine victor,
Et tibi, Mars genitor, votorum haud surde meorum,
Arma electa dicat spirantium turba virorum.
Tum face coniectâ populatur fervidus ignis
Flagrantem molem ; et ruptâ caligine, in auras
Actus apex claro perfundit lumine campos.*

SIL. ITAL. lib. 10.

To thee the warrior-god, aloft in air,
A mountain pile of Roman arms they rear :
The gen'ral, grasping in his victor hand
A pine of stately growth, he wav'd the brand, "

And cried, O Mais! to thee devout I yield
 These choice first-fruits of honour's purple field.
 Join'd with the partners of my toil and praise,
 Thy Hannibal this vow'd oblation pays;
 Grateful to thee for Latian laurels won:
 Accept this homage, and absolve thy son.——
 Then to the pile the flaming torch he tost;
 In smould'ring smoke the light of heav'n is lost.
 But when the fire increase of fury gains,
 The blaze of glory gilds the distant plains.

As for the heap of arms, and mountain of arms, that the poet mentions, you may see them on two coins of Marcus Aurelius^u. *De Sarmatis* and *de Germanis* allude, perhaps, to the form of words that might be used at the setting fire to them.—*Ausonio de nomine*. Those who will not allow of the interpretation I have put on these last two medals may think it an objection, that there is no torch or fire near them to signify any such allusion. But they may consider, that on several imperial coins we meet with the figure of a funeral pile, without anything to denote the burning of it, though indeed there is on some of them a flambeau sticking out on each side, to let us know it was to be consumed to ashes.

You have been so intent on the burning of the arms, says Cynthio, that you have forgotten the pillar on your eighteenth medal. You may find the history of it, says Philander, in Ovid *de Fastis*. It was from this pillar that the spear was tossed at the opening of a war, for which reason the little figure on the top of it holds a spear in its hand, and Peace turns her back upon it:

*Prospicit à templo summum brevis arca circum:
 Est ibi non parvæ parva columna notæ.*

^u See second series, figures 19 and 20.

*Hinc solet hasta manu belli præputia, mitti,
In regem et gentes cum placet arma capi.*

OVID. de Fast. lib. 6.

Where the high fane the ample cirque commands,
A little, but a noted pillar stands,
From hence, when Rome the distant kings defies,
In form the war-denouncing javelin flies.

The different interpretations that have been made on the next medal* seem to be forced and unnatural. I will therefore give you my own opinion of it. The vessel is here represented as stranded. The figure before it seems to come in to its assistance, and to lift it off the shallows: for we see the water scarce reaches up to the knees; and though it is the figure of a man standing on firm ground, his attendants, and the good office he is employed upon, resemble those the poets often attribute to Neptune. Homer tells us, that the whales leaped up at their god's approach, as we see in the medal. The two small figures that stand naked among the waves are sea deities of an inferior rank, who are supposed to assist their sovereign in the succour he gives the distressed vessel:

*Cymothoe, simul et Triton adnirus, acuto
Detrudunt naves scopulo; levat ipse tridenti,
Et vastus aperit syrtis, et temperat æquor.*

VIRG. Æn. lib. 1.

Cymothoe, Triton, and the sea-green train
Of beauteous nymphs, the daughters of the main,
Clear from the rocks the vessels with their hands,
The god himself with ready trident stands,
And opes the deep, and spreads the moving sands.

DRYDEN.

* See second series, figure 21.

*Iam placidis rotis exstat aquis, quam gurgite ab imo
 Et Thetis, et magnis Nereus socii erigit alius,*

VAL. FLAC. lib. 1.

The interpreters of this medal have mistaken these two figures for the representation of two persons that are drowning. But as they are both naked, and drawn in a posture rather of triumphing over the waves than of sinking under them, so we see abundance of water deities on other medals represented after the same manner :

*Itc, deæ vides, liquidosque advertite vultus
 Et vitreum teneris cinem redimite conymbis,
 Veste nihil tectæ quales emergitis altis
 Fontibus, et visu satyros torquetis amantes.*

STATIUS de Balneo Etrusci, lib. 1

Haste, haste, ye Naiads, with attractive art
 New charms to ev'ry native grace impart
 With op'ning flow'rets bind your sea-green hair,
 Unveil'd, and naked let your limbs appear
 So from the springs the satyrs see you rise,
 And drink eternal passion at their eyes.

After having thus far cleared our way to the medal, I take the thought of the reverse to be this The stranded vessel is the commonwealth of Rome, that, by the tyranny of Domitian, and the insolence of the pretorian guards under Nerva, was quite run aground and in danger of perishing. Some of those embarked in it endeavour at her recovery, but it is Trajan that, by the adoption of Nerva, stems the tide to her relief, and, like another Neptune, shoves her off the quicksands. Your device, says Eugenius, hangs very well together ; but is it not liable to the same exceptions that you made us last night to such explanations as have nothing but the writer's imagina-

tion to support them? To show you, says Philander, that the construction I put on this medal is conformable to the fancies of the old Romans, you may observe, that Horace represents at length the commonwealth of Rome under the figure of a ship, in the allegory that you meet with in the fourteenth ode of his first book :

*O navis, referent in mare te novi
Fluctus.*—————

And shall the raging waves again
Bear thee back into the main ?

CREECH.

Nor was anything more usual than to represent a god in the shape and dress of an emperor :

—————*Apelleæ cuperent te, scribere cera,
Optassetque novo similem te ponere templo
Atticus Flei senior Jovis ; et tua mitis ,
Ora Taras : tua sidereas imitantia flammæ
Lumina, contempto mallet Rhodæ aspera Phœbo.*

STATIUS de Equo Domitiani, Sylv. 1.

Now had Apelles liv'd, he'd sue to grace
His glowing tablets with thy godlike face ·
Phidias, a sculptor for the pow'rs above,
Had wish'd to place thee with his iv'ry Jove.
Rhodes and Tarentum, that with pride survey,
The thund'rer this, and that the god of day ;
Each fam'd Colossus would exchange for thee,
And own thy form the loveliest of the three.

For the thought in general, you have just the same metaphorical compliment to Theodosius in Claudian, as the medal here makes to Trajan :

*Nulla relictæ foret Romani nominis umbra
Ni pater ille tuus jam jam ruitura subisset*

*Pondera, turbatamque rulem, ceratque levasset
Naufragium commune manu.*

CLAUD. de Quarto Cons. Hon.

Had not thy sire deferr'd th' impending fate,
And with his solid virtue propp'd the state ;
Sunk in oblivion's shade, the name of Rome,
An empty name ! had scarce surviv'd her doom :
Half wreck'd she was, till his auspicious hand
Resum'd the rudder, and regain'd the land.

I shall only add, that this medal was stamped in honour of Trajan, when he was only Cæsar, as appears by the face of it . . . SARI TRAIANO.

The next is a reverse of Marcus Aurelius^y. We have on it a Minerva mounted on a monster, that Ausonius describes in the following verses :

*Ille etiam Thalamos per trina anigmata quærens
Qui bipes, et quadrupes foret, et tripes omnia solus ;
Terruit Aoniam volucris, leo, virgo ; triformis
Sphinx, volucris pennis, pedibus fera, fronte puella.*

To form the monster sphinx, a tuple kind,
Man, bird, and beast by nature were combin'd :
With feather'd fans she wing'd th' aerial space ;
And on her feet the lion claws disgrace
The bloomy features of a virgin face.

O'er pale Aonia panic horror ran,
While in mysterious speech she thus began :
" What animal, when yet the morn is new,
" Walks on four legs infirm ; at noon on two :
" But day declining to the western skies,
" He needs a third ; a third the night supplies ?"

The monster, says Cynthio, is a sphinx, but for her meaning on this medal, I am not Cædipus enough to unriddle it. I must confess, says Philander, the poets fail me in this particular. There is, however, a passage in Pausanias that I will repeat to you,

^y See second series, figure 22 :

though it is in prose, since I know nobody else that has explained the medal by it. The Athenians, says he, drew a sphinx on the armour of Pallas, by reason of the strength and sagacity of this animal. The sphinx, therefore, signifies the same as Minerva herself, who was the goddess of arms as well as wisdom, and describes the emperor as one of the poets expresses it :

——— *Studiis florentem utrumque Minervæ.*

Whom both Minervas boast t' adopt their own. -

The Romans joined both devices together, to make the emblem the more significant, as indeed they could not too much extol the learning and military virtues of this excellent emperor, who was the best philosopher and the greatest general of his age.

We will close up this series of medals with one that was stamped under Tiberius to the memory of Augustus². Over his head you see the star that his father Julius Cæsar was supposed to have been changed into :

Ecce Dionæi processit Cæsaris astrum. VIRG. ecl. 9.

See, Cæsar's lamp is lighted in the skies. DRYDEN.

-*Micat inter omnes
Julium sidus, velut inter ignes
Luna minores :* HOR.

-Julius Cæsar's light appears
As, in fair nights and smiling skies,
The beauteous moon amidst the meaner stars.
CREECH.

See second series, figure 23.

*Vir ea fatus erat ; mediâ cùm sede senatûs
 Constitit alma Venus, nulli cernenda, suique
 Cæsaris eripuit membris, nec in aera solvi
 Passa recentem animam, cœlestibus intulit astris.
 Dumque tulit, lumen capere, atque ignescere sensit,
 Emititque sinu. Lunda volat altius illa,
 Flammiferumque trahens spatioso limite crinem
 Stella micat.*

OVID. Met. lib. 15.

This spoke; the goddess to the senate flew;
 Where, her fair form conceal'd from mortal view,
 Her Cæsar's heav'nly part she made her care,
 Nor left the recent soul to waste to air;
 But bore it upwards to its native skies:
 Glowing with new-born fires she saw it rise;
 Forth springing from her bosom up it flew,
 And, kindling as it soar'd, a comet grew;
 Above the lunar sphere it took its flight,
 And shot behind it a long tail of light.

WILSTED.

Virgil draws the same figure of Augustus on Æneas's shield as we see on this medal. The commentators tell us, that the star was engraven on Augustus's helmet, but we may be sure Virgil means such a figure of the emperor as he used to be represented by in the Roman sculpture, and such a one as we may suppose this to be that we have before us:

*Hinc Augustus agens Italos in prælia Cæsar,
 Cum patribus, populoque, penetibus et magnis diis,
 Stans celsâ in puppi; geminas cui tempora flammæ
 Lata lœmunt, patrumque aperitur vertice sidus.*

VIRG. ÆN. lib. 8.

Young Cæsar on the stern in armour bright,
 Here leads the Romans, and the gods, to fight:
 His beamy temples shoot their flames afar:
 And o'er his head is hung the Julian star.

DRYDEN.

The thunderbolt that lies by him is a mark of his apotheosis, that makes him, as it were, a companion of Jupiter. Thus the poets of his own age that deified him living:

Divisum Imperium cum Jove Cæsar habet. VIRG.

Hic socium summo cum Jove numen habet. OVID.

—*Regit Augustus socio per signa Tonante.*

MANIL. lib. 1.

*Sed tibi debetur cæsum, te fulmine pollens,
Accipiet cupidi regia magna Jovis.*

OVID. de Augusto ad Liviam.

He wears on his head the *corona radiata*, which, at that time, was another type of his divinity. The spikes that shoot out from the crown were to represent the rays of the sun. There were twelve of them, in allusion to the signs of the zodiac. It is this kind of crown that Virgil describes:

—*Ingenti mole Latinus,
Quadrifugo vehitur curru, cui tempora circum
Aurati bis sex radii fulgentia cingunt,
Solis avi specimen.* —————

ÆN. lib. 12.

Four steeds the chariot of Latinus bear:
Twelve golden beams around his temples play,
To mark his lineage from the god of day. DRYDEN.

If you would know why the *corona radiata* is a representation of the sun, you may see it in the figure of Apollo on the next reverse^a, where his head is encompassed with such an arch of glory as Ovid and Statius mention, that might be put on and taken off at pleasure:

^a See second series, figure 24.

—*At genitor circum caput omne micantes
Deposuit radias.*—

OVID. Met. lib. 2.

The tender sire was touch'd with what he said,
And flung the blaze of glories from his head.

Imposuitque comæ radies.—

Ibid.

'Then fix'd his beamy circle on his head.

—*Licet ignipedum frænator equorum
Ipse tuis alie radiantem crinibus arcum
Imprimat.*—

STAT. Theb. ad Domitianum, lib. 1.

Though Phœbus longs to mix his rays with thine,
And in thy glories more serenely shine. POPE.

In his right hand he holds the whip with which he is supposed to drive the horses of the sun: as in a pretty passage of Ovid, that some of his editors must needs fancy spurious:

*Colligit amentes, et adhuc terrore parentes,
Phæbus equos, stimuloque dolens et verberare sævit:
Sæviti enim, natumque objectat, et imputat illis.*

OVID. Met. lib. 2.

Prevail'd upon at length, again he took
The harness'd steeds, that still with horror shook,
And plies them with the lash, and whips them on,
And, as he whips, upbraids them with his son.

The double-pointed dart in his left hand is an emblem of his beams, that pierce through such an infinite depth of air, and enter into the very bowels of the earth. Accordingly, Lucretius calls them the darts of the day, as Ausonius, to make a sort of witticism, has followed his example:

Non radii solis, neque lucida tela diei.

LUCRET.

*Exsultant udae super arida saxa rapinae,
Luciferique pavent letali tela diei.*

AUSON. Idyll. 10.

*Caligo terræ scinditur,
Percussa solis spiculo.*

PRUDENT. Hym. 2.

I have now given you a sample of such emblematical medals as are unriddled by the Latin poets, and have shown several passages in the Latin poets that receive an illustration from medals. Some of the coins we have had before us have not been explained by others, as many of them have been explained in a different manner. There are, indeed, others that have had very near the same explication put upon them; but as this explication has been supported by no authority, it can at best be looked upon but as a probable conjecture. It is certain, says Eugenius, there cannot be any more authentic illustrations of Roman medals, especially of those that are full of fancy, than such as are drawn out of the Latin poets. For as there is a great affinity between designing and poetry, so the Latin poets and the designers of the Roman medals lived very near one another, were acquainted with the same customs, conversant with the same objects, and bred up to the same relish for wit and fancy. But who are the ladies that we are next to examine? These are, says Philander, so many cities, nations, and provinces that present themselves to you under the shape of women. What you take for a fine lady at first sight, when you come to look into her will prove a town, a country, or one of the four parts of the world. In short, you have now Africa, Spain, France, Italy, and several other nations of the earth

before you. This is one of the pleasantest maps, says Cynthio, that I ever saw. Your geographers now and then fancy a country like a leg or a head, a bear or a dragon, but I never before saw them represented like women. I could not have thought your mountains, seas, and promontories could have made up an assembly of such well-shaped persons. This, therefore, says Philander, is a geography particular to the medallists. The poets, however, have sometimes given in to it, and furnish us with very good lights for the explication of it. The first lady you see on the list is Africa^a, she carries an elephant's tooth by her side :

*Dentibus ex illis, quos mittit porta Syencs,
Et Mauri celeres, et Mauro obscurior Indus.
Et quos deposuit Nabathæo bellua saltru,
Jam nimius captique graves.*———

Juv. Sat. 11.

She is always coiffed with the head of an elephant, to show that this animal is the breed of that country, as for the same reason she has a dragon lying at her feet :

*Huic varias pestes, diversaque membra ferarum,
Concessit bellis natura infesta futuri;
Horrendos angues, habitataque membra veneno
Et mortis partus, viventia crimina terræ:
Et vastos elephantes habet, sævosque leones,
In pænas facunda suas, parit horrida tellus.*

MANIL. de Africa, lib. 4.

Here nature, angry with mankind, prepares
Strange monsters, instruments of future wars;
Here snakes, those cells of poison, take their birth,
Those living crimes and grievance of the earth;
Fruitful in its own plagues, the desert shore
Hears elephants, and frightful lions roar. CREBCH.

^a See third series, figure 1.

Lucan, in his description of the several noxious animals of this country, mentions in particular the flying dragon that we see on this medal:

*Vos quoque, qui cunctis innoxia numina terris
Serpitis, aurato nitidi fulgore dracones,
Pestiferos ardens facit Africa: ducitis allum
Aera cum pennis, armentaque tota secuti
Rumpitis ingentes amplexi verberare tauros
Nec tutus spatium est elephas, datis omnia letho:
Nec vobis opus est ad noxia fata veneno.* Luc. lib. 9.

And you, ye dragons! of the scaly race,
Whom glittering gold and shining armours grace,
In other nations harmless are you found,
Their guardian genii and protectors own'd:
In Afric only are you fatal; there,
On wide-expanded wings, sublime you rear
Your dreadful forms, and drive the yielding air.
The lowing kine in droves you chase, and cull
Some master of the herd, some mighty bull:
Around his stubborn sides your tails you twist,
By force compress, and burst his brawny chest.
Not elephants are by their larger size
Securo, but with the rest become your prize.
Resistless in your might, you all invade,
And for destruction need not poison's aid. Rowz.

The bull that appears on the other side of the dragon, shows us that Africa abounds in agriculture:

———*Tibi habet frumentum, Alledius inquit,
O Libye; disjunge boves, dum tubera mittas.* Juv. Sat. 5.

—No more plough up the ground,
O Libya, where such mushrooms can be found,
Alledius cries, but furnish us with store
Of mushrooms, and import thy corn no more. Bowles.

This part of the world has always on medals something to denote her wonderful fruitfulness, as it was, indeed, the great granary of Italy. In the two following figures, the handful of wheat, the cornucopia, and basket of corn, are all emblems of the same signification:

*Sed quæ se campis squalentibus Africa tendit,
Serpentum largo coquitur Jacunda veneno.
Felix, quæ pingues mitis pinguat temperat agros;
Nec Cerere Ennæd, Phurio nec victa colono.*

SIL. ITAL. lib. 1.

Frumenti quantum metit Africa.————

HOR. lib. ii. Sat. 3.

—————*Segetes mirantur Iberas
Horrea; nec Libyæ senserunt damna rebellis
Jam Transalpinæ contenti messe quirites.*

CLAUD. in Eutrop. lib. 1.

The lion on the second medal^b marks her out for the

—*Leon*
Arida nutrit.

HOR.

The scorpion^c on the third is another of her productions, as Lucan mentions it in particular, in the long catalogue of her venomous animals:

—*Quis fata putaret
Scorpion, aut vires maturæ mortis habere?
Ille minax nodis, et recto verberare sævus,
Teste tulit calo victi decus Orionis.*

LUC. lib. 9.

Who, that the scorpion's insect form surveys,
Would think that ready death his call obeys?

^b See third series, figure 2.

^c Ibid. figure 3.

Threat'ning he rears his knotty tail on high,
 The vast Orion thus he doom'd to die,
 And fix'd him, his proud trophy, in the sky. ROWE.

The three figures you have here shown us, says Eugenius, give me an idea of a description or two in Claudian, that I must confess I did not before know what to make of. They represent Africa in the shape of a woman, and certainly allude to the corn and headdress that she wears on old coins :

————— *Mediis apparet in astris*
Africa : rescissæ vestes, et spicea passim
Serta jacent : lacera crinales vertice dentes,
Et fractum pendebat ebur.—

CLAUD. de Bel. Gild.

Next Afric, mounting to the blest abodes,
 Pensive approach'd the synod of the gods :
 No arts of dress the weeping dame adorn ;
 Her garments rent, and wheaten garlands torn ;
 The fillets, grac'd with teeth in ivory rows,
 Broke and disorder'd dangle on her brows.

Tum spicis et dente comas illustris eburno,
Et calido rubicunda die, sic Africa fatur.

CLAUD. de Laud. Stil. lib. 2.

I think, says Philander, there is no question but the poet has copied out in his description the figure that Africa made in ancient sculpture and painting. The next before us is Egypt^d. Her basket of wheat shows us the great fruitfulness of the country, which is caused by the inundations of the Nile :

Syrtilibus hinc Libycis tuta est Ægyptus : at inde
Gurgite septeno rapidus mare summovet amnis :
Terra suis contenta bonis, non indiga mercis
Aut Jovis, in solo tanta est fiducia Nilo. LUC. lib. 8.

^d See third series, figure 4.

By nature strengthen'd with a dangerous strand,
 Her syrts and untried channels guard the land,
 Rich in the fatness of her plenteous soil,
 She plants her only confidence in Nile.

ROWE.

The instrument in her hand is the *sistrum* of the Egyptians, made use of in the worship of the goddess Isis:

—*Nilotica sistris*

Ripa sonat. —

CLAUD. de Quarto Cons. Hon.

On medals you see it in the hand of Egypt, of Isis, or any of her worshippers. The poets, too, make the same use of it, as Virgil has placed it in Cleopatra's hand, to distinguish her from an Egyptian:

Regina in medius patrio vocat agmina sistro.

VIRG. ÆN. lib. 8.

The queen herself, amidst the loud alarms,
 With cymbals toss'd, her fainting soldiers warms.

DRYDEN.

— *Restabant Actia bella,
 Atque ipsa Isiaco certarunt fulmina sistro.*

MANIL. lib. 1.

— *Imitataque lunam
 Cornua fulserunt, crepuitque sonabile sistrum.*

OVID. Met. de Iside, lib. 9.

— The lunar horns, that bind
 The brows of Isis, cast a blaze around;
 The trembling timbrel made a murm'ring sound.

DRYDEN.

*Quid tua nunc Isis tibi, Delia? quid mihi prosunt
 Illa tuâ toties æra repulsa manu?* TIBUL. lib. i. el. 3.

*Nos in templa tuam Romana accepimus Isin,
 Semideosque canes, et sistra iuventia luctus.*

LUCAN. lib. 8.

Have we with honours dead Osiris crown'd,
 And mourn'd him to the tumbrel's tinkling sound ?
 Receiv'd her Isis to divine abodes,
 And rank'd her dogs deform'd, with Roman gods ?

ROWL.

The bird before her is the Egyptian ibis. This figure, however, does not represent the living bird, but rather an idol of it, as one may guess by the pedestal it stands upon, for the Egyptians worshipped it as a god :

*Quis nescit, Volusi Bithynice, qualia demens
 Ægyptus portenta colat ? Crocodilon adorat
 Pars hæc : illa pavet saturam serpentibus ibin.
 Effigies sacri nitet aurea cercopitheci.* Juv. Sat. 15.

How Egypt, mad with superstition grown,
 Makes gods of monsters, but too well is known :
 One sect devotion to Nile's serpent pays ;
 Others to ibis, that on serpents preys.
 Where, Thebes, thy hundred gates lie unrepair'd,
 And where maim'd Memnon's magic harp is heard,
 Where these are mould'ring left, the sots combine
 With pious care a monkey to enshrine. TATE.

*Venerem preearis ? Comprecare et simiam.
 Placet sacratus aspis Æsculapii ?
 Crocodilus, ibis, et canis cur displicent ?*

PRUDENTIUS, Passio Romani.

We have Mauritania on the fifth medal^e, leading a horse with something like a thread, for where there is a bridle in old coins you see it much more distinctly. In her other hand she holds a switch. We have the design of this medal in the following descriptions, that celebrate the Moors and Numidians, inhabitants of Mauritania, for their horsemanship :

^e See third series, figure 5.

*Illic passim ersultant Numidæ, gens inscia freni:
Queis inter geminas per ludum nobilis aures
Quadrupedem flectit non cedens virga lupatis.
Altria bellorum bellatorumque virorum
Tellus.*—————

SIL. ITAL. lib. 1.

On his hot steed, unus'd to curb or rein,
The black Numidian prances o'er the plain:
A wand betwixt his ears directs the course,
And, as a bridle, turns th' obedient horse.

—————*An Mauri fremitum ruucosque repulsus
Umbonum, et nostros passuri, cominus enses?
Non contra clypeis tectos, galeisque micantes
Ibitis; in solis longè fiducia telis.
Exarmatus erit, cum missile torserit, hostis.
Dextra movet jaculum, prætentat pallia læva,
Cætera nudus eques. Sonipes ignarus habena:
Virga regit. Non ulla fides, non agminis ordo;
Arma oneri.*—————

CLAUD. de Bel. Gildon.

Can Moors sustain the press, in close-fought fields,
Of shorten'd falchions and repelling shields?
Against a host of quiv'ring spears ye go,
Nor helm nor buckler guards the naked foe;
The naked foe who vainly trusts his art,
And flings away his armour in his dart:
His dart the right hand shakes, the left uprears
His robe; beneath his tender skin appears.
Their steeds unrein'd obey the horseman's wand,
Nor know their legions when to march or stand;
In the war's dreadful laws untaught and rude,
A mob of men, a martial multitude.

The horse, too, may stand as an emblem of the war-
like genius of the people:

Bello armantur equi, bellum hæc armenta minantur.

VIRG. Æn. lib. 3.

From Africa we will cross over into Spain. There are learned medallists that tell us the rabbit^c, which you see before her feet, may signify either the great multitude of these animals that are found in Spain, or perhaps the several mines that are wrought within the bowels of that country, the Latin word *cuniculus* signifying either a rabbit or a mine. But these gentlemen do not consider, that it is not the word but the figure that appears on the medal. *Cuniculus* may stand for a rabbit or a mine, but the picture of a rabbit is not the picture of a mine. A pun can be no more engraven than it can be translated. When the word is construed into its idea, the double meaning vanishes. The figure, therefore, before us, means a real rabbit, which is there found in vast multitudes:

Cuniculose Celtiberiæ fili.

CARUL. in Egnatium,

The olive branch tells us, it is a country that abounds in olives, as it is for this reason that Claudian, in his description of Spain, binds an olive branch about her head:

—Glaucis tum prima Minervæ
Nexa comam foliis, fulvæque intexta micantem
Veste Tagum, tales profert Hispania voces.

CLAUD. de Laud. Stil. lib. 2.

Thus Spain, whose brows the olive wreaths enfold,
And o'er her robe a Tagus streams in gold.

Martial has given us the like figure of one of the greatest rivers in Spain:

Batis oliviferâ crinem redunite coronâ,
Aurea qui nitidis vellerâ tingis aquis
Quem Bromus quem Pallas amat.—MART. lib. xii. Ep. 99.

^c See third series, figure 6.

Fair Bœtis! olives wreath thy azure locks ;
In fleecy gold thou cloth'st the neighb'ring flocks
Thy fruitful banks with rival bounty smile,
While Bacchus wine bestows, and Pallas oil.

And Prudentius of one of its eminent towns :

*Tu decem sanctos revehes et octo,
Cæsar augusta studiosa Christi,
Terticem flavis oleis revincta
Pacis honore.*

PRUDENT. Hymn. vii.

France^g, you see, has a sheep by her, not only as a sacrifice, but to show that the riches of the country consisted chiefly in flocks and pasturage. Thus Horace, mentioning the commodities of different countries :

*Quæquam nec Calabrix mella ferunt apes,
Nec Lætrigoniâ Bacchus in amphorâ
Languescit mihi, nec pingua Gallus
Crescunt velleru pascuis.*

HOR. lib. iii. Od. 16.

Though no Calabrian bees do give
Their grateful tribute to my hive,
No wines, by rich Campagna sent,
In my ignoble casks ferment,
No flocks in Gallic plains grow fat.—

CREECH.

She carries on her shoulders the *sagulum* that Virgil speaks of as the habit of the ancient Gauls :

*Aurea cæsaries ollis, atque aurea vestis
Vingulis lucent sagulis.*—————

VIRG. ÆN. lib 8.

^g See third series, figure 7.

The gold dissembled well their yellow hair ;
 And golden chains on their white necks they wear ;
 Gold are their vests. —————

DRYDEN.

She is drawn in a posture of sacrificing for the safe arrival of the emperor, as we may learn from the inscription. We find in the several medals that were struck on Adrian's progress through the empire, that, at his arrival, they offered a sacrifice to the gods for the reception of so great a blessing. Horace mentions this custom :

*Tum meæ (si quid loquar audiendum)
 Votis accedet bona pars ; et O sol
 Pulcher, ô laudande, canam recepto
 Cæsare felix.* —————

*Tæ decem tauri, totidemque vaccæ ;
 Me tener solvet vitulus.* ————— HON. lib. iv. Od. 2.

And there, if any patient ear
 My muse's feeble song will hear,
 My voice shall sound through Rome :
 Thee, sun, I'll sing, thee, lovely fair,
 Thee, thee I'll praise, when Cæsar's come. —

Ten large fair bulls, ten lusty cows,
 Must die, to pay thy richer vows ;
 Of my small stock of kine
 A calf just wean'd. —————

CREECH.

Italy has a cornucopia in her hand, to denote her fruitfulness^h ;

——— *Magna parens frugum Saturnia tellus.*

VIRG. Georg. 3.

and a crown of towers on her head, to figure out the

^h See third series, figure 8.

many towns and cities that stand upon her. Lucan has given her the like ornament, where he represents her addressing herself to Julius Cæsar :

*Ingens visa duci patris trepidantis imago ;
Clara per obscuram vultu maestissima noctem,
Turrigero canos effundens vertice crines
Cæsaria lacerâ, nudisque adstare lacertis,
Et gemitu permista loqui.*—

LUCAN, lib. 1.

Amidst the dusky horrors of the night,
A wondrous vision stood confest to sight ;
Her awful head Rome's rev'rend image rear'd,
Trembling and sad the matron form appear'd ;
A tow'ry crown her hoary temples bound,
And her torn tresses rudely hung around :
Her naked arms uplited ere she spoke,
Then groaning, thus the mournful silence broke.

ROWE.

She holds a sceptre in her other hand, and sits on a globe of the heavens, to show that she is the sovereign of nations, and that all the influences of the sun and stars fall on her dominions. Claudian makes the same compliment to Rome :

Ipsa triumphatis quæ possidet æthere regnis.

CLAUD. in Prob. et Olyb. Cons.

*Jupiter arce suâ totum dum spectat in orbem,
Nil nisi Romanum quod tueatur habet.*

OVID. de Fast. lib. 1.

Jove finds no realm, when he the globe surveys,
But what to Rome submissive homage pays.

*Orbem jam totum victor Romanus habebat,
Quâ mare, quâ tellus, quâ sidus currit utrumque.*

PETRON.

Now Rome, sole empress, reigns from pole to pole,
Wherever earth extends, or oceans roll.

The picture that Claudian makes of Rome one would think was copied from the next medal¹:

—Innuptæ ritus imitata Minervæ:
Nam nequæ cæsariem crinali stringere cultu,
Colla nec ornata patitur mollire retorto
Dextrum nuda latus, niveos everta laceratos,
Audacem reteggit mammas, larumque coercens
Mordet gemma sinum. —————
Clypeus Tritona lacessit
Lumine, quem totâ variat arte Mulciber arte,
Hic, patrius Mavoris amor, factusque notantur
Romulei, post amnis inest, et bellua nutrit.

CLAUD. in Prob. et Olyb Cons.

No costly fillets knot her hair behind,
Nor female trinkets round her neck are twin'd.
Bold on the right her naked arm she shows,
And half her bosom's unpolluted snows,
Whilst on the left is buckled o'er her breast,
In diamond clasps, the military vest.
The sun was dazzled as her shield she rear'd,
Where, varied o'er by Mulciber, appear'd
The loves of Mars her sire, fair Itha's joys,
The wolf, the Tiber, and the infant boys.

The next figure is Achaia^k.

I am sorry, says Cynthio, to find you running farther off us. I was in hopes you would have shown us our own nation, when you were so near us as France. I have here, says Philander, one of Augustus's Britannias^l. You see she is not drawn like other countries, in a soft peaceful posture, but is adorned with emblems that mark out the military

^l See third series, figure 9.
See third series, figure 11.

^k Ibid. figure 10.

genius of her inhabitants. This is, I think, the only commendable quality that the old poets have touched upon in the description of our country. I had once made a collection of all the passages in the Latin poets, that give any account of us, but I find them so very malicious, that it would look like a libel on the nation to repeat them to you. We seldom meet with our forefathers, but they are coupled with some epithet or another to blacken them. Barbarous, cruel, and inhospitable, are the best terms they can afford us, which it would be a kind of injustice to publish, since their posterity are become so polite, good-natured, and kind to strangers. To mention, therefore, those parts only that relate to the present medal. She sits on a globe that stands in water, to denote that she is mistress of a new world, separate from that which the Romans had, before conquered, by the interposition of the sea. I think we cannot doubt of this interpretation, if we consider how she has been represented by the ancient poets :

Et penitus toto divisos orbe Britannos. VIRG. ecl. 1.

The rest among the Britons be confin'd,
A race of men from all the world disjoin'd. DRYDEN.

*Adspice, confundit populos impervia tellus
Conjunctum est, quod adhuc orbis, et orbis erat.*
CATUL. Vet. Poet. apud Scalig.

At nunc oceanus geminos interluit orbes.
Idem, de Britannia et Opposito Continente.

— *Nostro diducta Britannia mundo.* CLAUD.

*Nec stetit oceano, remisque ingressa profundum,
Vincendos alio quæsit in orbe Britannos.* CLAUD.

The feet of Britannia are washed by the waves, in the same poet :

*—Cujus vestigia verrit
Cærulæ, oceanique æstum mentitur, amictus.*
Idem, de Laud. Stil. lib. 2.

She bears a Roman ensign in one of her hands, to confess herself a conquered province :

*—Victricia Cæsar
Signa Caledonios transverit ad usque Britannos.*
SIDON. APOL.

But to return to Achaia^m, whom we left upon her knees before the emperor Adrian. She has a pot before her, with a sprig of parsley rising out of it. I will not here trouble you with a dull story of Hercules's eating a sallad of parsley for his refreshment, after his encounter with the Nemean lion. It is certain there were in Achaia the Nemean games, and that a garland of parsley was the victor's reward. You have an account of these games in Ausonius :

*Quattuor antiquos celebravit Achaia ludos,
Cælicolûm duo sunt, et duo festa hominum.
Sacra Jovis, Phæbique, Palæmonis, Archemorique :
Serta quibus pinus, malus, oliva, apium.*
AUSON. de Lustral. Agon.

Greece, in four games thy martial youth were train'd ;
For heroes two, and two for gods ordain'd :
Jove bade the olive round his victor wave ;
Phœbus to his un apple garland gave ;

^m See third series, figure 10.

The pine, Palæmon; nor with less renown,
Archemorus conferr'd the paisley crown.

Archemori Nemææ colunt funebria Thebæ.

Idem, de locis Agon.

——— *Alcidis Nemææ sacravit honorem.*

Idem, de Auct. Agon.

One reason why they chose parsley for a garland,
was doubtless because it always preserves its verdure, as Horace opposes it to the short-lived lily:

Neu vivax apium, nec breve lilium.

Lib. i. Od. 36.

Let fading lilies and the rose
Their beauty and their smell disclose;
Let long-liv'd parsley grace the feast,
And gently cool the heated guest.

CREECH.

Juvenal mentions the crown that was made of it,
and which here surrounds the head of Achaia:

——— *Graiaque apium meruisse coronæ.* JUV. Sat. 8.

And winning at a wake their parsley crown. STEPNEY.

She presents herself to the emperor in the same
posture that the Germans and English still salute
the imperial and royal family:

——— *Sus imperiumque Phraates
Cæsaris accepit genibus minor.*———

HOR. Epist. 12. lib. i.

The haughty Parthian now to Cæsar kneels. CREECH.

*Ille qui donat diadema fronti
Quem genu nixæ tremuere gentes.*

SENEC. Thyest. Act. 3.

-Non, ut inflexo genu,
Regnaudem adores, petimus. SENECA. Thyest. Act. 3.

*Te linguis variæ gentes, missique rogatum
Fœdera Persarum proceres cum patre sedentem,
Hac quondam videre domo ; positæque turæ
Submisere genu.* _____

CLAUD. ad Honorium.

Thy infant virtue various climes admir'd,
And various tongues to sound thy praise conspir'd :
Thee next the sovereign seat, the Persians view'd,
When in this regal dome for peace they sued :
Each turban low, in sign of worship, wav'd ;
And every knee confess'd the boon they crav'd.

Sicily appears before Adrian in the same postureⁿ.
She has a bundle of corn in her hand, and a garland
of it on her head, as she abounds in wheat, and was
consecrated to Ceres :

*Utraque frugiferis est insula nobilis arvis :
Nec plus Hesperiam longinquis messibus ullæ,
Nec Romana magis compleverunt horrea terræ.*

LUC. de Sicilia et Sardinia, lib. 2.

Sardinia, too, renown'd for yellow fields,
With Sicily her bounteous tribute yields ;
No lands a glebe of richer tillage boast,
Nor waft more plenty to the Roman coast. ROWE.

*Terra tribus scopulis vastum procurrit in æquor
Trinacris, à positu nomen adepta loci.
Grata domus Cereri ; multas ibi possidet urbes ;
In quibus est culto fertilis Henna solo.*

OVID. de Fast. lib. 4.

To Ceres dear, the fruitful land is fam'd
For three tall capes, and thence Trinacria nam'd :

ⁿ See third series, figure 12.

There Henna well rewards the tiller's toil,
The fairest champaign of the fairest isle.

We find Judæa on several coins of Vespasian and Titus, in a posture that denotes sorrow and captivity°. The first figure of her is drawn to the life, in a picture that Seneca has given us of the Trojan matrons bewailing their captivity :

-Paret exertos
Tumba laceratos. Veste remissa
Substringe sinus, utroque tenuis
Pateant artus.—————
—————*Cadat ex humeris*
Vestis apertis: innumque tegat
Suffulta latus. Jam nuda vocant
Pectora detras. Nunc nuno vires
Exprope, dolor, tuas.

SEN. Troas, Hecuba ad Trojan. Chor. Act. 1.

—————Bare
Your arms, your vestures slackly tied
Beneath your naked bosoms, slide
Down to your waists.—————

—————Let
From your divested shoulders slide
Your garments down on either side.
Now bared bosoms call for blows,
Now, sorrow, all thy pow'rs disclose.

SIR ED. SHIRBURN.

—————*Apertæ pectora matres*
Significant luctum.—————

OVID. Met. lib. 13.

Who bared their breasts, and gave their hair to flow :
The signs of grief, and mark of public woe.

° See third series, figure 13.

The head is veiled in both figures, as another expression of grief :

—— *Ipsa tristi vestis obtentu caput
Velata, juxta præsides astat deos.*

SEN. HEIC. FUR. ACT. 2.

*Sic ubi fata, caput ferali obducit amictu,
Decrevitque pati tenebras, puppisque cavernis
Delituit : sævumque arcte complecti dolorem
Perfruitur lacrymis, et amat pro conjuge luctum.*

LUC. DE CORNELIA, lib. 9.

So said the matron ; and about her head
Her veil she draws, her mournful eyes to shade :

Resolv'd to shroud in thickest shades her woe,
She seeks the ship's deep darksome hold below :
There lonely left, at leisure to complain,
She hugs her sorrows, and enjoys her pain ;
Still with fresh tears the living grief would feed,
And fondly loves it, in her husband's stead. ROWL.

I need not mention her sitting on the ground, because we have already spoken of the aptness of such a posture to represent an extreme affliction. I fancy, says Eugenius, the Romans might have an eye on the customs of the Jewish nation, as well as of those of their country, in the several marks of sorrow they have set on this figure. The Psalmist describes the Jews lamenting their captivity in the same pensive posture. "By the waters of Babylon we sat down and wept, when we remembered thee, O Sion." But what is more remarkable, we find Judæa represented as a woman in sorrow sitting on the ground, in a passage of the prophet that foretels the very captivity recorded on this medal. The covering of the head, and the rending of garments, we find very often in holy scripture, as the expres-

sions of raging grief. But what is the tree we see on both these medals? We find, says Philander, not only on these, but on several other coins that relate to Judæa, the figure of a palm tree, to show us that palms are the growth of the country. Thus Silius Italicus, speaking of Vespasian's conquest; that is the subject of this medal:

Palmaferamque senex bello domitabit Idumen.

SIL. ITAL. lib. 3.

Martial seems to have hinted at the many pieces of painting and sculpture that were occasioned by this conquest of Judæa, and had generally something of the palm tree in them. It begins an epigram on the death of Scorpis a chariot driver, which, in those degenerate times of the empire, was looked upon as a public calamity:

*Tristis Idumæus frangat Victoria palmas ;
Plange FAVOR sæva pectora nuda manu.*

MART. lib. x. Ep. 50.

The man by the palm tree in the first of these medals, is supposed to be a Jew with his hands bound behind him.

I need not tell you that the winged figure on the other medal is Victory^P. She is represented here as on many other coins, writing something on a shield. We find this way of registering a victory touched upon in Virgil and Silius Italicus:

*Æra cavo clypeum, magni gestamen Abantis,
Postibus adversis figo, et rem carmine signo ;
Æneas hæc de Danaïis victoribus arma.*

VIRG. ÆN. lib. 3.

^P See third series, figure 14.

I fix'd upon the temple's lofty door
 The brazen shield which vanquish'd Abas bore :
 The veise beneath my namo and actions speaks,
 " These arms Æneas took from conq'ring Greeks."

DRYDEN.

*Pyrenes tumulo clypeum cum carmine figunt ;
 Hasdrubalis spoliū gradivo Scipio victor.*

SIL. ITAL. lib. 15.

High on Pyrene's airy top they plac'd
 The captive shield, with this inscription grac'd :
 " Sacred to Mars, these votive spoils proclaim
 " The fate of Hasdrubal, and Scipio's fame."

Parthia has on one side of her the bow and quiver which are so much talked of by the poets^a. Lucan's account of the Parthians is very pretty and poetical:

*—Parthoque sequente
 Murus erit, quodcunque potest obstare sagittæ.—
 Illita tela dolis, nec Martem cominus unquam
 Ausa pati virtus, sed longè tendere nervos,
 Et, quo ferre velint, permittere vulnera ventis.*

LUCAN, lib. 8.

Each fence, that can their winged shafts endure,
 Stands, like a fort, impregnable, secure.—
 To taint their coward darts is all their care,
 And then to trust them to the flitting air.

ROWE.

—Sagittiferosque Parthos.

CATUL.

The crown she holds in her hand refers to the crown of gold that Parthia, as well as other provinces, presented to the emperor Antonine. The presenting a crown was the giving up the sovereignty into his hands:

^a See third series, figure 15.

*Ipsæ oratores ad me, regniq; coronam,
Cum sceptro misit.*

VIRG. ÆN. lib. 8.

Tarchon, the Tuscan chief, to me has sent
Their crown, and every regal ornament.

DRYDEN.

Antioch has an anchor by her, in memory of her founder Seleucus^r, whose race was all born with this mark upon them, if you will believe historians. Ausonius has taken notice of it in his verses on this city :

-Illa Seleucum

*Nuncupat ingenium, cujus fuit anchora signum.
Qualis iusta solet ; generis nota cæta, per omnem
Nam sobolis seriem natina cucurrit imago.*

AUSON. Ordo Nobil. Urbium.

Thee, great Seleucus, bright in Grecian fame !
The tow'rs of Antioch for their founder claim :
Thee Phœbus at thy birth his son confess'd,
By the fair anchor on tho babe impress'd,
Which all thy genuine offspring wont to grace,
From thigh to thigh transmissive through the race.

Smyrna is always represented by an Amazon^s, that is said to have been her first foundress. You see her here entering into a league with Thyatira. Each of them holds her tutelar deity in her hand :

*Jus ille, et icti fœderis testes deos
Invocat.*

SEN. PHœNISSÆ, Act. 1.

On the left arm of Smyrna is the *PELLA*, or buckler, of the Amazons, as the long weapon by her is the *bipennis*, or *securis* :

^r See third series, figure 16.

^s Ibid. figure 17.

*Non tibi Amazonia est pro me sumenda securis,
Aut excisa levi pella gerenda manu.*

OVID. ex Pont. lib. iii. epist. 1.

Lunatis agmina peltis.

VING.

In their right hands a pointed dart they wield;
The left, for ward, sustains the lunar shield. DRUS DEN.

*Videre Rhæti bella sub Alpibus
Drusum gerentem, et Vindelici; quibus
Mos unde deductus per omne
Tempus Amazonia securi*

Dexteras obarmet querere distuli. HON. lib. iv. Od. 4.

Such Drusus did in arms appear,
When near the Alps he urg'd the war:
In vain the Rhæti did their axes wield,
Like Amazons they fought, like women fled the field:
But why those savage troops this weapon choose,
Confirm'd by long-establish'd use,
Historians would in vain disclose.

The dress that Arabia^t appears in, brings to my
mind the description Lucan has made of these
eastern nations:

*Quicquid ad Eos tractus, mundique teporem
Labitur, emollit gentes clementia cæli.
Illic et laxas vestes, et fluxa virorum
Velamenta vides.*

LUCAN. lib. 8.

While Asia's softer climate, form'd to please,
Dissolves her sons in indolence and ease;
Here silken robes invest unmanly limbs,
And in long trains the flowing purple streams. ROWE.

She bears in one hand a sprig of frankincense:

—— *Solis est thurea virga Sabeis.*

VING.

And od'rous frankincense on the Sabæan bough,

DRYDEN.

Thuriferos Arabum saltus. CLAUD. de Ter. Cons. Hon.

Thurilegos Arabas.——— OVID. de Fast lib. 4.

In the other hand you see the perfumed reed, as the garland on her head may be supposed to be woven out of some other part of her fragrant productions :

*Nec procul in molles Arabus terramque ferentem
Delicias, variæque novos radicis honores;
Leniter adfudit gemmantia littora pontus,
Et terræ mare nomen habet.*———

MANIL. de Sinu Arabico, lib. 4.

More west the other soft Arabia beats,
Where incense grows, and pleasing odour sweats ;
The bay is call'd th' Arabian gulf ; the name
The country gives it, and 'tis great in fame. CREECH.

*Urantur pia thura focis, urantur odores,
Quos tener à terrâ diuite mittit Arabs.*

TIBUL. lib. ii. el. 2.

———*Sit dives amomo
Cinnamæque, costumque suam, sudatæque ligno
Thura ferat, floresque alios Panchaia tellus ;
Dum ferat et myrrham.* OVID. Met. lib. 10.

Let Araby extol her happy coast,
Her cinnamon, and sweet amomum boast ;
Her fragrant flowers, her trees with precious tears,
Her second harvests, and her double years :
How can the land be call'd so bless'd, that myrrha bears ?
DRYDEN.

———*Odoratæ spirant medicamina silvæ.* MANIL.

The trees drop balsam, and on all the boughs
Health sits, and makes it sovereign as it flows. CREECH.

*Cinnami sylvas Arabes beatos**Vidit.*—————SEN. *Edip.* Act. 1.

What a delicious country is this, says Cynthio; a man almost smells it in the descriptions that are made of it. The camel is in Arabia, I suppose, a beast of burden, that helps to carry off its spices. We find the camel, says Philander, mentioned in Persius on the same account :

Tolle recens primus piperi è satiente camelo. PERS. Sat. 5.

—————The precious weight

Of pepper and Sabæan incense, take

With thy own hands from the tur'd camel's back.

DRYDEN.

He loads the camel with pepper, because the animal and its cargo are both the productions of the same country :

*Mer cibus hic Italus mūtāt sub sole recenti**Rugosum piper.*—————

PERS. Sat. 5.

The greedy merchants, led by lucre, run

To the parch'd Indies and the rising sun,

From thence hot pepper, and rich drugs they bear,

Bart'ring for spices their Italian ware.

DRYDEN.

You have given us some quotations out of Persius this morning, says Eugenius, that, in my opinion, have a great deal of poetry in them. I have often wondered at Mr. Dryden for passing so severe a censure on this author. He fancies the description of a wreck that you have already cited, is too good for Persius, and that he might be helped in it by Lucan, who was one of his contemporaries. For my part, says Cynthio, I am so far from Mr. Dryden's opinion in this particular, that I fancy Persius a

better poet than Lucan: and that, had he been engaged on the same subject, he would, at least in his expressions and descriptions, have outwritten the *Pharsalia*. He was, indeed, employed on subjects that seldom led him into anything like description, but where he has an occasion of showing himself, we find very few of the Latin poets that have given a greater beauty to their expressions. His obscurities are, indeed, sometimes affected; but they generally arise from the remoteness of the customs, persons, and things he alludes to: as satire is, for this reason, more difficult to be understood by those that are not of the same age with it, than any other kind of poetry. Love-verses and heroics deal in images that are ever fixed and settled in the nature of things; but a thousand ideas enter into satire, that are as changeable and unsteady as the mode or the humours of mankind.

Our three friends had passed away the whole morning among their medals and Latin poets. Philander told them it was now too late to enter on another series, but if they would take up with such a dinner as he could meet with at his lodgings, he would afterwards lay the rest of his medals before them. Cynthio and Eugenius were both of them so well pleased with the novelty of the subject, that they would not refuse the offer Philander made them.

DIALOGUE III.

—Causa est discriminis hujus
 Concisum Argentum in titulos faciesque minutas.
 Juv. Sat. 5.

A PARALLEL BETWEEN THE ANCIENT AND
 MODERN MEDALS.

PHILANDER used every morning to take a walk in a neighbouring wood, that stood on the borders of the Thames. It was cut through by abundance of beautiful alleys, which, terminating on the water, looked like so many painted views in perspective. The banks of the river and the thickness of the shades drew into them all the birds of the country, that at sunrising filled the wood with such a variety of notes, as made the prettiest confusion imaginable. I know in descriptions of this nature, the scenes are generally supposed to grow out of the author's imagination, and if they are not charming in all their parts, the reader never imputes it to the want of sun or soil, but to the writer's barrenness of invention. It is Cicero's observation on the plane tree, that makes so flourishing a figure in one of Plato's dialogues, that it did not draw its nourishment from the fountain that ran by it and watered its roots, but from the richness of the style that describes it. For my own part, as I design only to

fix the scene of the following dialogue, I shall not endeavour to give it any other ornaments than those which nature has bestowed upon it.

Philander was here enjoying the cool of the morning, among the dews that lay on everything about him, and that gave the air such a freshness as is not a little agreeable in the hot part of the year. He had not been here long before he was joined by Cynthio and Eugenius. Cynthio immediately fell upon Philander for breaking his night's rest. You have so filled my head, says he, with old coins, that I have had nothing but figures and inscriptions before my eyes. If I chanced to fall into a little slumber, it was immediately interrupted with the vision of a caduceus or a cornucopia. You will make me believe, says Philander, that you begin to be reconciled to medals. They say it is a sure sign a man loves money, when he is used to find it in his dreams. There is certainly, says Eugenius, something like avarice in the study of medals. The more a man knows of them the more he desires to know. There is one subject in particular that Cynthio, as well as myself, has a mind to engage you in. We would fain know how the ancient and modern medals differ from one another, and which of them deserves the preference. You have a mind to engage me in a subject, says Philander, that is, perhaps, of a larger extent than you imagine. To examine it thoroughly, it would be necessary to take them in pieces, and to speak of the difference that shows itself in their metals, in the occasion of stamping them, in the inscriptions, and in the figures that adorn them. Since you have divided your subject, says Cynthio, be so kind as to enter on it without farther preface.

We should first of all, says Philander, consider the difference of the metals that we find in ancient and modern coins; but as this speculation is more curious than improving, I believe you will excuse me if I do not dwell long upon it. One may understand all the learned part of this science, without knowing whether there were coins of iron or lead among the old Romans; and if a man is well acquainted with the device of a medal, I do not see what necessity there is of being able to tell whether the medal itself be of copper or Corinthian brass. There is, however, so great a difference between the antique and modern medals, that I have seen an antiquary lick an old coin, among other trials, to distinguish the age of it by its taste. I remember, when I laughed at him for it, he told me with a great deal of vehemence, there was as much difference between the relish of ancient and modern brass, as between an apple and a turnip. It is pity, says Eugenius, but they found out the smell too of an ancient medal. They would then be able to judge of it by all the senses. The touch, I have heard, gives almost as good evidence as the sight, and the ringing of a medal is, I know, a very common experiment. But I suppose this last proof you mention relates only to such coins as are made of your baser sorts of metal. And here, says Philander, we may observe the prudence of the ancients above that of the moderns, in the care they took to perpetuate the memory of great actions. They knew very well that silver and gold might fall into the hands of the covetous or ignorant, who would not respect them for the device they bore, but for the metal they were made of. Nor were their apprehensions ill founded; for it is not easily imagined how many of these noble

monuments of history have perished in the goldsmith's hands, before they came to be collected together by the learned men of these last two or three centuries. Inscriptions, victories, buildings, and a thousand other pieces of antiquity were melted down in those barbarous ages, that thought figures and letters only served to spoil the gold that was charged with them. Your medallists look on this destruction of coins as on the burning of the Alexandrian library, and would be content to compound for them with almost the loss of a Vatican. To prevent this in some measure, the ancients placed the greatest variety of their devices on their brass and copper coins, which are in no fear of falling into the clippers' hands, nor in any danger of melting till the general conflagration. On the contrary, our modern medals are most in silver and gold, and often in a very small number of each. I have seen a golden one at Vienna of Philip the second, that weighed two and twenty pound, which is probably singular in its kind, and will not be able to keep itself long out of the furnace when it leaves the emperor's treasury. I remember another in the king of Prussia's collection, that has in it three pound weight of gold. The princes who struck these medals, says Eugenius, seem to have designed them rather as an ostentation of their wealth than of their virtues. They fancied, probably, it was a greater honour to appear in gold than in copper, and that a medal receives all its value from the rarity of the metal. I think the next subject you proposed to speak of, were the different occasions that have given birth to ancient and modern medals.

Before we enter on this particular, says Philander, I must tell you, by way of preliminary, that formerly

there was no difference between money and medals. An old Roman had his purse full of the same pieces that we now preserve in cabinets. As soon as an emperor had done anything remarkable, it was immediately stamped on a coin, and became current through his whole dominions. It was a pretty contrivance, says Cynthio, to spread abroad the virtues of an emperor, and make his actions circulate. A fresh coin was a kind of a gazette, that published the latest news of the empire. I should fancy your Roman bankers were very good historians. It is certain, says Eugenius, they might find their profit and instruction mixed together. I have often wondered that no nation among the moderns has imitated the ancient Romans in this particular. I know no other way of securing these kinds of monuments, and making them numerous enough to be handed down to future ages. But where statesmen are ruled by a spirit of faction and interest, they can have no passion for the glory of their country, nor any concern for the figure it will make among posterity. A man that talks of his nation's honour a thousand years hence, is in very great danger of being laughed at. We shall think, says Cynthio, you have a mind to fall out with the government, because it does not encourage medals. But were all your ancient coins that are now in cabinets once current money? It is the most probable opinion, says Philander, that they were all of them such, excepting those we call medallions. These in respect of the other coins were the same as modern medals in respect of modern money. They were exempted from all commerce, and had no other value but what was set upon them by the fancy of the owner. They are supposed to have been struck

by emperors for presents to their friends, foreign princes, or ambassadors. However, that the smallness of their number might not endanger the loss of the devices they bore, the Romans took care generally to stamp the subject of their medallions on their ordinary coins that were the running cash of the nation. As if in England we should see on our halfpenny and farthing pieces, the several designs that show themselves in their perfection on our medals.

If we now consider, continued Philander, the different occasions or subjects of ancient and modern medals, we shall find they both agree in recording the great actions and successes in war, allowing still for the different ways of making it, and the circumstances that attended it in past ages, and in the present. I shall instance one. I do not remember in any old coin to have seen the taking of a town mentioned: as indeed there were few conquerors could signalize themselves that way before the invention of powder and fortifications, a single battle often deciding the fate of whole kingdoms. Our modern medals give us several sieges and plans of fortified towns, that show themselves in all their parts to a great advantage on the reverse of a coin. It is, indeed, a kind of justice, says Eugenius, that a prince owes, to posterity, after he has ruined or defaced a strong place, to deliver down to them a model of it as it stood whole and entire. The coin repairs in some measure the mischiefs of his bombs and cannons. In the next place, says Philander, we see both on the ancient and modern medals the several noble pieces of architecture that were finished at the time when the medals were stamped. I must observe, however, to the honour of the latter, that they have re-

presented their buildings according to the rules of perspective. This I remember to have seen but in very few of the plans on ancient coins, which makes them appear much less beautiful than the modern, especially to a mathematical eye. Thus far our two sets of medals agree as to their subject. But old coins go farther in their compliments to their emperor, as they take occasion to celebrate his distinguishing virtues; not as they showed themselves in any particular action, but as they shone out in the general view of his character. This humour went so far, that we see Nero's fiddling, and Commodus's skill in fencing, on several of their medals. At present, you never meet with the king of France's generosity nor the emperor's devotion recorded after this manner. Again, the Romans used to register the great actions of peace that turned to the good of the people, as well as those of war. The remission of a debt, the taking off a duty, the giving up a tax, the mending a port, or the making a highway, were not looked upon as improper subjects for a coin. They were glad of any opportunity to encourage their emperors in the humour of doing good, and knew very well, that many of these acts of beneficence had a wider and more lasting influence on the happiness and welfare of a people, than the gaining a victory, or the conquest of a nation. In England, perhaps, it would have looked a little odd to have stamped a medal on the abolishing of chimney-money in the last reign, or on the giving a hundred thousand pound a year towards the carrying on a war in this. I find, says Eugenius, had we struck in with the practice of the ancient Romans, we should have had medals on the fitting up our several docks, on the making our rivers navigable, on the

building our men-of-war, and the like subjects, that have certainly very well deserved them. The reason why it has been neglected, says Philander, may possibly be this. Our princes have the coining of their own medals, and, perhaps, may think it would look like vanity to erect so many trophies and monuments of praise to their own merit; whereas, among the ancient Romans, the senate had still a watchful eye on their emperor; and if they found anything in his life and actions that might furnish out a medal, they did not fail of making him so acceptable an offering. It is true, their flatteries betray often such a baseness of spirit, as one would little expect to find among such an order of men. And here, by the way, we may observe, that you never find anything like satire or raillery on old coins.

Whatever victories were got on foreign enemies, or the several pretenders to the empire obtained over one another, they are recorded on coins without the least bitterness or reflection. The emperors often jested on their rivals or predecessors, but their mints still maintained their gravity. They might publish invectives against one another in their discourses or writings, but never on their coins. Had we no other histories of the Roman emperors, but those we find on their money, we should take them for the most virtuous race of princes that mankind were ever blessed with: whereas, if we look into their lives, they appear many of them such monsters of lust and cruelty, as are almost a reproach to human nature. Medals are, therefore, so many compliments to an emperor, that ascribe to him all the virtues and victories he himself pretended to. Were you to take from hence all your informations, you would fancy Claudius as great a conqueror as Julius Cæsar, and

Domitian a wiser prince than his brother Titus. Tiberius on his coins is all mercy and moderation, Caligula and Nero are fathers of their country, Galba the patron of public liberty, and Vitellius the restorer of the city of Rome. In short, if you have a mind to see the religious Commodus, the pious Caracalla, and the devout Heliogabalus, you may find them either in the inscription or device of their medals. On the contrary, those of a modern make are often charged with irony and satire. Our kings no sooner fall out, but their mints make war upon one another, and their malice appears on their medals. One meets sometimes with very nice touches of raillery; but as we have no instance of it among the ancient coins, I shall leave you to determine, whether or no it ought to find a place there. I must confess, says Cynthio, I believe we are generally in the wrong when we deviate from the ancients, because their practice is, for the most part, grounded upon reason. But if our forefathers have thought fit to be grave and serious, I hope their posterity may laugh without offence. For my part, I cannot but look on this kind of raillery as a refinement on medals; and do not see why there may not be some for diversion, at the same time that there are others of a more solemn and majestic nature, as a victory may be celebrated in an epigram as well as in an heroic poem. Had the ancients given place to raillery on any of their coins, I question not but they would have been the most valued parts of a collection. Besides the entertainment we should have found in them, they would have shown us the different state of wit, as it flourished or decayed in the several ages of the Roman empire. There is no doubt, says Philander, but our forefathers, if they

had pleased, could have been as witty as their posterity. But I am of opinion, they industriously avoided it on their coins, that they might not give us occasion to suspect their sincerity. Had they run into mirth or satire we should not have thought they had designed so much to instruct as to divert us. I have heard, says Eugenius, that the Romans stamped several coins on the same occasion. If we follow their example, there will be no danger of deceiving posterity; since the more serious sort of medals may serve as comments on those of a lighter character. However it is, the raillery of the moderns cannot be worse than the flattery of the ancients. But hitherto you have only mentioned such coins as were made on the emperor, I have seen several of our own time that have been made as a compliment to private persons. There are pieces of money, says Philander, that, during the time of the Roman emperors, were coined in honour of the senate, army, or people. I do not remember to have seen in the upper empire the face of any private person that was not some way related to the imperial family. Sejanus has, indeed, his consulship mentioned on a coin of Tiberius, as he has the honour to give a name to the year in which our Saviour was crucified. We are now come to the legend, or inscription, of our medals, which, as it is one of the more essential parts of them, it may deserve to be examined more at length. You have chosen a very short text to enlarge upon, says Cynthio: I should as soon expect to see a critic on the posy of a ring, as on the inscription of a medal.

I have seen several modern coins, says Philander, that have had part of the legend running round the edges, like the *Decus et Tutamen* in our milled

money ; so that a few years will probably wear out the action that the coin was designed to perpetuate. The ancients were too wise to register their exploits on so nice a surface. I should fancy, says Eugenius, the moderns may have chosen this part of the medal for the inscription, that the figures on each side might appear to a greater advantage. I have observed in several old coins a kind of confusion between the legend and the device. The figures and letters were so mingled together, that one would think the coiner was hard put to it on what part of the money to bestow the several words of his inscription. You have found out something like an excuse, says Philander, for your milled medals, if they carried the whole legend on their edges. But at the same time that they are lettered on the edges, they have other inscriptions on the face and the reverse. Your modern designers cannot contract the occasion of the medal into an inscription that is proper to the volume they write upon : so that, having scribbled over both sides, they are forced, as it were, to write upon the margin. The first fault, therefore, that I shall find with a modern legend, is its diffusiveness. You have sometimes the whole side of a medal overrun with it. One would fancy the author had a design of being Ciceronian in his Latin, and of making a round period. I will give you only the reverse of a coin stamped by the present emperor of Germany, on the raising of the siege of Vienna. VIENNA AVSTRLE $\frac{1}{4}$ IVLII AB ACCHMETE II. OBSESSA $\frac{2}{3}$ SEPT. EX INSUPERATO AB EO DESERTA EST. I should take this, says Cynthio, for the paragraph of a gazette, rather than the inscription of a medal. I remember you represented your ancient coins as abridgments of history ; but your modern, if

there are many of them like this, should themselves be epitomised. Compare with this, says Philander, the brevity and comprehensiveness of those legends that appear on ancient coins:

Salus Generis humani.—Tellus stabilita.—Gloria Orbis Terræ.—Pacator Orbis.—Restitutor Orbis Terrarum.—Gaudium Reipublicæ.—Hilaritas populi Romani.—Bono Reipub. nati.—Roma renascens.—Libertas restituta.—Sæculum Aureum Puellæ Faustinianæ.—Rex Parthis datus.—Victoria Germanica.—Fides Mutua.—Asia Subacta.—Judæa capta.—Amor mutuus.—Genetrix orbis.—Sideribus recepta.—Genio Senatûs.—Fides exercitûs.—Providentia Senatûs.—Restitutori Hispaniæ.—Adventui Aug. Britannici.—Regna Adsignata.—Adlocutio.—Discipulina Augusti.—Felicitas publica.—Rex Armenis datus.

What a majesty and force does one meet with in these short inscriptions! Are not you amazed to see so much history gathered into so small a compass? You have often the subject of a volume in a couple of words.

If our modern medals are so very prolix in their prose, they are every whit as tedious in their verse. You have sometimes a dull epigram of four lines. This, says Cynthio, may be of great use to immortalize puns and quibbles, and to let posterity see their forefathers were a parcel of blockheads. A coin, I find, may be of great use to a bad poet. If he cannot become immortal by the goodness of his verse, he may by the durableness of the metal that supports it. I shall give you an instance, says Philander, from a medal of Gustavus Adolphus, that will stand as an eternal monument of dulness and bravery:

*Miles ego Christi, Christo duce sterno tyrannos,
 Hæreticos simul et calco meis pedibus.
 Parcere Christicolis me, debellare feroces
 Papicolæ Christus dux meus en animat,*

It is well, says Cynthio, you tell us this is a medal of the great Gustavus: I should have taken it for some one of his Gothic predecessors. Does it not bring into your mind Alexander the Great's being accompanied with a Chærilus in his Persian expedition? If you are offended at the homeliness of this inscription, says Philander, what would you think of such as have neither sense nor grammar in them? I assure you I have seen the face of many a great monarch hemmed in with false Latin. But it is not only the stupidity and tediousness of these inscriptions that I find fault with, supposing them of a moderate length and proper sense, why must they be in verse? We should be surprised to see the title of a serious book in rhyme, yet it is every whit as ridiculous to give the subject of a medal in a piece of an hexameter. This, however, is the practice of our modern medallists. If you look into the ancient inscriptions, you see an air of simplicity in the words, but a great magnificence in the thought; on the contrary, in your modern medals you have generally a trifling thought wrapt up in the beginning or end of an heroic verse. Where the sense of an inscription is low, it is not in the power of dactyls and spondees to raise it; where it is noble, it has no need of such affected ornaments. I remember a medal of Philip the second, on Charles le Quint's resigning to him the kingdom of Spain, with this inscription—*Ut quiescat Atlas*. The device is a Hercules with the sphere on his shoulders. Notwithstanding the thought is poetical, I dare say you

would think the beauty of the inscription very much lost, had it been—*Requiescat ut Atlas*. To instance a medal of our own nation. After the conclusion of the peace with Holland, there was one stamped with the following legend—*Redeant Commercia Flandris*. The thought is here great enough, but in my opinion it would have looked much greater in two or three words of prose. I think truly, says Eugenius, it is ridiculous enough to make the inscription run like a piece of a verse, when it is not taken out of an old author. But I would fain have your opinion on such inscriptions as are borrowed from the Latin poets. I have seen several of this sort that have been very prettily applied, and I fancy when they are chosen with art, they should not be thought unworthy of a place in your medals.

Whichever side I take, says Philander, I am like to have a great party against me. Those who have formed their relish on old coins, will by no means allow of such an innovation: on the contrary, your men of wit will be apt to look on it as an improvement on ancient medals. You will oblige us, however, to let us know what kind of rules you would have observed in the choice of your quotations, since you seem to lay a stress on their being chosen with art. You must know then, says Eugenius, I do not think it enough that a quotation tells us plain matter of fact, unless it has some other accidental ornaments to set it off. Indeed, if a great action that seldom happens in the course of human affairs is exactly described in the passage of an old poet, it gives the reader a very agreeable surprise, and may therefore deserve a place on a medal.

Again, if there is more than a single circumstance of the action specified in the quotation, it pleases a

man to see an old exploit copied out, as it were, by a modern, and running parallel with it in several of its particulars.

In the next place, when the quotation is not only apt, but has in it a turn of wit or satire, it is still the better qualified for a medal, as it has a double capacity of pleasing.

But there is no inscription fitter for a medal, in my opinion, than a quotation that, besides its aptness, has something in it lofty and sublime : for such an one strikes in with the natural greatness of the soul, and produces a high idea of the person or action it celebrates, which is one of the principal designs of a medal.

It is certainly very pleasant, says Eugenius, to see a verse of an old poet, revolting, as it were, from its original sense, and siding with a modern subject. But then it ought to do it willingly of its own accord, without being forced to it by any change in the words, or the punctuation : for when this happens, it is no longer the verse of an ancient poet, but of him that has converted it to his own use.

You have, I believe, by this time, exhausted your subject, says Philander ; and I think the criticisms you have made on the poetical quotations that we so often meet with in our modern medals, may be very well applied to the mottoes of books, and other inscriptions of the same nature. But before we quit the legends of medals, I cannot but take notice of a kind of wit that flourishes very much on many of the modern, especially those of Germany, when they represent in the inscription the year in which they were coined. As to mention to you another of Gustavus Adolphus. *CHRISTVS DVX ERGO TRIVMPHVVS*. If you take the pains to pick out the

figures from the several words, and range them in their proper order, you will find them amount to 1627, the year in which the medal was coined; for do not you observe some of the letters distinguish themselves from the rest, and top it over their fellows? these you must consider in a double capacity, as letters and as cyphers. Your laborious German wits will turn you over a whole dictionary for one of these ingenious devices. You would fancy, perhaps, they were searching after an apt classical term, but instead of that, they are looking out a word that has an L, an M, or a D in it. When, therefore, you see any of these inscriptions, you are not so much to look in them for the thought, as for the year of the Lord. There are foreign universities where this kind of wit is so much in vogue, that as you praise a man in England for being an excellent philosopher or poet, it is an ordinary character among them to be a great chronogrammatist. These are probably, says Cynthio, some of those mild provinces of acrostic land, that Mr. Dryden has assigned to his anagrams, wings, and altars. We have now done, I suppose, with the legend of a medal. I think you promised us in the next place to speak of the figures.

As we had a great deal of talk on this part of a coin, replied Philander, in our discourse on the usefulness of ancient medals, I shall only just touch on the chief heads wherein the ancient and the modern differ. In the first place, the Romans always appear in the proper dress of their country, insomuch that you see the little variations of the mode in the drapery of the medal. They would have thought it ridiculous to have drawn an emperor of Rome in a Grecian cloak, or a Phrygian mitre. On the contrary, our modern medals are full of togas and

tunicas, trabeas and paludamentums, with a multitude of the like antiquated garments, that have not been in fashion these thousand years. You see very often a king of England or France dressed up like a Julius Cæsar. One would think they had a mind to pass themselves upon posterity for Roman emperors. The same observation may run through several customs and religions, that appear in our ancient and modern coins. Nothing is more usual than to see allusions to Roman customs and ceremonies on the medals of our own nation. Nay, very often they carry the figure of a heathen god. If posterity takes its notions of us from our medals, they must fancy one of our kings paid a great devotion to Minerva, that another was a professed worshipper of Apollo, or at best that our whole religion was a mixture of paganism and Christianity. Had the old Romans been guilty of the same extravagance, there would have been so great a confusion in their antiquities, that their coins would not have had half the uses we now find in them. We ought to look on medals as so many monuments consigned over to eternity, that may possibly last when all other memorials of the same age are worn out or lost. They are a kind of present that those who are actually in being make over to such as lie hid within the depths of futurity. Were they only designed to instruct the three or four succeeding generations, they are in no great danger of being misunderstood: but as they may pass into the hands of a posterity that lie many removes from us, and are like to act their part in the world when its governments, manners, and religions may be quite altered, we ought to take a particular care not to make any false reports in them, or to charge them

with any devices that may look doubtful or unintelligible.

I have lately seen, says Eugenius, a medallie history of the present king of France. One might expect, methinks, to see the medals of that nation in the highest perfection, when there is a society pensioned and set apart on purpose for the designing of them.

We will examine them, if you please, says Philander, in the light that our foregoing observations have set them; but on this condition, that you do not look on the faults I find in them any more than my own private opinion. In the first place, then, I think it is impossible to learn from the French medals either the religion, custom, or habits of the French nation. You see on some of them the cross of our Saviour, and on others Hercules's club. In one you have an angel, and in another a Mercury. I fancy, says Cynthio, posterity would be as much puzzled on the religion of Louis le Grand, were they to learn it from his medals, as we are at present on that of Constantine the Great. It is certain, says Philander, there is the same mixture of Christian and pagan in their coins; nor is there a less confusion in their customs. For example, what relation is there between the figure of a bull and the planting of a French colony in America? The Romans made use of this type in allusion to one of their own customs at the sending out of a colony. But for the French, a ram, a hog, or an elephant would have been every whit as significant an emblem. Then can anything be more unnatural than to see a king of France dressed like an emperor of Rome, with his arms stripped up to his elbows, a laurel on his head, and a chlamys over his shoulders? I

fancy, says Eugenius, the society of medallists would give you their reasons for what they have done. You yourself allow the legend to be Latin; and why may not the customs and ornaments be of the same country as the language? especially since they are all of them so universally understood by the learned. I own to you, says Philander, if they only design to deliver down to posterity the several parts of their great monarch's history, it is no matter for the other circumstances of a medal; but I fancy it would be as great a pleasure and instruction for future ages, to see the dresses and customs of their ancestors, as their buildings and victories. Besides, I do not think they have always chosen a proper occasion for a medal. There is one struck, for example, on the English failing in their attempts on Dunkirk: when in the last reign they endeavoured to blow up a fort, and bombard the town. What have the French here done to boast of? A medal, however, you have with this inscription, DVNICKIRKA ILLÆSA. Not to cavil at the two K's in Dunkirka, or the impropriety of the word *Illæsa*, the whole medal, in my opinion, tends not so much to the honour of the French as of the English:

Quos opinus
Fallere et effulgere est triumphus.

I could mention a few other faults, or at least what I take for such. But at the same time must be forced to allow, that this series of medals is the most perfect of any among the moderns in the beauty of the work, the aptness of the device, and the propriety of the legend. In these and other particulars, the French medals come nearer the ancients than those of any other country, as, indeed, it is to

this nation we are indebted for the best lights that have been given to the whole science in general.

I must not here forget to mention the medallic history of the popes, where there are many coins of an excellent workmanship, as I think they have none of those faults that I have spoken of in the preceding set. They are always Roman catholic in the device and in the legend, which are both of them many times taken out of the holy scriptures, and therefore not unsuitable to the character of the prince they represent. Thus when Innocent the eleventh lay under terrible apprehensions of the French king, he put out a coin, that on the reverse of it had a ship tossed on the waves to represent the church. Before, it was the figure of our Saviour walking on the waters, and St. Peter ready to sink at his feet. The inscription, if I remember, was in Latin. Help Lord, or else I perish. This puts me in mind, says Cynthio, of a pasquinade that at the same time was fixed up at Rome. *Ad Galli cantum Petrus flet.* But, methinks, under this head of the figures on ancient and modern coins, we might expect to hear your opinion on the difference that appears in the workmanship of each. You must know then, says Philander, that till about the end of the third century, when there was a general decay in all the arts of designing, I do not remember to have seen the head of a Roman emperor drawn with a full face. They always appear in *profil*, to use a French term of art, which gives us the view of a head that, in my opinion, has something in it very majestic, and at the same time suits best with the dimensions of a medal. Besides that, it shows the nose and eyebrows, with the several prominences and fallings in of the features, much more distinctly

than any other kind of figure. In the lower empire you have abundance of broad Gothic faces, like so many full moons on the side of a coin. Among the moderns, too, we have of both sorts, though the finest are made after the antique. In the next place you find the figures of many ancient coins rising up in a much more beautiful relief than those on the modern. This, too, is a beauty that fell with the grandeur of the Roman emperors, so that you see the face sinking by degrees in the several declensions of the empire, till about Constantine's time it lies almost even with the surface of the medal. After this it appears so very plain and uniform, that one would think the coiner looked on the flatness of a figure as one of the greatest beauties in sculpture. I fancy, says Eugenius, the sculptors of that age had the same relish as a Greek priest that was buying some religious pictures at Venice. Among others he was shown a noble piece of Titian. The priest, having well surveyed it, was very much scandalized at the extravagance of the relief, as he termed it. You know, says he, our religion forbids all idolatry: we admit of no images but such as are drawn on a smooth surface: the figure you have here shown me, stands so much out to the eye, that I would no sooner suffer it in my church than a statue. I could recommend your Greek priest, says Philander, to abundance of celebrated painters on this side of the Alps that would not fail to please him. We must own, however, that the figures on several of our modern medals are raised and rounded to a very great perfection. But if you compare them in this particular with the most finished among the ancients, your men of art declare universally for the latter.

Cynthio and Eugenius, though they were well pleased with Philander's discourse, were glad, however, to find it at an end: for the sun began to gather strength upon them, and had pierced the shelter of their walks in several places. Philander had no sooner done talking, but he grew sensible of the heat himself, and immediately proposed to his friends the retiring to his lodgings, and getting a thicker shade over their heads. They both of them very readily closed with the proposal, and by that means gave me an opportunity of finishing my dialogue.

THE
PRESENT STATE OF THE WAR,
AND THE
NECESSITY OF AN AUGMENTATION,
CONSIDERED.

PREFACE.

THE author of the following essay has endeavoured to draw into one continued scheme the whole state of the present war, and the methods that appear to him the most proper for bringing it to a happy conclusion.

After having considered that the French are the constant and most dangerous enemies to the British nation, and that the danger from them is now greater than ever, and will still increase till their present union with Spain be broken, he sets forth the several advantages which this union has already given France, and taken from Great Britain, in relation to the West Indies, the woollen manufacture, the trade of the Levant, and the naval power of the two nations.

He shows how these advantages will still rise higher after a peace, notwithstanding our present conquests, with new additions, should be confirmed to us, as well because the monarchy of Spain would not be weakened by such concessions, as because no guarantee could be found sufficient to secure them to us. For which reasons he lays it down as a fixed rule, that no peace is to be made without an entire disunion of the French and Spanish monarchies.

That this may be brought about, he endeavours to prove from the progress we have already made toward it, and the successes we have purchased in the present war, which are very considerable if well pursued, but of no effect if we acquiesce in them.

In order to complete this disunion, in which we have gone so far, he would not have us rely upon exhausting the French treasury, attempts on the Spanish Indies, descents on France, but chiefly upon outnumbering them in troops, France being already drained of her best supplies, and the confederates masters of much greater forces for multitude and strength, both in men and horse, and provided with generals of greater fame and abilities.

He then considers the wrong measures we have hitherto taken in making too small levies after a successful campaign, in regulating their number by that of the enemy's forces, and hiring them of our confederates; showing at the same time the inconveniencies we suffer from such hired troops, and several advantages we might receive from employing those of our own nation.

He farther recommends this augmentation of our forces, to prevent the keeping up a standing body of them in times of peace, to enable us to make an impression on the enemy in the present posture of the war, and to secure ourselves against a prince, who is now at the head of a powerful army, and has not yet declared himself.

In the last place, he answers, by several considerations, those two popular objections: that we furnish more towards the war than the rest of the allies, and that we are not able to contribute more than we do already.

These are the most material heads of the following essay, in which there are many other subordinate reflections that naturally grow out of so copious a subject.

November, 1707.

THE
PRESENT STATE OF THE WAR,
AND THE
NECESSITY OF AN AUGMENTATION,
CONSIDERED.

THE French are certainly the most implacable and the most dangerous enemies of the British nation. Their form of government, their religion, their jealousy of the British power, as well as their prosecutions of commerce, and pursuits of universal monarchy, will fix them for ever in their animosities and aversions towards us, and make them catch at all opportunities of subverting our constitution, destroying our religion, ruining our trade, and sinking the figure which we make among the nations of Europe: not to mention the particular ties of honour that lie on their present king to impose on us a prince, who must prove fatal to our country if he ever reigns over us.

As we are thus in a natural state of war, if I may so call it, with the French nation, it is our misfortune that they are not only the most inveterate, but most formidable of our enemies, and have the greatest power, as well as the strongest inclination, to ruin us. No other state equals them in the force

of their fleets and armies, in the nearness and conveniency of their situation, and in the number of friends and well-wishers which, it is to be feared, they have among us.

For these reasons, our wars with France have always affected us in our most tender interests, and concerned us more than those we have had with any other nation; but I may venture to say, this kingdom was never yet engaged in a war of so great consequence as that which now lies upon our hands. Our all is at stake, and irretrievably lost if we fail of success. At other times, if a war ended in a dishonourable peace, or with equal loss, we could comfort ourselves with the hopes of a more favourable juncture, that might set the balance right, or turn it to our advantage. We had still the prospect of forming the same alliance, or perhaps strengthening it with new confederacies, and by that means of trying our fortune a second time, in case the injustice or ambition of the enemy forced us into the field. At present, if we make a drawn game of it, or procure but moderate advantages, we are in a condition which every British heart must tremble at the thought of. There are no second trials, no wars in reserve, no new schemes of alliance to which we can have recourse. Should the French king be able to bear down such an united force as now makes head against him, at a time when Spain affords him no greater assistance; what will he do when the trade of the Levant lies at his mercy; when the whole kingdom of Spain is supplied with his manufactures, and the wealth of the Indies flows into his coffers; and, what is yet worse, when this additional strength must arise in all its particulars from a proportionable decay in the states that now make war upon him? It

is no wonder, therefore, that our late king, of glorious memory, who, by the confession of his greatest enemies, was a prince that perfectly understood the interest of Europe, should in his last speech recommend to his parliament the declaring war against France in those memorable words: "You have yet an opportunity, by God's blessing, to secure to you and your posterity the quiet enjoyment of your religion and liberties, if you are not wanting to yourselves, but will exert the ancient vigour of the English nation: but I tell you plainly, my opinion is, if you do not lay hold on this occasion, you have no reason to hope for another."

We have already a dreadful proof of the increase of power that accrues to France from its conjunction with Spain. So expensive a war as that which the French monarchy hath been carrying on in so many and so remote parts at once, must long since have drained and exhausted all its substance, had there not been several secret springs that swelled their treasury from time to time in proportion as the war has sunk it. The king's coffers have been often reduced to the lowest ebb, but have still been seasonably refreshed by frequent and unexpected supplies from the Spanish America. We hear, indeed, of the arrival but of very few ships from those parts; but as in every vessel there is stowage for immense treasures, when the cargo is pure bullion, or merchandise of as great a value: so we find by experience they have had such prodigious sums of money conveyed to them by these secret channels, that they have been enabled to pay more numerous armies than they ever had on foot before; and that at a time when their trade fails in all its other branches, and is distressed by all the arts and contrivances of their

neighbouring nations. During the last four years, by a modest computation, there have been brought into Brest above six millions of pounds sterling in bullion. What then shall we suppose would be the effect of this correspondence with America, might the wealth of those parts come to them in squadrons of men-of-war, and fleets of galleons? If these little by-currents, that creep into the country by stealth, have so great a force, how shall we stem the whole torrent, when it breaks in upon us with its full violence? And this certainly will be our case, unless we find a means to dissolve the union between France and Spain. I have dwelt the longer on this consideration, because the present war hath already furnished us with the experiment, and sensibly convinced us of the increase of power which France has received from its intercourse with the Spanish West Indies.

As there are many who look upon everything which they do not actually see and feel as bare probability and speculation; I shall only touch on those other reasons of which we have already had some experience, for our preventing this coalition of interests and designs in the two monarchies.

The woollen manufacture is the British strength, the staple commodity and proper growth of our country; if this fails us, our trade and estates must sink together, and all the cash of the nation be consumed on foreign merchandise. The French at present gain very much upon us in this great article of our trade, and, since the accession of the Spanish monarchy, supply, with cloth of their own making, the very best mart we had in Europe. And what a melancholy prospect have we, if ever a peace gives them leave to enrich their manufacture with mixtures

of Spanish wool, to multiply the hands employed in it, to improve themselves in all the niceties of the art, and to vend their wares in those places where was the greatest consumption of our woollen works, and the most considerable gain for the British merchant? Notwithstanding our many seasonable recruits from Portugal and our plantations, we already complain of our want of bullion; and must at last be reduced to the greatest exigencies, if this great source be dried up, and our traffic with Spain continue under its present discouragement.

The trade of the Levant must likewise flourish or decay in our hands, as we are friends or enemies of the Spanish monarchy. The late conquest of Naples will very little alter the case, though Sicily should follow the fate of her sister kingdom. The strait's mouth is the key of the Levant, and will be always in the possession of those who are kings of Spain. We may only add, that the same causes which straiten the British commerce, will naturally enlarge the French; and that the naval force of either nation will thrive or languish in the same degree as their commerce gathers or loses strength. And if so powerful and populous a nation as that of France become superior to us by sea, our whole is lost, and we are no more a people. The consideration of so narrow a channel betwixt us, of such numbers of regular troops on the enemy's side, of so small a standing force on our own, and that, too, in a country destitute of all such forts and strong places as might stop the progress of a victorious army, hath something in it so terrifying, that one does not care for setting it in its proper light. Let it not, therefore, enter into the heart of any one that hath the least zeal for his religion, or love of liberty, that hath any

regard either to the honour or safety of his country, or a well-wish for his friends or posterity, to think of a peace with France till the Spanish monarchy be entirely torn from it, and the house of Bourbon disabled from ever giving the law to Europe.

Let us suppose that the French king would grant us the most advantageous terms we can desire; without the separation of the two monarchies they must infallibly end in our destruction. Should he secure to us all our present acquisitions; should he add two or three frontier-towns to what we have already in Flanders; should he join the kingdoms of Sicily and Sardinia to Milan and Naples; should he leave king Charles in the peaceable possession of Catalonia; should he make over to Great Britain the town and harbour of Cadiz, as well as that of Gibraltar, and at the same time resign his conquests in Portugal; it would all be of no effect towards the common safety of Europe, while the bulk of the Spanish continent and the riches of America remain in the possession of the Bourbon family.

Boccalini, when he weighs the states of Europe in his political balance, after having laid France in one scale, throws Spain into the other, which wanted but very little of being a counterpoise. The Spaniards upon this, says he, begun to promise themselves the honour of the balance, reckoning that if Spain of itself weighed so well, they could not fail of success when the several parts of the monarchy were lumped in the same scale. Their surprise was very great, when, upon the throwing in of Naples, they saw the scale rise, and was greater still when they found that Milan and Flanders had the same effect. The truth of it is, these parts of the Spanish monarchy are rather for ornament than strength. They furnish

out vice-royalties for the grandees, and posts of honour for the noble families; but in a time of war are ineumbrances to the main body of the kingdom, and leave it naked and exposed by the great number of hands they draw from it to their defence. Should we, therefore, continue in the possession of what we have already made ourselves masters, with such additions as have been mentioned, we should have little more than the exherescences of the Spanish monarchy. The strength of it will still join itself to France, and grow the closer to it by its disunion from the rest. And in this case, the advantages which must arise to that people from their intimate alliance with the remaining part of the Spanish dominions, would, in a very few years, not only repair all the damages they have sustained in the present war, but fill the kingdom with more riches than it hath yet had in its most flourishing periods.

The French king hath often entered on several expensive projects, on purpose to dissipate the wealth that is continually gathering in his coffers in times of peace. He hath employed immense sums on architecture, gardening, water-works, painting, statuary, and the like, to distribute his treasures among his people, as well as to humour his pleasures and his ambition; but if he once engrosses the commerce of the Spanish Indies, whatever quantities of gold and silver stagnate in his private coffers, there will be still enough to carry on the circulation among his subjects. By this means, in a short space of time he may heap up greater wealth than all the princes of Europe joined together; and in the present constitution of the world, wealth and power are but different names for the same thing. Let us, therefore suppose, that after eight or ten years of peace, he hath

a mind to infringe any of his treaties, or invade a neighbouring state; to revive the pretensions of Spain upon Portugal, or attempt the taking those places which were granted us for our security; what resistance, what opposition can we make to so formidable an enemy? Should the same alliance rise against him that is now in war with him, what could we hope for from it, at a time when the states engaged in it will be comparatively weakened, and the enemy, who is now able to keep them at a stand, will have received so many new accessions of strength?

But I think it is not to be imagined that in such a conjuncture as we here suppose, the same confederates, or any other of equal force, could be prevailed upon to join their arms, and endeavour at the pulling down so exorbitant a power. Some might be brought into his interests by money, others drawn over by fear, and those that are liable to neither of these impressions, might not think their own interest so much concerned as in the present war; or if any appeared in a disposition to enter into such a confederacy, they might be crushed separately before they could concert measures for their mutual defence.

The keeping together of the present alliance can be ascribed to nothing else but the clear and evident conviction which every member of it is under, that if it should once break without having had its effect, they can never hope for another opportunity of reuniting, or of prevailing by all the joint efforts of such an union. Let us therefore agree on this as a fixed rule, and an inviolable maxim, never to lay down our arms against France till we have utterly disjoined her from the Spanish monarchy. Let this be the first step of a public treaty, the basis of a general peace.

Had the present war, indeed, run against us, and all our attacks upon the enemy been vain, it might look like a degree of frenzy, or a mixture of obstinacy and despair, to be determined on so impracticable an undertaking. But on the contrary, we have already done a great part of our work, and are come within view of the end that we have been so long driving at. We remain victorious in all the seats of war. In Flanders we have got into our hands several open countries, rich towns, and fortified places. We have driven the enemy out of all his alliances, dispossessed him of his strong holds, and ruined his allies in Germany. We have not only recovered what the beginning of the war had taken from us, but possessed ourselves of the kingdom of Naples, the dutchy of Milan, and the avenue of France in Italy. The Spanish war hath given us a haven for our ships, and the most populous and wealthy province of that kingdom. In short, we have taken all the outlying parts of the Spanish monarchy, and made impressions upon the very heart of it. We have beaten the French from all their advanced posts in Europe, and driven them into their last entrenchments. One vigorous push on all sides, one general assault, will force the enemy to cry out for quarter, and surrender themselves at discretion. Another Blenheim or Ramilles will make the confederates masters of their own terms, and arbitrators of a peace.

But notwithstanding the advantages already gained are very considerable if we pursue them, they will be of no effect unless we improve them towards the carrying of our main point. The enemy staggers; if you follow your blow he falls at your feet; but if you allow him respite, he will recover his strength and come upon you with greater fury. We have

given him several repeated wounds, that have enfeebled him and brought him low; but they are such as time will heal, unless you take advantage from his present weakness to redouble your attacks upon him. It was a celebrated part in Cæsar's character, and what comes home to our present purpose, that he thought nothing at all was done, while anything remained undone. In short, we have been tugging a great while against the stream, and have almost weathered our point; a stretch or two more will do the work; but if instead of that we slacken our arms, and drop our oars, we shall be hurried back in a moment to the place from whence we first set out.

After having seen the necessity of an entire separation of the kingdoms of France and Spain, our subject naturally leads us into the consideration of the most proper means for effecting it.

We have a great while flattered ourselves with the prospect of reducing France to our own terms by the want of money among the people, and the exigences of the public treasury; but have still been disappointed by the great sums imported from America, and the many new expedients which the court hath found out for its relief. A long consumptive war is more likely to break the grand alliance than disable France from maintaining sufficient armies to oppose it. An arbitrary government will never want money so long as the people have it; and so active a people will always have it, whilst they can send what merchandizes they please to Mexico and Peru. The French, since their alliance with Spain, keep thirty ships in constant motion between the western ports of France and the south seas of America. The king himself is an adventurer

in this traffic, and, besides the share that he receives out of the gains of his-subjects, has immense sums that come directly from it into his own hands.

We may farther consider, that the French, since their abandoning Bavaria and Italy, have very much retrenched the expense of the war, and lay out among themselves all the money that is consumed in it.

Many are of opinion, that the most probable way of bringing France to reason would be by the making an attempt upon the Spanish West Indies, and by that means to cut off all communication with this great source of riches, or turn the current of it into our own country. This, I must confess, carries so promising an appearance, that I would by no means discourage the attempt: but at the same time I think it should be a collateral project rather than our principal design. Such an undertaking, if well concerted and put into good hands, would be of infinite advantage to the common cause: but certainly an enterprise that carries in it the fate of Europe, should not turn upon the uncertainty of winds and waves, and be liable to all the accidents that may befall a naval expedition.

Others there are that have long deceived themselves with the hopes of an insurrection in France, and are therefore for laying out all our strength on a descent. These, I think, do not enough consider the natural love which the gross of mankind have for the constitution of their fathers. A man that is not enlightened by travel or reflection, grows as fond of arbitrary power, to which he hath been used from his infancy, as of cold climates, or barren countries, in which he hath been born or bred. Besides, there is a kind of sluggish resignation, as well as poorness

and degeneracy of spirit, in a state of slavery, that we meet with but very few who will be at the pains or danger of recovering themselves out of it; as we find in history instances of persons who, after their prisons have been flung open, and their fetters struck off, have chosen rather to languish in their dungeons than stake their miserable lives and fortunes upon the success of a revolution. I need not instance the general fate of descents, the difficulty of supplying men and provisions by sea against an enemy that hath both at hand, and without which it is impossible to secure those conquests that are often made in the first onsets of an invasion. For these and other reasons I can never approve the nursing up commotions and insurrections in the enemy's country, which, for want of the necessary support, are likely to end in the massacre of our friends, and the ruin of their families.

The only means, therefore, for bringing France to our conditions, and what appears to me, in all human probability, a sure and infallible expedient, is to throw in multitudes upon them, and overpower them with numbers. Would the confederacy exert itself as much to annoy the enemy as they themselves do for their defence, we might bear them down with the weight of our armies, and in one summer over-set the whole power of France.

The French monarchy is already exhausted of its best and bravest subjects. The flower of the nation is consumed in its wars; the strength of their armies consists at present of such as have saved themselves by flight from some or other of the victorious confederates, and the only proper persons to recruit them are but the refuse of those who have been already picked out for the service. Mareschal de

Vauban, though infinitely partial in his calculations of the power of France, reckons that the number of its inhabitants was two millions less at the peace of Ryswick, than in the beginning of the war that was there concluded: and though that war continued nine years, and this hath as yet lasted but six, yet considering that their armies are more strong and numerous; that there hath been much more action in the present war; and that their losses sustained in it have been very extraordinary; we may, by a moderate computation, suppose that the present war hath not been less prejudicial than the foregoing one in the ravage which it hath made among the people. There is in France so great a disproportion between the number of males and females; and, among the former, between those who are capable of bearing arms and such as are too young, sickly, or decrepit for the service; and at the same time such vast numbers of ecclesiastics, secular, and religious, who live upon the labours of others, that when the several trades and professions are supplied, you will find most of those that are proper for war absolutely necessary for filling up the laborious part of life, and carrying on the underwork of the nation. They have already contributed all their superfluous hands, and every new levy they make must be at the expense of their farms and vineyards, their manufactures and commerce.

On the contrary, the grand alliance have innumerable sources of recruits, not only in Britain and Ireland, the United Provinces and Flanders, but in all the populous parts of Germany, that have little trade or manufactures, in proportion to the number of their inhabitants. We may add, that the French have only Switzerland, besides their own country, to

recruit in; and we know the difficulties they meet with in getting thence a single regiment: whereas the allies have not only the same resource, but may be supplied for money from Denmark and other neutral states. In short, the confederates may bring to the field what forces they please, if they will be at the charge of them: but France, let her wealth be what it will, must content herself with the product of her own country.

The French are still in greater straits for supplies of horse than men. The breed of their country is neither so good nor numerous as what are to be found in most of the countries of the allies. They had last summer about threescore thousand in their several armies, and could not, perhaps, bring into the field thirty thousand more, if they were disposed to make such an augmentation.

The French horse are not only few but weak in comparison of ours. Their cavalry in the battle of Blenheim could not sustain the shock of the British horse. For this reason our late way of attacking their troops sword in hand is very much to the advantage of our nation, as our men are more robust, and our horses of a stronger make than the French; and in such attacks it is the weight of the forces, supposing equal courage and conduct, that will always carry it. The English strength turned very much to account in our wars against the French of old, when we used to gall them with our long-bows, at a greater distance than they could shoot their arrows; this advantage we lost upon the invention of fire-arms, but by the present method our strength as well as bravery may again be of use to us in the day of battle.

We have very great encouragement to send what

numbers we are able into the field, because our generals at present are such as are likely to make the best use of them, without throwing them away on any fresh attempts or ill-concerted projects. The confederate armies have the happiness of being commanded by persons who are esteemed the greatest leaders of the present age, and are perhaps equal to any that have preceded them. There is a sort of resemblance in their characters, a particular sedateness in their conversation and behaviour, that qualifies them for counsel, with a great intrepidity and resolution that fits them for action. They are all of them men of concealed fire, that doth not break out with noise and heat in the ordinary circumstances of life, but shows itself sufficiently in all great enterprises that require it. It is true, the general upon the Rhine hath not had the same occasions as the others to signalize himself; but if we consider the great vigilance, activity, and courage, with the consummate prudence, and the nice sense of honour which appears in that prince's character, we have great reason to hope, that as he purchased the first success in the present war, by forcing into the service of the confederates an army that was raised against them in the very heart of the empire, he will give one of the finishing strokes to it, and help to conclude the great work which he so happily begun. The sudden check that he gave to the French army the last campaign, and the good order he established in that of the Germans, look like happy presages of what we may expect from his conduct. I shall not pretend to give any character of the generals on the enemy's side; but I think we may say this, that in the eyes of their own nation they are inferior to several that have formerly commanded the French

armies. If, then, we have greater numbers than the French, and at the same time better generals, it must be our own fault if we will not reap the fruit of such advantages.

It would be loss of time to explain any farther our superiority to the enemy in numbers of men and horse. We see plainly that we have the means in our hands, and that nothing but the application of them is wanting. Let us only consider what use the enemy would make of the advantage we have mentioned, if it fell on their side; and is it not very strange that we should not be as active and industrious for our security, as they would certainly be for our destruction? But before we consider more distinctly the method we ought to take in the prosecution of the war, under this particular view, let us reflect a little upon those we have already taken in the course of it for these six years past.

The allies, after a successful summer, are too apt, upon the strength of it, to neglect their preparations for the ensuing campaign, while the French leave no art nor stratagem untried to fill up the empty spaces of their armies, and to swell them to an equal bulk with those of the confederates. By this means our advantage is lost, and the fate of Europe brought to a second decision. It is now become an observation, that we are to expect a very indifferent year after a very successful one. Blenheim was followed by a summer that makes no noise in the war. Ramilles, Turin, and Barcelona were the parents of our last campaign. So many dreadful blows alarmed the enemy, and raised their whole country up in arms. Had we on our side made proportionable preparations, the war by this time had been brought to a happy issue. If, after having gained the great

victories of Blenheim and Ramilles, we had made the same efforts as we should have done had we lost them, the power of France could not have withstood us.

In the beginning of the winter we usually get what intelligence we can of the force which the enemy intends to employ in the campaigns of the succeeding year, and immediately cast about for a sufficient number of troops to face them in the field of battle. This, I must confess, would be a good method if we were engaged in a defensive war. We might maintain our ground with an equal number of forces; but our business is not only to secure what we are already in possession of; we are to wrest the whole Spanish monarchy out of the hands of the enemy; and, in order to it, to work our way into the heart of his country by dint of arms. We should therefore put forth all our strength, and, without having an eye to his preparations, make the greatest push that we are able on our own side. We are told that the enemy at present thinks of *raising threescore thousand men for the next summer*; if we regulate our levies in that view, we do nothing: let us perform our utmost, as they do, and we shall overwhelm them with our multitudes. We have it in our power at least to be four times as strong as the French; but if ten men are in war with forty, and the latter detach only an equal number to the engagement, what benefit do they receive from their superiority?

It seems, therefore, to be the business of the confederates to turn to their advantage their apparent odds in men and horse; and by that means to outnumber the enemy in all rencounters and engagements. For the same reason it must be for the

interest of the allies to seek all opportunities of battle, because all losses on the opposite side are made up with infinitely more difficulty than on ours; besides that, the French do their business by lying still, and have no other concern in the war than to hold fast what they have already got into their hands.

The miscarriage of the noblest project that ever was formed in Europe, can be ascribed to nothing else but our want of numbers in the several quarters of the war. If our armies on all sides had begun to busy and insult the enemy, at the same time that the forces marched out of Piedmont, Toulon had been at present in the hands of the duke of Savoy. But could that prince ever have imagined that the French would have been at liberty to detach whole armies against him? or will it appear credible to posterity, that in a war carried on by the joint force of so many populous and powerful nations, France could send so great a part of its troops to one seat of the war, without suffering in any of the rest? *Whereas it is well known, that if the duke of Savoy had continued before Toulon eight days longer, he had been attacked by an army of sixty thousand men, which was more than double the number of his own, and yet the enemy was strong enough everywhere else to prevent the confederates from making any impression upon them.* However, let us fall into the right measures, and we may hope that the stroke is only deferred. The duke of Savoy hath secured a passage into Dauphiny, and if the allies make such efforts in all parts, as we may reasonably expect from them, that prince may still make himself master of the French dominions on the other side of the Rhone.

There is another part of our conduct which may perhaps deserve to be considered. As soon as we have agreed with the states-general upon any augmentation of our forces, we immediately negotiate with some or other of the German princes, who are in the same confederacy, to furnish out our quota in mercenaries. This may be doubly prejudicial to the alliance; first, as it may have an ill influence on the resolutions of those princes in the diet of the empire, who may be willing to settle as small a quota as they can for themselves, that they may have more troops to hire out; and, in the next place, as it may hinder them from contributing the whole quota which they have settled. This actually happened in the last campaign, when we are told the Germans excused themselves for their want of troops upon the Rhine, as having already put most of their forces into the British and Dutch service. Such an excuse, indeed, is very unjust, but it would be better to give them no occasion of making it; and on such occasions to consider what men are apt to do, as well as what they may do with reason.

It might, therefore, be for our advantage, that all the foreign troops in the British pay should be raised in neutral countries. Switzerland in particular, if timely applied to, might be of great use to us; not only in respect of the reinforcements which we might draw from thence, but because such a draught of forces would lessen the number of those that might otherwise be employed in the French service. The bulk of our levies should nevertheless be raised in our own country, it being impossible for neutral states to furnish both the British and Dutch with a sufficient number of effective men; besides that the British soldiers will be more at the disposal

of their general, and act with greater vigour under the conduct of one for whom they have so just a value, and whom they do not consider only as their leader, but as their countryman. We may likewise suppose, that the soldiers of a neutral state, who are not animated by any national interest, cannot fight for pay with the same ardour and alacrity as men that fight for their prince and country, their wives and children.

It may likewise be worth while to consider, whether the military genius of the English nation may not fall by degrees, and become inferior to that of our neighbouring states, if it hath no occasion to exert itself. Minds that are altogether set on trade and profit, often contract a certain narrowness of temper, and at length become incapable of great and generous resolutions. Should the French ever make an unexpected descent upon us, we might want soldiers of our own growth to rise up in our defence; and might not have time to draw a sufficient number of troops to our relief from the remote corners of Germany. It is generally said, that if king Charles the second had made war upon France in the beginning of his reign, he might have conquered it by the many veterans which were scattered up and down this kingdom, and had been inured to service in the civil wars. It is to be hoped we shall never have such another nursery of soldiers; but if the present war gives a more military turn to all other nations of Europe, than to our own, it is to be feared we may lose in strength what we gain in number. We may apply the same consideration nearer home. If all our levies are made in Scotland or Ireland, may not those two parts of the British monarchy, after the disbanding of the present army, be too

powerful for the rest, in case of a revolt? though, God be thanked, we are not in any danger of one at present. However, as these considerations do not concern the more essential part of our design, it is sufficient to have mentioned them.

The sparing of ourselves in so important a conjuncture, when we have but this single opportunity left for the preserving everything that is precious amongst us, is the worst sort of management that we can possibly fall into. The good husbandry of one age may entail an endless expense upon all posterity. We must venture the sacrificing a part of our lives and fortunes at present, if we will effectually secure both for the future. The British kingdom is so well stocked with people, and so much abounds in horse, that we have power enough in our own hands, did we make our utmost use of it, to humble France, and in a campaign or two to put an end to the war.

There is not a more disagreeable thought to the people of Great Britain than that of a standing army. But if a peace be made before the disunion of France and Spain, there are few, perhaps, that will not think the maintaining a settled body of numerous forces indispensable for the safety of our country. We have it therefore in our choice, to raise such a strong reinforcement of troops as at present may be sufficient, in conjunction with those of the allies, for breaking the strength of the enemy; or, when the peace is concluded, to keep on foot such an army as will be necessary for preventing his attempts upon us.

It is to be hoped, that those who would be the most zealous against keeping up a constant body of

regular troops after a general peace, will the most distinguish themselves for the promoting an augmentation of those which are now on foot ; and by that means take care that we shall not stand in need of such an expedient.

We are, indeed, obliged, by the present situation of our affairs, to bring more troops into the field than we have yet done. As the French are retired within their lines, and have collected all their strength into a narrow compass, we must have greater numbers to charge them in their intrenchments, and force them to a battle. We saw, the last campaign, that an army of fourscore thousand of the best troops in Europe, with the duke of Marlborough at the head of them, could do nothing against an enemy that were too numerous to be assaulted in their camps, or attacked in their strong holds.

There is another consideration, which deserves our utmost attention. We know very well, that there is a prince at the head of a powerful army, who may give a turn to the war in which we are engaged, if he thinks fit to side with either party. I cannot presume to guess how far our ministers may be informed of his designs : but unless they have very strong assurances of his falling in with the grand alliance, or not opposing it, they cannot be too circumspect and speedy in taking their precautions against any contrary resolution. We shall be unpardonable, if, after such an expense of blood and treasure, we leave it in the power of any single prince to command a peace, and make us accept what conditions he thinks fit. It is certain, according to the posture of our affairs in the last campaign, this prince could have turned the balance on either side ; but it

is to be hoped, the liberties of Europe will not depend any more on the determination of one man's will. I do not speak this because I think there is any appearance of that prince's uniting himself to France. On the contrary, as he hath an extraordinary zeal for the reformed religion, and great sentiments of honour, I think it is not improbable we should draw him over to the confederacy, if we press him to it by proper motives. His love for religion, and his sense of glory, will both have their effect on a prince who hath already distinguished himself by being a patron of protestants, and guarantee of the Westphalian treaty. And if his interest hath any part in his actions, the allies may make him greater offers than the French king can do in the present conjuncture. There are large extents of dominion in the forfeited principalities of the empire; doubtful successions, to which the king of Sweden seems to have very just pretensions; and at the same time a great title not yet disposed of, and a seat of war on the Moselle, where none of our generals have signalized themselves. It would be presumption to be particular in any proposals on such an occasion; it is enough to have shown in general, that there are fair opportunities, of which the wisdom of the confederates may make use.

Common sense will direct us, when we see so war-like a prince at the head of so great an army hovering on the borders of our confederates, either to obtain his friendship, or secure ourselves against the force of his arms. We are sure, whatever number of troops we raise, we shall have no hands but what will turn to account. Nay, we are certain that extraordinary funds and augmentations for one or two

campaigns may spare us the expense of many years, and put an end to taxes and levies for a whole age ; whereas a long parsimonious war will drain us of more men and money, and in the end may prove ineffectual.

There is still a great popular objection, which will be made to everything that can be urged on this subject. And, indeed, it is such a one as falls so much in with the prejudices and little passions of the multitude, that when it is turned and set off to advantage by ill-designing men, it throws a damp on the public spirit of the nation, and gives a check to all generous resolutions for its honour and safety. In short, we are to be told, that England contributes much more than any other of the allies, and that therefore it is not reasonable she should make any addition to her present efforts. If this were true in fact, I do not see any tolerable colour for such a conclusion. Supposing, among a multitude embarked in the same vessel, there are several that in the fury of a tempest will rather perish than work for their preservation ; would it not be madness in the rest to stand idle, and rather choose to sink together than do more than comes to their share ? Since we are engaged in a work so absolutely necessary for our welfare, the remissness of our allies should be an argument for us to redouble our endeavours rather than slacken them. If we must govern ourselves by example, let us rather imitate the vigilance and activity of the common enemy than the supineness and negligence of our friends.

We have, indeed, a much greater share in the war than any other part of the confederacy. The French king makes at us directly, keeps a king by him to

set over us, and hath very lately augmented the salary of his court to let us see how much he hath that design at his heart. Few of the nations in war with him, should they ever fall into his hands, would lose their religion or form of government, or interfere at present with him in matters of commerce. The Dutch, who are likely to be the greatest losers after the Britons, have but little trade to the Levant in comparison with ours, have no considerable plantations or commerce in the West Indies, or any woollen manufactures for Spain; not to mention the strong barrier they have already purchased between France and their own country.

But after all, every nation in the confederacy makes the same complaint, and fancies itself the greatest sufferer by the war. Indeed, in so common a pressure, let the weight be never so equally distributed, every one will be most sensible of that part which lies on his own shoulders. We furnish, without dispute, more than any other branch of the alliance: but the question is, whether others do not exert themselves in proportion, according to their respective strength. The emperor, the king of Prussia, the elector of Hanover, as well as the states of Holland and the duke of Savoy, seem at least to come up to us. The greatest powers in Germany are borrowing money where they can get it, in order to maintain their stated quotas, and go through their part of the expense: and if any of the circles have been negligent, they have paid for it much more in their late contributions than what would have furnished out their shares in the common charges of the war.

There are others who will object the poverty of

the nation, and the difficulties it would find in furnishing greater supplies to the war than it doth at present. To this we might answer, that if the nation were really as poor as this objection makes it, it should be an argument for enforcing rather than diminishing our present efforts against France. The sinking our taxes for a few years would be only a temporary relief, and in a little time occasion for greater impositions than those which are now laid upon us. Whereas the seasonable expence of part of our riches, will not only preserve the rest, but by the right use of them procure vast additions to our present stock. It may be necessary for a person languishing under an ill habit of body to lose several ounces of blood, notwithstanding it will weaken him for a time, in order to put a new ferment into the remaining mass, and draw into it fresh supplies.

But we can by no means make this concession to those who so industriously publish the nation's poverty. Our country is not only rich, but abounds in wealth much more than any other of the same extent in Europe. France, notwithstanding the goodness of its climate, the fertility of its soil, the multitude of its inhabitants, its convenient harbours, both for the ocean and Mediterranean, and its present correspondence with the West Indies, is not to compare with Great Britain in this particular. I shall transcribe, word for word, the passage of a late celebrated French author, which will lay this matter in its full light; and leave the reader to make the counterpart of the parallel between the two nations.

“ According to all the inquiries that I have been able to make during several years, in which I have applied myself to this sort of remarks, I have ob-

served, that about a tenth part of the people of this kingdom are reduced to beggary, and are actual beggars. That among the nine other parts, five are not in a condition to give alms or relief to those aforementioned, being very near reduced themselves to the same miserable condition. Of the four other remaining parts, three are very uneasy in their circumstances, and embarrassed with debts and law-suits. In the tenth part I reckon the soldiers, lawyers, ecclesiastics, merchants, and substantial citizens, which cannot make up more than a hundred thousand families. And I believe I should not be mistaken, if I should say, that there are not above ten thousand of these families, who are very much at their ease: and if out of these ten thousand, we should take the men that are employed in public business, with their dependents and adherents, as also those whom the king supports by his bounty, with a few merchants, the number of those who remain will be surprisingly little." *Dixme Royale.*

What a dreadful account is this of nineteen millions of people; for so many the author reckons in that kingdom. How can we see such a multitude of souls cast under so many subdivisions of misery, without reflecting on the absurdity of a form of government that sacrifices the ease and happiness of so many reasonable beings to the glory of one of their fellow-creatures? But this is not our affair at present.

If we run over the other nations of Europe that have any part in the present war, we shall only pass through so many different scenes of poverty. Spain, Portugal, and Savoy, are reduced to great extremities. Germany is exhausted to the last degree

in many parts of it, and in others plundered of all she had left. Holland, indeed, flourishes above the rest in wealth and plenty: but if we consider the infinite industry and penuriousness of that people, the coarseness of their food and raiment, their little indulgences of pleasure and excess, it is no wonder, that notwithstanding they furnish as great taxes as their neighbours, they make a better figure under them. In a commonwealth there are not so many overgrown estates as in monarchies; the wealth of the country is so equally distributed, that most of the community are at their ease, though few are placed in extraordinary points of splendour and magnificence. But notwithstanding these circumstances may very much contribute to the seeming prosperity of the United Provinces, we know they are indebted many millions more than their whole republic is worth; and if we consider the variety of taxes and impositions they groan under at a time when their private dissensions run high, and some of the wealthiest parts of the government refuse to bear their share in the public expense, we shall not think the condition of that people so much to be envied as some amongst us would willingly represent it.

Nor is Great Britain only rich as she stands in comparison with other states, but is really so in her own intrinsic wealth. She had never more ships at sea, greater quantities of merchandise in her warehouses, larger receipts of customs, or more numerous commodities rising out of her manufactures than she has at present. In short, she sits in the midst of a mighty affluence of all the necessities and conveniences of life. If our silver and gold diminishes,

our public credit continues unimpaired, and if we are in want of bullion, it lies in our own power to supply ourselves. The old Roman general, when he heard his army complain of thirst, showed them the springs and rivers that lay behind the enemy's camp. It is our own ease: the rout of a Spanish army would make us masters of the Indies.

If prince Eugene takes upon him the command of the confederate forces in Catalonia, and meets with that support from the alliance, which they are capable of giving him, we have a fair prospect of reducing Spain to the entire obedience of the house of Austria. The Silesian fund (to the immortal reputation of those generous patriots who were concerned in it) enabled that prince to make a conquest of Italy, at a time when our affairs were more desperate there, than they are at present in the kingdom of Spain.

When our parliament has done their utmost, another public-spirited project of the same nature, which the common enemy could not foresee nor prepare against, might, in all probability, set king Charles upon the throne for which he hath so long contended. One pitched battle would determine the fate of the Spanish continent.

Let us, therefore, exert the united strength of our whole island, and by that means put a new life and spirit into the confederates, who have their eyes fixed upon us, and will abate or increase their preparations according to the example that is set them. We see the necessity of an augmentation if we intend to bring the enemy to reason, or rescue our country from the miseries that may befall it; and we find ourselves in a condition of making such

an augmentation as, by the blessing of God, cannot but prove effectual. If we carry it on vigorously, we shall gain for ourselves and our posterity, a long, a glorious, and a lasting peace ; but if we neglect so fair an opportunity, we may be willing to employ all our hands, and all our treasures, when it will be too late ; and shall be tormented with one of the most melancholy reflections of an afflicted heart, that it was once in our power to have made ourselves and our children happy.

THE LATE
TRIAL AND CONVICTION
OF
COUNT TARIFF.

THE LATE
TRIAL AND CONVICTION
OF
COUNT TARIFF¹.

THE whole nation is at present very inquisitive after the proceedings in the cause of Goodman Fact, plaintiff, and count Tariff, defendant; as it was tried on the eighteenth of June, in the thirteenth year of her majesty's reign, and in the year of the Lord 1713. I shall therefore give my countrymen a short and faithful account of that whole matter. And in order to it, must in the first place premise some particulars relating to the person and character of the said plaintiff, Goodman Fact.

Goodman Fact is allowed by everybody to be a

¹ This humorous paper relates to the Tariff, as it is called, or treaty of commerce, declaring the duties of import and export, which the ministry had agreed to at the peace of Utrecht. A bill, which the commons had ordered to be brought in, for the confirmation of that treaty, occasioned great debates, and was at length thrown out by a small majority. This fate of the Tariff was thought to reflect no small disgrace on the makers of the peace, and was matter of great triumph to the whig party. See the particulars in Burnet, under the year 1713, and in Tindal's Continuation. HUMOR.

plain-spoken person, and a man of very few words. Tropes and figures are his aversion. He affirms everything roundly, without any art, rhetoric, or circumlocution. He is a declared enemy to all kinds of ceremony and complaisance. He flatters nobody. Yet so great is his natural eloquence, that he cuts down the finest orator, and destroys the best contrived argument, as soon as ever he gets himself to be heard. He never applies to the passions or prejudices of his audience: when they listen with attention and honest minds, he never fails of carrying his point. He appeared in a suit of English broad-cloth, very plain, but rich. Everything he wore was substantial, honest, homespun ware. His cane, indeed, came from the East Indies, and two or three little superfluities from Turkey and other parts. It is said that he encouraged himself with a bottle of neat port, before he appeared at the trial. He was huzzaed into the court by several thousands of weavers, clothiers, fullers, dyers, packers, calenders, setters, silk-men, spinners, dressers, whitsters, winders, mercers, throwsters, sugar-bakers, distillers, drapers, hosiers, planters, merchants, and fishermen; who all unanimously declared, that they could not live above two months longer, if their friend Fact did not gain his cause.

Everybody was overjoyed to hear that the good man was come to town. He no sooner made his appearance in court, but several of his friends fell a weeping at the sight of him: for indeed he had not been seen there three years before.

The charge he exhibited against count Tariff was drawn up in the following articles:

I. That the said count had given in false and fraudulent reports in the name of the plaintiff.

II. That the said count had tampered with the said plaintiff, and made use of many indirect methods, to bring him over to his party.

III. That the said count had wilfully and knowingly traduced the said plaintiff, having misrepresented him in many cunningly-devised speeches, as a person in the French interest.

IV. That the said count had averred, in the presence of above five hundred persons, that he had heard the plaintiff speak in derogation of the Portuguese, Spaniards, Italians, Hollanders, and others; who were the persons whom the said plaintiff had always favoured in his discourse, and whom he should always continue to favour.

V. That the said count had given a very disadvantageous relation of three great farms, which had long flourished under the care and superintendency of the plaintiff.

VI. That he would have obliged the owners of the said farms to buy up many commodities which grew upon their own lands. That he would have taken away the labour from the tenants, and put it into the hands of strangers. That he would have lessened and destroyed the produce of the said farms.

That by these, and many other wicked devices, he would have starved many honest day-labourers; have impoverished the owner, and have filled his farm with beggars, etc.

VII. That the said count had either sunk or mislaid several books, papers, and receipts, by which the plaintiff might sooner have found means to vindicate himself from such calumnies, aspersions, and misrepresentations.

In all these particulars Goodman Fact was very

short, but pithy : for, as I said before, he was a plain, homespun man. His yea was yea, and his nay, nay. He had farther so much of the quaker in him, that he never swore, but his affirmation was as valid as another's oath.

It was observed, that count Tariff endeavoured to browbeat the plaintiff all the while he was speaking. But though he was not so impudent as the count, he was every whit as sturdy ; and when it came to the count's turn to speak, old Fact so stared him in the face, after his plain, downright way, that the count was very often struck dumb, and forced to hold his tongue in the middle of his discourse.

More witnesses appeared on this occasion to attest Goodman Fact's veracity than ever were seen in a court of justice. His cause was pleaded by the ablest men in the kingdom ; among whom was a gentleman of Suffolk², who did him signal service.

Count Tariff appeared just the reverse of Goodman Fact. He was dressed in a fine brocade waistcoat, curiously embroidered with flower-de-luces. He wore also a broad-brimmed hat, a shoulder-knot, and a pair of silver-clocked stockings. His speeches were accompanied with much gesture and grimace. He abounded in empty phrases, superficial flourishes, violent assertions, and feeble proofs. To be brief, he had all the French assurance, cunning, and volubility of tongue ; and would most certainly have carried his cause, had he dealt with any one antagonist in the world besides Goodman Fact.

The count being called upon to answer to the charge which had been made against him, did it after a manner peculiar to the family of the Tariffs, viz. by railing and calling names.

² Sir Thomas Harmer.

He, in the first place, accused his adversary of *scandalum magnatum*, and of speaking against his superiors with saueiness and contempt. As the plain good man was not of a make to have any friends at court, he was a little startled at this accusation, till at length he made it appear, that it was impossible for any of his family to be either saucy or cringing; for that their character was, above all others in the world, to do what was required of them by the court, that is, "To speak the truth, and nothing but the truth."

The count in the next place assured the court, that his antagonist had taken upon him a wrong name, having curtailed it of two or three letters; for that in reality his name was not FACT, but FACTION. The count was so pleased with this conceit, that for an hour together he repeated it in every sentence; calling his antagonist's assertions the reports of faction; his friends, the sons of faction; the testimonies of his witnesses, the dictates of faction: nay, with such a degree of impudence did he push this matter, that when he heard the cries of above a million of people begging for their bread, he termed the prayers and importunities of such a starving multitude, the clamours of faction.

As soon as the count was driven out of this device, he affirmed roundly in the court, that Fact was not an Englishman by birth, but that he was of Dutch extraction, and born in Holland. In consequence of this assertion, he began to rally the poor plaintiff, under the title of Mynheer Van Fact; which took pretty well with the simpletons of his party, but the men of sense did not think the jest worth all their lands and tenements.

When the count had finished his speech, he de-

sired leave to call in his witnesses, which was granted: when immediately there came to the bar a man with a hat drawn over his eyes in such a manner that it was impossible to see his face. He spoke in the spirit, nay, in the very language of the count, repeated his arguments, and confirmed his assertions. Being asked his name, he said the world called him Mercator³; but as for his true name, his age, his lineage, his religion, his place of abode, they were particulars which, for certain reasons, he was obliged to conceal. The court found him such a false, shuffling, prevaricating rascal, that they set him aside, as a person unqualified to give his testimony in a court of justice; advising him at the same time, as he tendered his ears, to forbear uttering such notorious falsehoods as he had then published. The witness, however, persisted in his contumacy, telling them he was very sorry to find, that notwithstanding what he had said, they were resolved to be as arrant fools as all their forefathers had been for a hundred years before them.

There came up another witness⁴, who spoke much to the reputation of count Tariff. This was a tall, black, blustering person, dressed in a Spanish habit, with a plume of feathers on his head, a golillio about his neck, and a long Toledo sticking out by his side; his garments were so covered with tinsel and

³ A ministerial paper, so called, written by Daniel de Foe, in vindication of the treaty of commerce.

⁴ By this witness, is meant the Assiento contract, or grant, made by the king of Spain, for the importation of negroes into his American dominions, to the South-sea company, the supposed benefits of which contract, being part of the treaty of commerce, were much insisted upon by the ministerial advocates. *IBID.*

spangles, that at a distance he seemed to be made up of silver and gold. He called himself Don Assiento, and mentioned several nations that had sought his friendship; but declared that he had been gained over by the count, and that he was come into these parts to enrich everyone that heard him. The court was at first very well pleased with his figure, and the promises he made them; but upon examination found him a true Spaniard: nothing but show and beggary. For it was fully proved, that notwithstanding the boasts and appearance which he made, he was not worth a groat: nay, that upon casting up his annual expences, with the debts and encumbrances which lay upon his estate, he was worse than nothing.

There appeared another witness in favour of the count, who spoke with so much violence and warmth, that the court began to listen to him very attentively; till, upon hearing his name, they found he was a notorious knight of the post, being kept in pay, to give his testimony on all occasions where it was wanted: This was the Examiner⁵; a person who had abused almost every man in England, that deserved well of his country. He called Goodman Fact a liar, a seditious person, a traitor, and a rebel; and so much incensed the honest man, that he would certainly have knocked him down if he could have come at him. It was allowed by everybody, that so foul-mouthed a witness never appeared in any cause. Seeing several persons of great eminence, who had maintained the cause of Goodman Fact, he called them idiots, blockheads, villains, knaves, infidels, atheists, apostates, fiends, and devils; never

⁵ The political periodical of that name.

did man show so much eloquence in ribaldry. The court was at length so justly provoked with this fellow's behaviour, who spared no age, nor sex, nor profession, which had shown any friendship or inclination for the plaintiff, that several began to whisper to one another, it was high time to bring him to punishment. But the witness, overhearing the word pillory repeated twice or thrice, slunk away privately, and hid himself among the people.

After a full hearing on both sides, count Tariff was cast, and Goodman Fact got his cause; but the court sitting late, did not think it fit, at that time, to give him costs, or, indeed, to enter into that matter. The honest man immediately retired, after having assured his friends, that at any time when the count should appear on the like occasion, he would undertake their defence, and come to their assistance, if they would be at the pains to find him out.

It is incredible how general a joy Goodman Fact's success created in the city of London; there was nothing to be seen or heard the next day, but shaking of hands, congratulations, reflections on the danger they had escaped, and gratitude to those who had delivered them from it.

The night concluded with balls, bonfires, ringing of bells, and the like public demonstrations of joy.

END OF THE THIRD VOLUME.
